

Action Plan in response to the PPO Report into the death of

Mr Akash Akeel on 31/12/2022 at HMP Leeds

Rec No	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Head of Healthcare should review the procedures in place for assessing the mental health needs of prisoners who have requested mental health support.	Accepted	A review has been undertaken by the regional mental health lead for the Yorkshire prisons and an assurance process is now in place to ensure prisoners are seen within the allocated time scales. This is monitored monthly as part of the compliance checks and the data set submitted to commissioners. If a prisoner cannot be assessed within the relevant timescale they are informed and can make staff aware of any deterioration. Triage clinics are run daily and assessment clinics take place twice weekly to meet the high demand.	Head of Healthcare PPG	Completed
2	The Head of Healthcare should review processes to ensure prescribed treatments are effectively administered and issues are promptly resolved.	Accepted	Following a review in February a new process was introduced whereby the wing technicians bring a list of those who haven't attended for their medication to the daily handover. If this persists for 3 days or more they are visited by someone from the relevant team to discuss further. The prisoner has the option to then resolve any queries or sign a disclaimer form to say they no longer wish to receive the medication.	Head of Healthcare PPG	Completed
