2	The Governor should review how effective previous work to educate managers about the risk assessment process, and the Graham judgement has been and provide additional measures, including additional training, where necessary.	Accepted	Following a Senior Leadership Team meeting, the Governor has initiated an update to the Local Security Strategy (LSS) instruction to align with the new framework. The revised LSS will include a dedicated section on the Graham judgment. Quality assurance processes have been strengthened, resulting in improved documentation of escape risk, mobility, and decency considerations. Where narratives remain incomplete, managers will receive targeted feedback and support to ensure compliance.	Governor HMPPS	January 2026
