

Action Plan in response to the PPO Report into the death of Mr Colin Lovett on 29 October 2022 at HMP The Verne

	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	<p>The Head of Healthcare should ensure that:</p> <ul style="list-style-type: none"> blood glucose levels are taken at reception for all diabetics and those with a Freestyle Libre sensor and ensure the readings are recorded in the prisoner's medical record at reception, there is a system in place to monitor use of glucose tablets and overuse should prompt a diabetic medication review; and there is an in-possession policy in place, to identify whether a 	Accepted	<p>Blood glucose levels will be taken at the first reception screening via a freestyle libre sensor. A capillary test will be performed when a sensor is not available. In the event that a diabetic patient declines a blood glucose test, staff must record this information clearly in the prisoner's medical record.</p> <p>Airedale NHS Trust who are responsible for providing diabetic services via telemedicine, have commenced a diabetic case review for complex patients and clinicians. They will continue to monitor the use of glucose tablets and ensure a diabetic and dietetic review is completed, if necessary. All complex patients will be referred to this pathway to ensure there is robust care planning and management in place.</p> <p>All prisoners at HMP The Verne will have a in possession risk assessment in place which will be reviewed annually or in the event of an incident, including when ACCT's are opened.</p>	Head of Healthcare (Care UK)	Completed

	prisoner is able to have weekly or monthly prescriptions in possession which includes vigorous risk assessment, compliance monitoring with the medication regime and random cell checks to count medications.		Further to this, we have introduced compliance monitoring to ensure prisoners only have in possession exactly what they are entitled to.
