

Action Plan in response to the PPO Report into the death of Mr Solomon Bamidele on 16 November 2023 HMP Pentonville

Rec No	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Head of Healthcare should ensure that prisoners diagnosed with epilepsy are managed in line with national guidance.	Yes	Arrange meeting between healthcare managers within HMP Pentonville, regional primary care lead, patient safety lead, NHS England to understand best practice, any examples of robust pathways in place at other establishments, and feed this in to a new local policy for the management of epilepsy.	Head of Healthcare Practice Plus Group	31.12.2024
2	<p>The Head of Healthcare should review the management of prisoners with diagnoses linked to recurrent seizures to ensure that:</p> <ul style="list-style-type: none"> healthcare staff create detailed individual care plans, including reporting seizures, medication issues and emergency responses and decisions not to provide follow up care are taken with appropriate consultation; and prisoners who experience recurrent unprovoked seizures are regularly discussed at the 		<p>Under the new models of care ways of working, all new patients entering the establishment are discussed in the early days in custody (EDIC) meeting which takes place daily Monday to Friday. During this meeting, the patient's health records along with any other medical reports, notes and the reception screening, are discussed. If the patient has a long-term condition (LTC) such as epilepsy, they will be added to the LTC waiting list for care planning and review.</p> <p>An initial LTC review is carried out to determine what further input and treatment the patient requires in respect to their MDT. Patients with</p>	PPG Early days in custody Practice Plus Group	31.12.2024 and then ongoing

	Multi-Professional Complex Case Clinic (MPCCC).		<p>complex and/ or multiple physical health issues are referred to and discussed in the Multi Professionals Complex Cases Clinic (MPCCC) which runs every Monday and is attended by a GP, psychiatrist, nurse prescriber, paramedic, pharmacist and senior nursing staff. In addition to the above, any member of staff or patient in the establishment concerned about someone suffering from unprovoked seizures, should refer in to the unscheduled care team who are functional 24/7 within HMP Pentonville. Recent guidance on how to refer in to this team has been circulated to all prison and healthcare staff. Additionally, the Deputy Head of Healthcare and Unscheduled Care Lead have delivered training on code blue and code red with prison officer to upskill them.</p> <p>The modern matron should dip test some of the assessments, case notes and care plans of patients with Epilepsy moving forward, on a regular basis. The feedback from these reviews should be shared with the wider team in the form of learning sessions. The audit should also be saved and carried out regularly for quality assurance purposes. Patients suffering from seizures should be discussed at the prison morning meeting if they have resulted in a code blue. They should also be discussed in the morning and lunchtime handover meetings which are attended and represented by all healthcare departments.</p>
