

## Action Plan in response to the PPO Report into the death of Mr Paul Dixon on 16 June 2024 at HMP Preston

Rec No	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Head of Healthcare should ensure that all healthcare staff undertake a MUST assessment when a person is weighed and ensure any concerns are escalated with immediate effect.	Accepted	In line with NICE Guidance, in April 2024 a pathway has now been developed to provide guidance on weight loss management. Following initial screening of a BMI, there is now a systematic approach of how members of healthcare should signpost any risks identified. To ensure that patients are monitored and discussed appropriately, a MUST Score of 2, which is identified as high risk, means that patients will be added to the Complex Case Register and discussed bi-weekly following urgent referral to the GP for further management, assessment and consideration will also be given to the prescribing of oral nutritional supplements (ONS) in addition to regular diet. This was shared with the Healthcare Team via the Patient Safety Incident Review Group in May 2024.	Head of Healthcare, Practice Plus Group	October 2024
