

Action Plan in response to the PPO Report into the death of Mr Richard Pinder on 28th December 2025 - HMP Leeds

Rec No		Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Head of Healthcare should ensure that all previously prescribed medicines are continued after arrival at HMP Leeds unless there is a clinical rationale not to continue.	Accepted	<p>PPG at HMP Leeds are looking into the recording of secondary care medications to community GP Summary Care Records and how to ensure we'd gain access to this information i.e. access to Leeds Care Records access.</p> <p>PPG at HMP Leeds are enquiring how to terminate S1 records when in use by another organisation so that they can be used by the healthcare staff at HMP Leeds. Both points have been escalated to the PPG Regional Patient Safety Manager for discussion at regional patient safety incident review group (RPSIRG).</p> <p>PPG at HMP Leeds will continue to audit the use of S1 cards vs manual log ins, as well as any other S1 anomalies that could prevent the correct registration of a patient during reception screening.</p>	Deputy Head of Healthcare	30/09/2026

2	The Head of Healthcare should ensure that all decisions to discharge someone from a mental health/learning disabilities caseload are based on a complete picture of the individual's needs for support and monitoring.	Accepted	PPG's Regional Mental Health and Learning Disability Lead is working closely with HMP Leeds IMHT to firm up a pre discharge review of each patient on the Learning Disability case load, as well as supporting with inclusive criteria when a patient does not have a diagnosed Learning Disability as a diagnosis but may benefit from the support of Learning Difficulties Nurse.	Deputy Head of Healthcare	30/09/2026
