Comparison of survey responses between different sub-populations of children

In this table responses of children who had been in local authority care are compared with responses of those who had not been in local authority care.

Please note that these analyses are based on summary data from selected survey questions only.

Shading is used to indicate statistical significance*, as follows:

- Green shading shows results that are significantly more positive than the comparator
- Blue shading shows results that are significantly more negative than the comparator
- Orange shading shows significant differences in demographics and background information
- No shading means that differences are not significant and may have occurred by chance
- Grey shading indicates that we have no valid data for this question

* less than 1% probability that the difference is due to chance
