1	The Head of Healthcare should ensure that all prisoners with cancer and/or a terminal diagnosis have care plans in place that reflect their individual needs.	Accepted	<p>To ensure care plans are written and available to staff and the prisoner, a named nurse will meet with each prisoner diagnosed with cancer or a terminal diagnosis where a care plan will be devised taking into account their individual care needs. These are discussed at the weekly complex clinic. The weekly clinic identifies and confirms that each prisoner has a written care plan in place.</p> <p>The clinic is attended by primary care, substance misuse and mental health team, to ensure that all aspects of a patients care are considered, and to ensure that all relevant information is known. The outcome of these meetings are recorded on the patient's records, and plans are implemented following these meetings.</p>	Head of Healthcare Completed
2	The Head of Healthcare should remind healthcare staff of the importance of discussing DNACPR orders with prisoners with a terminal illness.	Accepted	<p>All Healthcare staff will be reminded by the Head of Healthcare of the correct procedures to follow when discussing DNACPR orders with patients. This will take place at a staff briefing and followed up with written minutes.</p> <p>All discussions concerning DNACPR with the prisoner will be undertaken by the GP, with a second member of healthcare staff also present. The process for confirming a decision around DNACPR are prescriptive in what needs to be in place and what needs to be recorded. A local form is used, in line with the hospitals and ambulance service. The forms are kept with the patient and scanned on to their records; and the prison is informed of all decisions made. Where the patient has signed a consent form to allow their health to be discussed with relatives, then discussions with the family can also take place.</p>	Head of HC End of Feb 17
