

**Action Plan – Roger Vanata. HMP Bure. NC. 05/05/2017**

No	Recommendation	Accepted/Not Accepted	Response	Target date for completion and function responsible
1	The Head of Healthcare should ensure that GPs follow relevant National Institute for Health and Clinical Excellence (NICE) guidelines for suspected cancer and refer patients appropriately	Accepted	<p>The Head of Healthcare will circulate NICE Guidelines to current and newly assigned GPs and Nurse Practitioners at HMP Bure, to ensure compliance and that appropriate referrals are made. Additionally, the Guidelines will be circulated to all relevant staff on a 6 monthly basis so that staff are continuously reminded to follow the Guidelines.</p> <p>A Copy of the Current Clinical Review will be shared with GPs for reflection and learning. All future Clinical Reviews will be communicated/shared with assigned GPs and recorded appropriately with required responses.</p>	Dec 2017  Head of Healthcare
2	The Governor and Head of Healthcare should ensure that all staff undertaking risk assessments for prisoners taken to hospital understand the legal position on the use of restraints and that assessments fully take into account the health of a prisoner and are based on the actual risk the prisoner presents at the time	Accepted	<p>Given that the population at HMP Bure is of an older nature, and it is often the case that emergency escorts are dispatched outside of core hours. The Healthcare provider will liaise with the Security Department to provide a list of those prisoners where their health issues would have an impact on the risk assessment. This list will include all prisoners who are:</p> <ul style="list-style-type: none"> <li>• Seriously ill</li> <li>• Frail/lacking mobility</li> <li>• Have a terminal diagnosis</li> </ul> <p>This will provide an assumption that restraints are not to be used unless there is a specific reason to override this, which will have to be justified and recorded by the manager responsible.</p> <p>The risk assessment process will be reviewed with a view to changing the tick</p>	Dec 2017  Head of Security  &  Head of Healthcare

			<p>box process undertaken by the nursing staff. This currently asks if there are any medical objections to restraints being used, rather than commenting on the 3 elements recorded above which will need to be added to the assessment to enable the responsible manager to make a considered judgement.</p> <p>Further, as part of the risk assessment advice will be sought from wing staff where available as they will often have a better understanding of the day to day mobility issues.</p> <p>This list will be updated regularly to take into account the health of the prisoners in our care.</p> <p>A joint briefing of prison managers and healthcare staff will be conducted by the Governor and Head of Healthcare. This briefing will specifically detail the findings and recommendations from the PPO investigations whilst explaining the processes above The requirement for staff involved in the assessment process to take into account a prisoner’s health and the actual risk(s) the prisoner poses at the time will be reiterated.</p>	Governor
