

Action Plan - Michael Grimes. HMP/YOI Hull. NC. 15/05/2016

No	Recommendation	Accepted/Not Accepted	Response	Target date for completion and function responsible
1	The Head of Healthcare should ensure that healthcare staff receive training to help detect and treat early warning signs of deterioration in prisoners with chronic conditions, take and record observations as required and record actions and decisions about their ongoing care in their medical records.	Accepted	<p>The nurses use National Early Warning Score (NEWS) when assessing for deterioration in prisoners with chronic conditions. This is linked to SystmOne and the nurses have training in the use of this assessment tool during their four week induction period.</p> <p>A rolling programme of additional training has been organised and forms part of all new staff's competency induction and is revisited monthly in the clinical team meetings. Training will be on going and staff competency assessed by the clinical supervisor and clinical lead.</p>	<p>Head of Healthcare</p> <p>Completed</p>
2	The Governor should ensure that the prison complies with Prison Service guidance about contacting the families of deceased prisoners. Where it has not been possible for prison staff to inform the prisoner's family, a visit should be arranged as soon as possible afterwards.	Accepted	<p>Every attempt is made to contact prisoner's families as soon as possible.</p> <p>All managers have been reminded of the importance of contacting and visiting families in accordance with PSI 64/2011. This has been undertaken via face-to-face briefings with managers and electronically via email.</p>	<p>Head of Residence and Safety</p> <p>Completed</p>
