

Action Plan – Mr William Reddican at HMP Dovegate – Natural Causes on 18/09/2019

No	Recommendation	Accepted/Not Accepted	Response	Target date for completion and function responsible
1	The Head of Healthcare should consider how syringe driver set up and care can be delivered on site for end of life care if required.	Accepted	Investigations were undertaken on 16 January 2020 into how syringe driver set up and care can be delivered on site for end of life care if required, including the training of staff and maintenance of skills, liaison with community services and hospice services and use of the wider Care UK workforce. A palliative care service has now been commissioned to provide the required training and guidance.	Complete Head of Healthcare
