

Action Plan – Mr Andrew Martindale at HMP Wymott – Natural Cause on 20/10/2018

No	Recommendation	Accepted/Not Accepted	Response	Target date for completion and function responsible
1	The Head of Healthcare should ensure that when a prisoner with a more complex medical history reports health concerns overnight, healthcare staff should review him the next day rather than waiting for him to present to them again.	Accepted	We currently have emergency slots in place for prisoners to be reviewed by our GP and we are currently developing a Standard Operating Procedure around guidance for staff with regards to patients who present unwell during the night state. This will ensure that a prisoner presenting with complex medical concerns will be reviewed the next day.	June 2019 Head of Healthcare
