

Action Plan – Mr Allwyn Evans at HMP Usk – Natural Causes on 17/04/2020

No	Recommendation	Accepted/ Not Accepted	Response	Target date for completion and function responsible
1	The Head of Healthcare should ensure that clinical observations include blood pressure readings and are documented to help prioritise the clinical response.	Accepted	An observation sheet has been developed that records clinical observations including blood pressure readings. This ensures all staff have access to the same information to be able to prioritise their response appropriately. This was implemented in April 2020 and communicated to all staff via email.	Complete Head of Healthcare
2	The Head of Healthcare should ensure that clinical entries completed retrospectively record the time that the patient was seen.	Accepted	An email was sent to all prison healthcare staff on the 30/09/2020 to ensure they are aware to include the time treatment was provided in the medical record, and to include this information where a retrospective entry is made.	Complete Head of Healthcare
