

Action Plan – Mr Robert Waller at HMP Leeds – Self-Inflicted Death on 15/07/2018

No	Recommendation	Accepted/ Not Accepted	Response	Target date for completion and function responsible
1	The Governor and Head of Healthcare should remind staff that they must actively assess a prisoner's level of risk based on the information and documents available to them, and that observations should be set according to this assessment, balanced with his presentation.	Accepted	A Governor's Order (GO) will be issued to all staff outlining effective risk management, including the need to use all available information when making decisions about the opening of an ACCT and that risk should not be based on presentation alone, particularly for those arriving into custody. Staff responsible for completing the Immediate Action Plan following the opening of an ACCT, will also be reminded of the importance of considering this information when assessing the prisoner's risk and to set observations and conversations accordingly.	Head of Safer Custody October 2020
