

**Action Plan – Mr Thomas Brown at HMP Wymott – Natural Causes on 13/03/2020**

<b>No</b>	<b>Recommendation</b>	<b>Accepted/ Not Accepted</b>	<b>Response</b>	<b>Target date for completion and function responsible</b>
1	The Head of Healthcare should ensure that clinical staff are aware that those patients who are at risk of malnutrition (particularly those undergoing chemotherapy) are appropriately screened and assessed and that a nutritional plan of care is implemented accordingly.	Accepted	<p>The recommendation has been accepted.</p> <p>A MUST (Malnutrition Universal Screening Tool) score has always been in place at HMP Wymott. All patients who are identified as at risk of malnutrition have a MUST score calculated. This highlights any additional supplements they may require to their diet. Staff have been reminded of this via email, and of the daily handovers to follow and to complete the template on SystemOne. Also, further training for staff will be put in place soon (date to be arranged).</p> <p>This will be highlighted in the daily hand over, managers will ensure that an email is sent out to remind all staff and ensure that it is documented in the daily handover book so that agency staff are aware.</p>	<p>September 2020</p> <p>Head of Healthcare</p>
