1	HMPPS should review its AP induction template to ensure there is specific reference to residents' reduced tolerance to drugs and increased risk of overdose.	Accepted	<p>The national Approved Premise (AP) Induction template, as on Equip, already specifically refers to residents reduced tolerance to drugs and increased risk of overdose as a point of discussion.</p> <p>AP Manual is currently under review, the National Approved Premises team will ensure during the review, templates are updated with the addition of a signature from the resident to evidence discussions. This addition to practice will be reflected within any associated AP instructions and placed onto EQUIP.</p>	June 2020
