

Action Plan in response to the PPO Report into the death of Mr Robert Marti on 12/05/2021 at HMP Isle of Wight

Rec No	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Governor and Head of Healthcare should ensure that all staff undertaking risk assessments for prisoners taken to hospital understand the legal position on the use of restraints and that assessments fully take into account the health of a prisoner and are based on the actual risk the prisoner presents at the time.	Accepted	This has been addressed by the issuing of a Notice to Staff: NTS 015-2022 (17 February 2022) which clarifies that all Governors and Custodial managers must be aware of the medical condition, fragility and mobility of the prisoner at the time of discharge to hospital and consider this in respect of the Graham judgement 2007.	Head of Safety	Complete
2	The Governor should ensure that staff maintain an accurate family liaison log so that there is an effective record of events, issues, concerns and action taken.	Accepted	Family Liaison Officers (FLO) will be formally reminded that all interactions must be recorded in the FLO log; this must provide a clear timeline of when actions have been completed. Interactions that occur outside of the workplace, must be recorded and added to the log as an addendum as soon as practicable.	Head of Safety	End of April 2022
