

Action Plan in response to the PPO Report into the death of Mr Dennis Corlett on 12/05/2021 at HMP Forest Bank

| Rec No | Recommendation | Accepted / Not accepted | Response Action Taken / Planned | Responsible Owner and Organisation | Target Date |
|--------|---|-------------------------|---|------------------------------------|--------------|
| 1 | The Head of Healthcare should ensure that staff are reminded how to identify and address significant weight loss in prisoners, including using the Malnutrition Universal Screening Tool. | Accepted | All staff within the prison have been reminded how to address and report significant weight loss when noted in residents. This has been communicated via a Notice to all Staff to ensure Keyworkers, Wing Staff and Healthcare workers all are aware of the need to remain vigilant to changes in the presentation of residents. The Malnutrition Universal Screening Tool (MUST) has been added to the clinical tree on SystmOne for ease of access for healthcare staff. All healthcare staff have been reminded of the importance of the MUST within the team weekly huddles and a training session has been devised to increase awareness within the Healthcare team of the MUST usage. | Head of Healthcare | January 2022 |
