

Witness Name: SIMON ALLARDICE

Statement No: WITN0311001

Dated: 02/01/2026

THE NOTTINGHAM INQUIRY

FIRST WITNESS STATEMENT OF POLICE SUPERINTENDENT SIMON ALLARDICE

I, SIMON ALLARDICE, will say as follows: -

Introduction

1. My name is Simon Allardice and I am an officer of the Nottinghamshire Police serving in the rank of Superintendent.
2. This witness statement is made to assist the Nottingham Inquiry (the "**Inquiry**") with the matters set out in the Rule 9 Request dated 30th July 2025 (the "**Request**").

Background

3. I have been asked to set out my background, experience and position within Nottinghamshire Police.
4. I joined Nottinghamshire Police in 2004.
5. I served as a Constable engaged in frontline policing in the south of Nottingham until 2009 when I was promoted to the rank of Sergeant.

6. As a Sergeant I worked in Response, Neighbourhood Policing and on a Street Offences team dealing with a variety of front-line policing duties.
7. In 2012 I was selected for the national High Potential Development Scheme, with the National Policing Improvement Agency (precursor to the College of Policing), and commenced a master's degree in Police Leadership and Management at the University of Warwick.
8. In 2013 I was promoted to Inspector performing the role of Neighbourhood Policing Inspector in the south of Nottingham.
9. In 2015 I was promoted to Chief Inspector and between 2015 and 2023 I performed numerous roles as a Chief Inspector including, Response, Neighbourhood Policing and Operational Support. I also had secondments to both Corporate Development and HR to support several strategic projects.
10. Between 2020 and 2023 I was the Chief Inspector for Operational Support and was in charge of multiple specialist teams including Armed Policing, Firearms Training, Emergency and Operational Planning, Dog section, Roads Policing, Road Crime, Tactical Support Group and Serious Collision Investigation.
11. During my time as a Chief Inspector, I also undertook national accreditation as a Bronze and Silver Public Order Commander. Since 2016 I have also been a nationally accredited Cadre Tactical Firearms Commander (CTFC).
12. In 2023 I was promoted to Superintendent and appointed as the head of Contact Management. The Contact Management department incorporates several business areas including:

- Police Control Room – emergency and non-emergency calls, online crime and incident reporting, radio dispatch, incident management, command and control of the most significant and serious incidents.
 - Remote Investigations – telephone-based investigation, online crime recording, managed investigations, crime audit and crime recording.
 - Vulnerability Hub – missing persons, mental health, hate crime.
 - First Contact – police station front counters and switchboard.
 - Future Delivery – recruitment, training, performance, business systems.
13. As head of department, I directly line manage a senior leadership team of eight Chief Inspectors, and one police staff equivalent, who oversee all the business areas outlined above.
14. Five of the Chief Inspector team I manage undertake a role of Force Incident Manager (FIM), based in the force control room, which means they are the designated senior officer in charge of operational policing across Nottinghamshire.
15. The FIM role provides 24/7 senior command and oversight of the most serious incidents taking place at any given time and tactical command of any firearms deployments or police pursuits.
16. The FIM role requires officers to become qualified in both firearms and pursuit command. The FIM is supported by two Sergeants and two police staff managers. The Sergeants are also required to become qualified in firearms and pursuit command. Minimum staffing is one FIM, one Sergeant and one manager.

17. In addition to the core responsibilities of my role, I have also acted as senior corporate witness for Nottinghamshire Police in support of three coronial inquests since 2023, including one which related to the tragic death of a colleague, Sergeant Graham Saville.
18. I have been asked to provide the sequence and timing of events on 13 June 2023 prior to Valdo Calocane's arrest.
19. Firstly, I will set out when Nottinghamshire Police was called, by who, and what was said. I have not included any calls received by other emergency services as I do not have access to this information.

Call handling systems Nottinghamshire Police

20. To provide a detailed overview of all calls received prior to Valdo Calocane's arrest I have worked closely with colleagues who have been tasked with securing and disclosing material relevant to the Inquiry.
21. During these enquiries, it has been established that the audio recording is available for some but not all the calls that we received on 13 June 2023.
22. To better understand the reasons for this I met with colleagues with technical expertise from both Contact Management and Information Services (IS).
23. I asked for IS experts to explain to me how 999 calls are received by Nottinghamshire Police, how they are recorded, how these recordings can be retrieved, and to explain why some recordings appear to be missing.
24. I identified that the IS colleagues best able to explain the above were our Network Communications Lead, our Digital Support Centre Manager and one of our Problem Engineers.

25. These colleagues explained to me that incoming 999 telephone calls are presented into the control room SAAB SAFE system via BT. SAFE is our command-and-control system, provided by SAAB. The calls are firstly passed to the Skype for Business (SFB) servers which then pass the calls onto the SAAB SAFE unified communications platform (UCP) servers for automatic distribution to the Police Emergency Call Handlers (PECH) in the Force Control Room (FCR).
26. They went on to explain that the calls are received in the control room through SFB and the SAAB UCP servers. SAAB provides an Application Programming Interface (API) that captures the information and integrates with the NICE system. The NICE system monitors for data and begins recording the call when it detects a data packet called an Invite.
27. They explained that these voice calls traverse the network using Session Initiation Protocol (SIP) voice and Realtime Transport Protocol (RTP) audio streams. All telephone calls received and made by the control room are replicated into the NICE recording servers using an Encapsulated Remote Switch Port Analyzer (ERSPAN) session and are stored there along with associated metadata (date, time, calling number, receiving number, call duration), which is provided by the SAAB SAFE API.
28. When an incident is created within the SAFE system, a Computer-Aided Dispatch (CAD) file is automatically generated. This file contains structured data and metadata that support the identification and retrieval of related call recordings. Key elements typically include:
- Date and time of the call
 - Caller's phone number
 - Contact Record Number (CRN)
 - Transcript or summary of the call
 - Dispatch actions and unit assignments

All information is logged in real time by Control Room staff.

29. They explained that during the timeframe relevant to this incident (June 2023) there were multiple instances where the NICE telephony recording system failed to record calls. This didn't affect all calls and was intermittent. I asked them to provide a detailed explanation of this issue.
30. Prior to 17 September 2023, audio calls were not ingested into the NICE Investigate system. Until that date, only incident-related data, such as Call Handler notes and transcriptions were transferred into NICE Investigate.
31. Call recordings themselves were accessed exclusively through the NICE Inform system, and any calls made before 17 September 2023 were not available within NICE Investigate. This was not due to a fault; rather, it was an intentional design choice, as audio ingestion had not yet been activated.
32. Before NICE Investigate began ingesting audio recordings, access to call recordings was managed through a tape request process. These requests were submitted to the Control Room, where an authorised staff member with access to SAFE would retrieve the relevant call details and search for the recording within NICE Inform. Once located, the recording details were provided to the requestor.
33. If the Control Room staff member was unable to locate the recording, the request was escalated to Information Services via the IS portal for further investigation. Information Services would then search NICE Inform, typically using the caller's phone number to identify the recording.
34. If the call had been successfully recorded, it would appear in the NICE Inform search results. However, if there was no call information in the SAAB CAD file and no recording available, it was likely that the call had not been recorded.

35. To confirm this, Information Services would review NICE Inform for calls occurring approximately one hour before and after the reported time, allowing for any potential time discrepancies. They would listen to the first 5–10 seconds of each incoming call to determine its relevance to the case.
36. If no matching call was found, unfortunately, no further action could be taken, as there would be no data available to recover when a call had not been recorded.
37. Throughout 2023, Information Services, in partnership with Contact Management, SAAB, and NICE, carried out multiple investigations into performance issues affecting the NICE Inform system and its ability to reliably record calls.
38. Despite implementing several recommendations, including client upgrades and system fixes, the improvements proved to be temporary. Reports of audio calls failing to record continued to emerge, and these intermittent issues persisted over an extended period, including during the critical incident on 13 June 2023.
39. Subsequent investigations identified underlying network hardware faults, specifically switches that were dropping data packets. This packet loss disrupted RTP (Real-Time Protocol) traffic, which is essential for transmitting voice data during calls.
40. In some cases, the dropped packets resulted in the SIP invite message, an essential component of the call setup process, failing to reach the recording system. This message acts as a trigger, instructing the system to begin recording. Without it, the recording process does not initiate, even though other call data continues to flow through the network.
41. The issue was intermittent and did not affect all calls, making it particularly difficult to detect and diagnose. Although calls were successfully placed

and received, the absence of the SIP invite meant that NICE Inform was unable to identify and record certain calls as expected.

42. To improve performance, the number of network hops the SPAN session transversed before reaching the hypervisor was reduced to a single 10Gb fibre connection between a core switch and the hypervisor.
43. The type of connection used was changed from ERSPAN to SPAN as this is more reliable. Following this change, packet degradation ceased, and all SIP INVITE messages were successfully received. These changes were not implemented until October 2024 under change reference CHG2327.
44. As a result of the above issue some calls during the relevant timeframe, including some calls relating to this incident, were not recorded.
45. In relation to the incidents relating to Valdo Calocane on 13 June 2023, our records show there were twelve calls to police from the public. Unfortunately, there is no audio recording for six of these calls. As such the audio of these calls is not available for me to review. I will present each of the calls below in chronological order and make clear what is known about those where no audio recording is available. I can confirm that the calls detailed below are a comprehensive list of calls made to the police in connection with the attacks on 13 June 2023.

Sequence and timing of events on 13 June 2023 prior to Valdo Calocane's arrest

46. Following the tragic events of 13 June 2023 a murder investigation was conducted by the Major Crime Unit (MCU) of the East Midlands Special Operations Unit (EMSOU).
47. Material collected by the MCU has been made available to assist me in providing an overview of the sequence and timing of events prior to Valdo

Calocane's arrest. For the remainder of this statement, I will refer to Valdo Calocane as VC.

48. The below overview deliberately does not include every single aspect of the Sequence of Events (SOE) prepared by MCU. It includes what I consider to be the most significant events to provide an overview of the sequence and timing of key events prior to the arrest of VC. I now refer to the Sequence of Events document as URN: NGPF0004340.
49. At 2328hrs on 12 June 2023 CCTV at Nottingham Train Station captures VC arrive on a train from London St Pancras Station (URN: NGPF0004340).
50. At 0006hrs on 13 June 2023 CCTV at Nottingham Train Station captures VC board a tram from the Tram Bridge at Nottingham Train Station (URN: NGPF0004340). All subsequent timings relate to the date of 13 June 2023.
51. At 0023hrs CCTV from inside the tram captures VC disembark a tram at Wilkinson Street and walk in the direction of Radford Road (URN: NGPF0004340).
52. At 0117hrs CCTV captures VC on Zulu Road heading towards Chard Street (URN: NGPF0004340).
53. At 0123hrs CCTV captures VC on Chard Street heading towards and into a playground area (URN: NGPF0004340).
54. At 0129hrs CCTV captures VC emerge from the playground area and make his way onto Nottingham Road (URN: NGPF0004340).
55. At 0133hrs CCTV from Sainsbury's captures VC use a cash machine at Sainsburys supermarket on Nottingham Road, NG5 1HH (URN: NGPF0004340). Bank enquiries confirm a withdrawal on VC's card at this time and location.

56. At 0134hrs CCTV captures VC walking back onto Nottingham Road (URN NGPF0004340). At 0137hrs CCTV captures VC walking along Nottingham Road towards Rosetta Road (URN: NGPF0004340). There is no further sighting of VC until 0219hrs.
57. At 0219hrs CCTV captures VC walking along Radford Road towards Gregory Boulevard (URN: NGPF0004340).
58. At 0240hrs CCTV captures VC walking along Alfreton Road towards Churchfield Lane (URN: NGPF0004340).
59. At 0243hrs CCTV captures VC walking along Churchfield Lane towards Hartley Road (URN: NGPF0004340).
60. At 0250hrs witness statements provided to MCU indicate that Grace O'Malley-Kumar and Barnaby Webber leave the PRYZM nightclub with friends and enter the Food Factory takeaway. They remain at the Food Factory until 0310hrs when Grace and Barnaby leave and begin to walk to Barnaby's house together.
61. At 0310hrs CCTV captures VC walking along Lismore Close towards Cleveland Close. VC is then seen on Ilkeston Road making his way towards Middleton Street. At 0311hrs VC turns left onto Middleton Street from Ilkeston Road (URN: NGPF0004340).
62. At 0314hrs CCTV captures VC exit Middleton Street and travel back towards the pathway between Ilkeston Road and Cleveland Close. Between 0315hrs and 0329hrs VC remains within the vicinity of the pathway between Ilkeston Road and Cleveland Close (URN: NGPF0004340).
63. At 0329hrs VC steps onto Ilkeston Road and crosses the junction with Middleton Street before going out of CCTV view (URN: NGPF0004340).

64. At 0349hrs CCTV captures Grace and Barnaby walking west along Ilkeston Road. They are again captured on CCTV at 0359hrs continuing in the same direction. They are then seen on CCTV at 0400hrs passing the junction with Middleton Street, and entering the area MCU evidence indicates was occupied by VC (URN: NGPF0004340).
65. At 0400hrs dashcam footage from a vehicle parked outside 312 Ilkeston Road, and CCTV from 314 Ilkeston Road, captures footage of the attack on Barnaby and Grace (URN: NGPF0004340).
66. At 0402hrs the same dashcam footage shows VC walk to where his rucksack is located, on the pavement in front of the drive of 310 Ilkeston Road, and then make his way from here towards the Radford area (URN: NGPF0004340).
67. With support from an analyst a short slide presentation has been prepared which shows the movements of the victims and VC from the time the victims leave the Pryzm nightclub until the time of the attack. I now refer to this presentation as URN: NGPF0010082.
68. At 0403hrs Nottinghamshire Police receive the first 999 call relating to this incident. I now refer to as URN: NGPF0002220.
69. In presenting the sequence and timing of events, it is important to note that some events are happening concurrently and as such there is overlapping activity occurring at the same time.
70. It is also important to note that at the time a 999 call is received by Police all the information imparted by that caller is not known, recorded and disseminated instantaneously.
71. As such the time of the call being received should be considered as only that. The information relayed by that caller, to the Police Emergency Call

Handler (PECH), will take several seconds and minutes for the Call Handler to process, clarify and record onto a contact record or incident log. During these same seconds and minutes events elsewhere continue to develop.

72. While preparing this sequence of events it is clear to me that at the same time information from the 999 callers is being recorded, the suspect is still moving, police Dispatchers are reviewing the incidents whilst further information is still being added, and officers are moving and speaking on the radio all at the same time.
73. As further calls and incidents are received the timeline becomes increasingly complex and care should be taken to consider events and activities which were occurring at the same time.
74. It is also important to note that the time at which information was added to an incident log does not necessarily reflect the time this was seen or read by a Dispatcher, Control Room Supervisor, or indeed the time it was verbally relayed to officers by radio.
75. It is also important to note that in the fast paced and dynamic response to an emergency incident, Dispatchers will relay what they assess to be the most important information required by responding officers. They do not robotically relay every detail within the incident log verbatim.
76. As such it is important to note that there are likely to be, and are expected to be, some differences between what a 999 caller might say to a police Call Handler, what the Call Handler may understand and choose to record on an incident log, what a Dispatcher may read and understand by the detail of the incident log, and what may be relayed to responding officers over the police radio.

77. To provide a comprehensive response to the Inquiry I, with the support of some Detective Constables' and Intelligence Analysts,' have reviewed several sources of material, including those listed below:
- Audio recordings and other information from 999 calls
 - Contact records created from those calls
 - Incident logs created from those calls
 - Airwave (police radio) transmissions
 - Statements from attending officers
 - Body Worn Video (BWV) from attending officers
 - Vehicle telematics data
 - Material provided by the Major Crime Unit (MCU)
78. As already stated, this statement has deliberately not included every single piece of information contained within the above sources. It contains the key information which I have assessed to be directly relevant to the information I have been asked to provide.
79. Set out below is a composite sequence of events which describes when Nottinghamshire Police were called, by who, and what was said. It also includes the key messages, reports or briefings relayed to officers. As well as all steps taken by police to find, pursue and arrest VC.
80. At 0403hrs Nottinghamshire Police received a 999 call from a local resident GRO-B. I now refer to as URN: NGPF0002220. I have listened to the audio recording of this call and can see that incident log 0066_13062023 was created at 0405hrs as a result of this call. I now refer to this incident log as URN: NGPF0007958.
81. I have reviewed the incident log and can see that at 0407hrs an update has been added directing that information from the caller needs to be added to the existing incident log 0065, which had just been created following a second 999 call at 0404hrs.

82. This is normal practice and what I would expect. Populating a single master incident log with information from multiple callers assists the Dispatcher and others assimilate and act on information from multiple callers as quickly as possible. Incident 0066 is closed within a few minutes of creation and pertinent information from this caller is added to the existing log for incident 0065.
83. I have listened to the audio of this call which lasts 3 minutes and 43 seconds. The call starts with the caller saying they saw something, but they are not sure how bad it is. They state they saw someone rob someone and doesn't know if they have been stabbed. The caller states they have filmed a video of the incident and there are two people down in the road. She then states there is one person lying in the road right now.
84. The call handler asks if this has just happened. It appears English is not the first language for the caller who is clearly trying their best to describe the location and what has happened. The caller describes the location as being in Lenton near Raleigh Park.
85. The caller again states she does not know if they have been stabbed. A girl and a guy. The caller states she doesn't know if they been robbed or something. The caller states they heard them scream and looked out of the window and then saw something. The caller reiterates that there are two people lying down there.
86. The caller is asked for a description of the person who has made off. The caller states there was a guy and girl not too old. The caller states they are not sure if they are ok and asks if police can come because they are lying down on the road.
87. The call handler asks again if there was another person involved who has now gone away. The caller confirms the other person has now gone away.

The call handler asks if they can provide any description of that person, and the caller states he was wearing a hoody, and she couldn't see any more. The caller states he just walked off.

88. The call handler asks which way the person has gone, and the caller states he has gone the way you would walk to the city centre. The caller states this person has now gone and they cannot see him. The caller again states there is still a person lying in the road.
89. The call handler reassures the caller we are getting somebody to the area and asks the caller for their address information, which the caller provides.
90. The call handler confirms that the caller has CCTV footage of the incident, and the caller states they filmed the incident on their mobile phone. The caller states she is watching from her window but is too afraid to go out.
91. The call handler then confirms the caller's contact information and reassures them that officers are on the way and will make contact. The call then ends.
92. At 0404hrs Nottinghamshire Police received the second 999 call from a local resident **GRO-B**. I now refer to this call as URN: NGPF0002218. Incident 0065_13062023 was created at 0404hrs because of the call from **GRO-B**. I now refer to this incident log as URN: NGPF0007971. Although this was actually the second 999 call we received, the calls were taking place at the same time and incident 0065 was created first. This became the primary incident log.
93. I have listened to the audio of this call which lasts approximately 7 minutes. **GRO-B** reports that he thinks there has been a stabbing on Ilkeston Road. There is someone lying in the street and he thinks they are dead.

94. The caller is asked to clarify where on Ilkeston Road and describes the location as being near Mario's pizza shop.
95. The caller is asked if the offender is still on scene and reports that he has ran off up Ilkeston Road. He describes the offender as a black man, with a black bag and dressed all in black. He states he has just gone up Ilkeston Road towards town.
96. The caller is asked where the victim is. He states one victim is lying in the middle of the road. The call handler clarifies that the caller believes they are dead. The caller states that he thinks he is.
97. The caller is asked if he can see the injuries to the victim. He states he has blood all over his chest. The caller sounds distressed as he is answering the questions from the call handler. He states he heard lots of screaming and looked out of his window.
98. The caller is asked again where the offender is now. The caller states again that he ran off up Ilkeston Road. He states he can't see him as he is lying in bed.
99. The caller is asked if he is on the street and clarifies he is in bed and looked out of his window. The caller states again that he thinks the male is dead because he hasn't moved a muscle.
100. The call handler confirms that the offender was a black male. The caller confirmed he was. The call handler asks what the offender was wearing. The caller states he was all in black with a black bag.
101. The caller is asked if he saw the weapon. He states not exactly, it was a knife. He is asked how big the knife was. He states he doesn't know as he is 500 metres away.

102. The call handler asks the caller to confirm that the victim is not moving. The caller confirms that is correct.
103. The call handler asks the caller to describe exactly where the victim is. The caller states the victim is in the middle of the road as you come down Ilkeston Road towards Wollaton.
104. The caller is asked to describe the victim. He states he appears in his 20's. The caller then states he thinks he can see someone else on the phone, who he assumes is also calling the police.
105. The caller is asked if it is just one victim. He states there were two victims and there was a female on the other side of the road. The call handler asks where the female has gone. The caller states she was sat in the driveway of one of the eco-houses opposite but then got up and walked off down the road bleeding from the stomach.
106. The call handler clarifies that the female was bleeding as well. The caller confirms she was, and that the male had stabbed both of them.
107. The caller is asked if he can describe the female victim. The caller says not really, but then states she appeared in her 20's and was screaming her head off. The call handler asks if the female was white. The caller states she was. The call handler asks what the female was wearing. The caller says he doesn't know. The caller is asked which way she has gone. He states she went down towards Wollaton.
108. The caller then states that he can see that the police are there. The call handler confirms the direction of the female was down Ilkeston Road towards Wollaton. He confirms that is correct. The call handler confirms the female has been stabbed in the stomach, but the caller cannot describe what she was wearing. The caller becomes tearful and confirms he cannot describe her clothing.

109. The caller is asked to confirm which property he is calling from. The caller provides his name and address.
110. The caller is asked if he has any CCTV of the incident. He states he hasn't but the shop he lives above may have some. He goes on to say he thinks some other properties around the area may also have CCTV.
111. The caller is asked to confirm if he saw the full incident. The caller states he did not see the full incident. He just saw the stabbing.
112. The caller is asked to describe exactly what he did see. The caller states he saw a black male plunge a knife into a girl. He states that was from a distance and he just saw somebody plunging and then the aftermath of somebody holding themselves and red. The caller uses the word plunging but from the context it is used I believe he may have meant lunging.
113. The caller states this was from some distance, but it just looked like a stabbing. The call handler clarifies that the caller saw the male stab the female. The caller states he saw him stab the male and the female.
114. The call handler reassures the caller that we have officers on scene and are also arranging an ambulance.
115. The call handler confirms the caller is happy to be contacted again about the incident. He confirms that he is and the call ends.
116. With support from an analyst a short slide presentation has been prepared which shows the movements of VC from the time of the Ilkeston Road attack until the time of the Magdala Road attack. This shows that despite both of these callers saying the suspect went towards the city centre he has in fact gone in a different direction. These slides are presented as the exhibit listed below. I now refer to this presentation as URN: NGPF0010084.

117. The call from GRO-B is received at 0404hrs. At the same time incident 0065_13062023 is created as a Grade 1 – Immediate incident. This incident grading means it is an emergency incident.
118. In Nottinghamshire Police incidents are graded in line with our Incident Grading and Resolution Policy – PD8580. I now refer to this document as URN: NGPF0007972 and will discuss it in more detail later in this statement.
119. In relation to this 999 call, it was correctly graded as a Grade 1 – Immediate incident, which means it is an immediate emergency call for service. An extract from the Grading and Resolution Policy – PD8580 (URN: NGPF0007972) is shown below and describes the criteria for an emergency incident.

“EMERGENCY

Immediate Emergency calls for service (Grade 1)

An emergency call for service will be happening there and then and likely to be a risk of:

- Danger to Life
- Use, or immediate threat of violence
- Serious injury to a person
- Serious loss of, or damage to property
- Is otherwise assessed as requiring such a response (i.e., offender disturbed at the scene)

When an emergency contact is received, the Call Handler should provide an *estimated* time of arrival alongside appropriate safeguarding advice.

We will attend emergencies as quickly and as safely as possible, the aspiration is within 15 minutes for urban areas and 20 minutes in rural areas, reflecting the greater distance to be travelled.”

120. We aim to attend all emergency incidents as quickly as possible and within a target time of 15 minutes in urban areas and 20 minutes in rural areas.

The location of this incident is urban and would therefore have a 15-minute target response time.

121. Nottinghamshire Police radios use a system called Airwave, which is used across all police forces in England and Wales. In the course of preparing this statement I have listened to the Airwave recordings relating to the police radio transmissions during the relevant time period.
122. Due to the size and geography of the Nottinghamshire force area the county is divided into six geographic talk groups (radio channels). There is an additional talk group for specialist resources, such as firearms officers, police dogs and drone, making seven talk groups in total.
123. It is also possible to open additional talk groups for specific operations. This is common in relation to events (such as football games) or firearms operations (both spontaneous and pre-planned).
124. In collating the below timeline to show the sequence and timing of events, I have overlayed some updates from the incident logs, airwave recordings, 999 calls, MCU Sequence of Events, officers' statements and telematics data. The difference in timings between some of the audio transmissions and when that information is then added to the incident log, underline the point that timings relating to the same piece of information may be different, as might the time when people become aware of that information.
125. At 0404hrs Airwave recordings from Talkgroup 1199 (TG1199) show Operational Support (OS) officers being informed of the stabbing incident on Ilkeston Road. Multiple officers are dispatched to that location including a mixture of firearms officers and dog handlers. This included the firearms Sergeant OFZ4 - PS 755 Hallam and PC 3912 Graham, the Operational Firearms Commander (OFC) OF41 - PC 1978 Goddard and PC 35 Speeden, Dog Handlers OD41 - PC 1721 Whysall and OD42 - PC 3809 Marshall and the Drone Officer UA01 - PC 3390 McAuley. Further

information about these officers is provided below as they arrive at the incident. The Force Incident Manager (FIM) Chief Inspector Dave Mather can also be heard to state Taser is authorised as a contingency. (URN: NGPF0004714 - Recording reference 20230613_030456000000_677000003_3029_1).

126. At 0405hrs CCTV (later recovered by MCU) captures VC exit Rifle Street, cross Denman Street West and travel along Croydon Street towards Hartley Road (URN: NGPF0004340).
127. At 0405hrs Incident 0065 is updated to show OS officers have been dispatched. At the same time an update is added from the FIM to show Taser has been authorised.
128. The call handler is still on the line to the caller GRO-B and is adding further details as officers are already travelling to the scene. At 0405hrs an update is added to the incident log which gives the offender location as Ilkeston Road and a description as a black male, wearing all black with a black bag.
129. At 0405hrs officers are dispatched on the Airwave Talkgroup for the local area (TG7) and are asked to attend reports of a stabbing on Ilkeston Road. Multiple officers immediately respond and volunteer to attend. This includes multiple response units RU443 – PC 4057 Clarke and PC 1203 Brady-Johnson, RR440 – PC 808 Skenderaj and PC 2179 Bird, CR414 – PC 3993 Hunt and PC 1790 Watson, CR412 – PC 3185 Smedley, SR442 – PC 3821 Reynolds, RR431- PC 2157 Knowles and PC 870 Widdowson and the Response Sergeant RRZ4 – PS 3891 Elliott. Further information about these officers is provided below as they arrive at the incident. (URN: NGPF0005086 - Recording reference 20230613_030533000000_677000003_3008_1_1).
130. At 0405hrs a call is made from the police control room to the East Midlands Ambulance Service (EMAS) control room to inform them we are

responding to a stabbing incident and request ambulance assistance. I now refer to this call as URN: NGPF0001772.

131. At 0405hrs Nottinghamshire Police also received a 999 call from a taxi driver GRO-B. I can see that contact record CR0122_13062023 was created at the point this call was received but this is one of the calls where the audio was not recorded. I now refer to this as URN: NGPF0007940.

132. I can see from the contact record that the 999 call was received at 0405hrs on 13 June 2023. The caller's contact number, name and address are listed within the contact record as is the incident location, which is documented as 259 Ilkeston Road, Nottingham, NG7 3FX.

133. The text within the contact record summary is shown below:

"BEFORE MANOR VILLAGE STUDENT ACCOMODATION- JUST SEEN A WHITE MALE LAID IN THE MIDDLE OF THE ROAD BLEEDING FROM HIS LEGS- NFD- DIDNT SEE ANYONE ELSE IN THE AREA- CALLER IS A TAXI DRIVER AND HAD JUST DROPPED A FARE OFF NEARBY- IF WE NEED TO RECONTACT HIM PLEASE USE MOBILE ENDING 969- LINKED TO INCIDENT 0065"

134. It is clear from the contact log summary that the PECH has identified the call is linked to incident 0065 and within the incident log for 0065 I have found the below update added at 0417hrs. I note this is 12 minutes after the call was received:

"13/06/2023 04:17:28 MY CALLER ON CR0122 IS A TAXI DRIVER WHO HAD DROPPED A FARE OFF NEARBY AND SAW A WHITE MALE LAID IN THE MIDDLE OF THE ROAD BLEEDING FROM HIS LEGS- DIDNT SEE ANYONE ELSE IN THE AREA- CR LINKED IN 2001809"

135. At 0406hrs a description is given to officers, on the Operational Support talkgroup (TG1199), that the offender is a black male, wearing all black with black bag. (URN: NGPF0004719 - Recording reference 20230613_030604000000_677000003_3029_1).

136. At 0406hrs (TG1199) a direction of travel for the suspect is given as towards the city centre. (URN: NGPF0004721 - Recording reference 20230613_030636000000_677000003_3029_1).

137. At 0407hrs the control room Sergeant adds some initial directions for attending officers to incident log 0065 as below:

"13/06/2023 04:07:36 %%FIS - This is a report of a stabbing.

- *Officers to attend and activate BWV*
- *Obtain an account from the victim*
- *Secure accounts from witnesses*
- *Early CCTV enquiries to be conducted*
- *Search to be conducted for any weapon*
- *Locate and secure a scene if necessary*
- *Early obs for potential offenders considering cross contamination"*

138. At 0407hrs incident 0065 is updated with the information about the female victim, including description of victim, her injuries and direction of travel:

"13/06/2023 04:07:57 %% CALLER STATES THERE WAS A FEMALE ON THE OTHER SIDE OF THE ROAD WHEN IT HAPPENED, SHE SAT IN THE DRIVEWAY AT ONE OF THE ECO HOUSES AND THEN WANDERED OFF - SHE IS BLEEDING FROM THE STOMACH AS SHE WAS STABBED TOO 3002948"

"13/06/2023 04:08:46 FEMALE WAS WHITE, APPROX 20'S - WENT DOWN TOWARDS WOLLATON – 3002948"

139. At 0407hrs (TG7) officers are updated with further information from the first caller who believes someone may have been robbed. The information given over the radio to officers is that there is a male and female victim. One on floor and one walking off. The offender is described as possibly wearing a hoody and walking towards city centre.
(URN: NGPF0005089 - Recording Reference 0230613_030706000000_677000003_3008_1_1).
140. At 0407hrs Nottinghamshire Police also received a 999 from a local resident [GRO-B] I can see that contact record CR0123_13062023 was created at the point this call was received but this is one of the calls where the audio was not recorded (URN: NGPF0007584).
141. I can see from the contact record that the 999 call was received at 0407hrs on 13 June 2023. The caller's contact number, name and address are listed within the contact record as is the incident location, which is documented as Ilkeston Road, Nottingham, NG7.
142. The text within the contact record summary is shown below.
- "Call from [GRO-B] reporting hearing some screaming - he looked outside to see a guy lay in the road officers arrived with the male during the call didnt witness what happened."*
143. It is clear from the contact log summary that the PECH has identified the call is linked to incident 0065 and within the incident log for 0065 I have found the below update added at 0412hrs.
- "13/06/2023 04:12:54 Call from [GRO-B] reporting hearing some screaming - he looked outside to see a guy lay in the road officers arrived with the male during the call didn't witness what happened. 3005123"*
144. At 0407hrs Nottinghamshire Police received a 999 from an unknown male. I can see that contact record CR0124_13062023 was created at the point

this call was received but this is one of the calls where the audio was not recorded. I refer to this as URN: NGPF0007585. The caller's name and address are not listed within the contact record, but the number is shown as **GRO-B**. The location address is shown as 292 ILKESTON ROAD, NOTTINGHAM, NOTTINGHAM CITY, NG7 3FX (unverified address).

145. The text within the contact record summary is shown below. Due to the lack of information, it does not appear any further action was taken as a result of this call.

GRO-B MALE CALLER REQ POLICE AND CLEARED 3G 96% E 455183 N 340115 PLAYBACK HEARD - A LITTLE BIT OF A CONVERSATION HEARD IN A FOREIGN LANGUAGE. GAZZED TO SAME INCIDENT THATS LOGGED 0065_13062023 AND 0066_13062023"

146. At 0407hrs (TG7) SR442 – PC 3821 Reynolds offers to head towards the incident location from the city to see if they can see anyone matching the suspect description. The officer clarifies the offender description and is told all they have got is they were wearing a hoody. PC 3821 Reynolds is shown on the system as having been dispatched at 0408hrs. (URN: NGPF0005090 - Recording reference 20230613_030744000000_677000003_3008_1_1).

147. I note that the description given to this officer, that we only know it is someone wearing a hoody, contains minimal information and does not reflect all the detail that was added to the log at 0405hrs.

148. PC 3821 Reynolds (SR442) was driving police vehicle FJ23 AEX at the time of this incident. Telematics data for that vehicle shows it was active in the areas of Ilkeston Road, Lenton Boulevard, Derby Road and Alfretton Road in the period after the attack as the officer conducted an area search

for the suspect. I exhibit a map showing the search activity of PC 3821 Reynolds as URN: NGPF0008785 – Page 2.

149. It is worth noting that I believe this specific area of the city is the most densely populated area of Nottinghamshire. Most of the area is made up of long rows of terraced properties with densely packed side streets and many alleyways, yards and stairwells. A significant number of these terraced properties have also been converted into flats and Houses of Multiple Occupation (HMO) with multiple entrances and fire escapes. This makes thorough searching extremely challenging and resource intensive.
150. At 0407hrs (TG1199) the FIM reminds all ARV officers to use their BWV. Dog handler PC 3809 Marshall shouts up to ask if there is any known direction of travel for the suspect and is told not as yet. (URN: NGPF0004722 - Recording reference 20230613_030743000000_677000003_3029_1).
151. I note that the information given by the control room, that we didn't yet have a direction of travel for the suspect, does not reflect all of the detail that was added to the log at 0405 and 0406hrs, which did describe the offender location as Ilkeston Road towards the city centre.
152. At 0408hrs RR434 - PC 3921 De'Ath and PC 207 Jackson arrive as the first officers on scene. They are immediately engaged in first aid for the male victim and block the carriageway in front of the victim to protect him from traffic. Their primary role at the scene is providing first aid to the male victim and PC 207 Jackson ultimately travels with the male victim to the Queens Medical Centre Hospital (QMC).
153. At 0408hrs incident log 0065 shows the first officers arrive at the scene. This arrival time is corroborated by dashcam footage later recovered by MCU. This is only five minutes from the time of the first 999 call at 0403hrs. I exhibit a table showing resource attendance and initial actions as URN: NGPF0007943.

154. At 0408hrs (TG7) officers are updated by dispatch that a female has been stabbed in stomach as well. Officers on scene update the control room that the male is severely injured and going to need a lot of EMAS. (URN: NGPF0005092 - Recording reference 20230613_030831000000_677000003_3008_1_1).
155. At 0408hrs (TG1199) the Operational Firearms Commander (OFC) PC 35 Speeden (OF41) asks if armed authority is being considered to search for the offender. The FIM Chief Inspector Mather states the priority is the victims initially as they have now had reports of a second victim, a female on the other side of the road. (URN: NGPF0004724 - Recording Reference 20230613_030827000000_677000003_3029_1).
156. At 0408hrs (TG1199) dog handler PC 1721 Whysall updates the control room that he is also travelling to the area. (URN: NGPF0004725 - Recording Reference 20230613_030854000000_677000003_3029_10).
157. At 0408hrs a 999 call is received from an off-duty officer who reports being woken up by the sound of a woman screaming. I now refer to this as URN: NGPF0002222. I have listened to the audio recording of this call and can see that incident log 0069_13062023 was created at 0409hrs as a result of this call. I now refer to this incident log as URN: NGPF0007945.
158. The audio recording of this call lasts for 3 minutes and 50 seconds and starts with the caller informing the call handler they are an off-duty officer. The officer then describes being woken up at home by the sound a woman screaming "get the fuck off me" over and over again for the last few minutes. The caller states they cannot see where it is coming from, but it is somewhere in the region of Derby Road.
159. The call handler asks whereabouts on Derby Road and the caller describes it as coming from just up the hill from the Cathedral and states he is at GRO-B. The call handler says they think there might be an

incident in that area but then suggests she is mistaken and can only find an incident from another day. The caller states he wouldn't be surprised if someone else has called it in.

160. The call handler then describes using the Cathedral as a point of reference for the incident and the caller then gives the postcode as **GRO-B**. The caller is asked if he can hear anything else. He states it is mostly a female voice screaming quite loudly and occasionally a male voice.
161. The call handler asks for the caller's information and his name and collar number are provided as **GRO-B**. The call handler clarifies that he cannot provide a more precise location because the sound is echoing around the buildings.
162. The caller states he can still hear it in the background. The caller then says he just heard another round of "fuck off, fuck off." The caller suggests that if someone comes to the pedestrian crossing just up the hill from the Cathedral, they should be able to hear it. The call handler then confirms that someone is coming out and the call is ended.
163. At 0408hrs the local Sergeant PS 3891 Elliott (RRZ44) arrives at Ilkeston Road, in company with PC 870 Widdowson and PC 2157 Knowles (RR431). On their arrival PS 3891 Elliott is initially engaged in first aid with the male victim and conducts a top to toe survey. The Sergeant promptly asks for support from firearms colleagues with first aid due to the level of injury. The Sergeant is later also involved in first aid with the female victim and some CCTV enquiries at the scene.
164. PC 870 Widdowson assists with first aid on the male victim and then ultimately ends up travelling with the male victim to the Queens Medical Centre (QMC).
165. PC 2157 Knowles is also initial assisting with first aid on the male victim, before then also supporting first aid with the female victim and is involved

in chest compressions whilst waiting for the ambulance. PC 2157 Knowles also provides some direction to other officers to search for more victims and is also involved in cordoning off part of the scene near a walkway leading to Auckland Close. PC 2157 Knowles ultimately travels to the QMC with the female victim.

166. At 0408hrs PC 808 Skenderaj and PC 2179 Bird (RR440) arrive at Ilkeston Road. They are both initially engaged in supporting first aid for the male victim. PC 808 Skenderaj is then instructed by the Sergeant to get details of witnesses and then finds the female victim. They are then engaged in delivering first aid to the female victim and later also involved in the entry to 316 Ilkeston Road to confirm it contained no other victims. Later in the incident PC 808 Skenderaj also supports with some house-to-house enquiries and scene guarding. PC 2179 Bird is actively engaged in life saving attempts for the male victim. He retrieves the first aid kit, is involved in CPR and also locates the victim's wallet in the scene.
167. At 0409hrs (TG7) officers update that the male's GRO-D GRO-D he has multiple stab wounds, three into his chest. Officers ask for a CAT1 response from EMAS. A CAT1 response is an emergency response and the fastest possible attendance from Ambulance. (URN: NGPF0005094- Recording reference 20230613_030905000000_677000003_3008_1_1).
168. At 0409hrs (TG7) PS Elliott updates the control room she has arrived on scene and asks for firearms officer support with first aid. It is common for response officers to seek assistance from armed policing officers when dealing with serious injuries. Their first aid training is to a significantly higher level than response officers and they have some enhanced lifesaving capability due to their additional training and equipment. (URN: NGPF0005096- Recording reference 20230613_030956000000_677000003_3008_1_1).

169. In terms of the ARV enhanced first aid training, every ARV officer receives 12 hours of first aid training each year. This is a mixture of theory, practical and scenario training based on the role they undertake and the types of incidents they are attending. They also undertake a pass / fail assessment each year individually. This is all in addition to the Public and Personal Safety Training (PPST), which they also attend, with every other officer, and includes a 3-hour first aid input.

170. ARV officer first aid training covers all of the below areas, which are over and above the training curriculum that normal police officers receive.

- Deliver enhanced casualty and scene management
- Airway management using additional adjuncts and suction
- Provide advanced management of chest injuries
- Administer oxygen in accordance with local guidelines
- Demonstrate the provision of additional airway skills
- Managing a casualty with a head injury
- Demonstrate how to manage a suspected pelvic injury
- Manage medical emergencies.
- Manage environmental medical conditions
- Use carrying techniques to save life in high-risk environments
- Explain how to identify and manage a hydraulic injection injury
- Manage a dog bite
- Manage a casualty with pain.

171. At 0409hrs incident 0065 is updated with information from the first caller GRO-B suggesting a potential robbery and stabbing with two victims. Offender described as wearing a hoodie and having gone towards city centre.

"13/06/2023 04:09:28 CALLER REPORTS SOMEONE BEEN ROBBED, POSS BEEN STABBED. ONE PERSON LAY ON THE FLOOR AND ANOTHER WALKING OFF. HEARD A SCREAM AND SAW A FEMALE AND MALE LAY DOWN. OFFENDER WEARING A HOODIE. WENT TOWARDS THE CITY CENTRE. CALLER HAS VIDEO OF THE INC ON

HER MOBILE - SHE IS AT [GRO-B] DETAILS FROM DUP INC 66 2002745”.

172. At 0409hrs updates are added to the incident log 0065 to reflect the updates from officers about the level of injury, the ETA for EMAS as 1 minute and that the Sergeant had been tasked to attend the scene.

“13/06/2023 04:09:38 3921 - MALES [GRO-D]
[GRO-D] COUNTING 3 STAB WOUNDS DEEP INTO CHEST, POSS INTO LUNG 3003008”

“13/06/2023 04:09:48 FIS - EMAS informed, their ref 16918476 - 1 min ETA 3010029”

“13/06/2023 04:09:53 %%FIS - LOCAL SGT TO TRAVEL 3004159”

“13/06/2023 04:09:54 %%CAN WE GET QUITE A FEW EMAS CREW TRAVELLING PLEASE 3003008”

173. At 0410hrs (TG1199) the firearms sergeant PS 755 Hallam and PC 3912 Graham (OFZ4) arrive at scene. As they arrive it quickly becomes apparent the female victim has been found, and the officers separate to provide support to their colleagues. PC 3912 Graham is engaged in providing first aid on the male victim. PS 755 Hallam provides first aid to the female victim and is engaged in CPR until the ambulance arrives. PS 755 Hallam later finds the female victim’s driving license and phone within the scene and provides these details to the control room. PS 755 Hallam also later views Ring doorbell CCTV footage from 314 Ilkeston Road and provides a description of the offender to the control room. (URN: NGPF0004729 - Recording reference 20230613_031021000000_677000003_3029_1).

174. At 0410hrs incident 0065 is updated to show that the Response Policing Inspector (RPI), Inspector Pete Shaw has been informed of the incident. The firearms officers have arrived at the scene, and that the female victim has now also been located with stab wounds.

“13/06/2023 04:10:39 DMI ALSO AWARE 3003008”

"13/06/2023 04:10:41 Firearms_At scene 3002001"

"13/06/2023 04:10:55 RR440 FEMALE STABBED AS WELL 3003008"

175. At 0410hrs incident 0069 (Derby Road, Cathedral area) is updated to show that the original caller, **GRO-B**, can still hear the female shouting:

"13/06/2023 04:10:41 female still shouting fuck off fuck off 3003446"

176. At 0410hrs a further 999 call is received from a local resident called **GRO-B** in the same area as the last call from the off-duty officer. I now refer to this as URN: NGPF0002224. I have listened to the audio recording of this call and can see that contact record CR0126_13062023 was created as a result of this call. I now refer to this as URN: NGPF0007947. Detail from this caller was then added to the existing incident log 0069_13062023 at 0413hrs and is shown at that time below.

177. This call audio recording lasts for 2 minutes and 36 seconds and starts with the caller reporting that he can hear a woman screaming and crying and telling someone to fuck off. The caller states it has been going on for at least five minutes. The call handler asks where this is happening. The caller states it sounds like it is coming from the tunnel that leads to The Park near the Park Gate apartments. The call handler asks if that is near the church. The caller confirms that it is. The call handler mentions that we have received some other calls about it. The caller is asked if he can see anybody. The caller states he can't see it from where his apartment is, but he can hear it pretty well.

178. The caller is asked for his name and address which he provides as **GRO-B** **GRO-B**. The caller is asked where the sound is coming from in relation to his property. The caller states it is down and to the right close to the entrance to the tunnel, but he can't actually see anything. The call handler reassures the caller that we have officers travelling to the area.

The caller states he can hear them. A siren is heard in the background.
The call ends.

179. At 0411hrs (TG7) officers update that the female victim at Ilkeston Road has been found and is not moving. She has three stab wounds, one to the abdomen. (URN: NGPF0005100 - Recording reference 20230613_031105000000_677000003_3008_1_1).

180. At 0411hrs incident 0065 is updated that a female has been stabbed as well and has three stab wounds to the abdomen and is not moving or breathing.

"13/06/2023 04:11:22 808 - FEMALE STBBED AS WELL STAB WOUNDS TO THE ABDOMEN - 3 STAB WOUNDS 3003008"

"13/06/2023 04:11:30 808 - FEMALE NOT MOVING 3003008"

"13/06/2023 04:12:18 OFZ4 - FEMALE NOT BREATHING 3002001"

181. At 0411hrs an update is added to incident 0069 (Derby Road) that the first caller (off-duty officer) describes the location of the female shouting as near the pedestrian crossing.

"13/06/2023 04:11:10 nr the pedestrian crossing he thinks just up the hill you will be able to hear it 3003446"

182. At 0411hrs (TG7) the control room attempt to contact PS 3891 Elliott by radio and are updated by another officer that the Sergeant cannot respond as they are involved in chest compressions on the female, and they are awaiting another ambulance. The control room update that EMAS have given a one-minute ETA. Recording references:

20230613_031229000000_677000003_3008_1_1)

183. At 0411hrs PC 4057 Clarke and PC 1208 Brady-Johnson (RU443) arrive at the Ilkeston Road scene. PC 4057 Clarke initially speaks to witnesses at the scene before being instructed by the Sergeant to conduct house-to-house enquiries at accommodation opposite. PC 4057 Clarke is later engaged in scene guarding activity.
184. PC 1208 Brady-Johnson is initially engaged in CCTV enquiries and reviews some footage at the scene. They then speak to the caller GRO-B GRO-B to confirm the description of the suspect. This officer is then engaged in house-to-house enquiries and further CCTV checks at the scene, including trying to copy images from CCTV at 314 Ilkeston Road.
185. At 0411hrs (TG1199) the firearms OFC PC 35 Speeden (OF41), shouts up to say that he understands the priority is victims, but he is concerned about the offender with unknown whereabouts, and it is unknown if there are going to be any future potential victims or if the offender might return to the scene. The Dispatcher updates that Oscar1 (FIM) was listening to him. PC 35 Speeden then updates they are arriving at scene and ambulance had also arrived. (URN: NGPF0004732 - Recording reference 20230613_031129000000_677000003_3029_1).
186. At 0412hrs firearms officers PC 35 Speeden and PC 1978 Goddard (OF41) arrive at the Ilkeston Road scene. As soon as they arrive PS 755 Hallam is shouting for their assistance with chest seals for the female victim. PC 35 Speeden and PC 1978 Goddard grab their enhanced first kit from their car and run to assist. (URN: NGPF0004732).
187. As PS 755 Hallam (OFZ4) works with the paramedic and other officers to continue CPR and stop the bleeding, PC 1978 Goddard is preparing chest seals whilst PC 35 Speeden is preparing the defibrillator and oxygen tank. Officers continue to provide first aid support under the direction of the

paramedic. After a short time more EMAS staff arrive, and officers remain present actively supporting as instructed. Numerous officers are involved in lifting the female victim from the narrow entrance way onto the street and then into the ambulance. An officer then travels with the victim in the ambulance to QMC.

188. At 0412hrs incident 0065 is updated that CPR has commenced on the female victim and still waiting for another ambulance:

"13/06/2023 04:12:39 2157 - COMPRESSIONS ON THE FEMALE WAITING ON ANOTHER AMBULANCE 3003008"

189. At 0412hrs incident 0065 is updated with details of a further caller who heard screaming and saw the victim in the road but did not witness the attack. This relates to the call we received at 0407hrs and is already described above.

*"13/06/2023 04:12:54 Call from **GRO-B** reporting hearing some screaming - he looked outside to see a guy lay in the road officers arrived with the male during the call didn't witness what happened. 3005123".*

190. At 0412hrs PC 3993 Hunt and PC 1790 Watson (CR414) arrive on scene. They are both involved in entry and search of 316 Ilkeston Road to confirm there were no further victims inside after the female victim had been found outside of the premises. Both officers enter 316 Ilkeston Road via the rear. After the search PC 1790 Watson remains at the property as it was now insecure. PC 3993 Hunt later travelled to the QMC to assist PC 2157 Knowles and obtained details from EMAS staff in attendance.

191. At 0412hrs PC 3185 Smedley and PC 958 Cooper (CR412) arrive on scene having conducted a search for the suspect on route to the incident. They were in police vehicle FJ18 HBE and I can see from the telematics data they drove from the area of the QMC up Derby Road to the Canning

Circus area and approached the scene from the very top of Ilkeston Road, as was the direction of travel provided for the suspect (URN: NGPF0008785 – Page 3).

192. PC 958 Cooper is engaged in securing the police cordon and then takes up scene management duties at the junction of Dawes Way and Ilkeston Road. PC 3185 Smedley is one of the officers who enters 316 Ilkeston Road to check for further victims. This officer is then engaged in house-to-house enquiries during which he identifies dashcam footage at 312 Ilkeston Road. He is also involved in assisting the female victim into the ambulance before then being engaged in scene preservation duties.
193. At 0412hrs (TG7) PC 4057 Clarke and PC 1208 Brady-Johnson (RU443) pass a further description of the suspect over the radio. This is given as a black male about 6ft 2, wearing all dark clothing, something grey on his back. He was described as holding a knife and running away. This is from exhibit SBJ/2 - Phone Footage, recorded by witness GRO-B. I now refer to PC 1208 Brady-Johnson's statement as URN: NGPF0010085. This is also reflected in radio channel conversations. (URN: NGPF0005104 - Recording ref: 20230613_031237000000_677000003_3008_1_1).
194. At 0413hrs (TG7) the control room confirm PC 3821 Reynolds (SR442) heard the updated suspect description. PC 3821 Reynolds confirms he did and is engaged in an area search for the suspect. (URN: NGPF0005105 - Recording reference 20230613_031314000000_677000003_3008_1_1).
195. At 0413hrs incident 0065 is updated with the further description and confirmation SR442 is doing an area search:
- "13/06/2023 04:13:12 1208 - FURTHER DESC - F602, DARK CLOTHING, GOT SOMTHING ON HIS BAACL, HOLDING A KNIFE AND RUNNING AWAY 3003008"*
- "13/06/2023 04:13:23 SR442 - DOING AN AREA SEARCH 3003008"*

196. At 0413hrs (TG7) officers are dispatched to incident 0069 (Derby Road, Cathedral area). (URN: NGPF0005107 - Recording reference 20230613_031343000000_677000003_3008_1_1).
197. At 0413hrs (TG1199) the dog handlers PC 1721 Whysall (OD41) and PC 3809 Marshall (OD42) arrive in the area. PC 1721 Whysall confirms the suspect headed up Ilkeston Road and states he will commence an area search. The control room provide the description as a black male, all in black, wearing a black hoody and carrying a black bag. (URN: NGPF0004734 - Recording reference 20230613_031341000000_677000003_3029_1).
198. PC 1721 Jonathan Whysall (OD41) commences an extensive area search for the suspect. PC 1721 Whysall was driving police vehicle ML68 KGV. I have reviewed the telematics data for this vehicle which shows he conducted searches in the areas of Derby Road, Ilkeston Road and Lenton Boulevard, including many of the side streets between them. He was also involved in searching in the Cathedral and Park areas. He later also searched the area of Hopedale Close, Bramcote Street and Hartley Road. (URN: NGPF0008785 – Page 4).
199. PC 3809 Marshall attends the scene to gather more information about the direction of the suspect. When subsequent enquiries identified the suspect might have gone towards the Hopedale Close area PC 3809 Marshall updated the control room, and other officers, before searching the area himself with his dog. PC 3809 Marshall used his police dog to try to pick up a scent track from Hopedale Close, but the dog didn't pick up a track. PC 3809 Marshall then conducted a thorough search of that immediate area on foot before conducting a wider search of the area in his vehicle.
200. At 0413hrs CCTV (later recovered by MCU) captures VC on Player Street towards Brook Court and Alferton Road. He is then out of view until 0421hrs (URN: NGPF0004340).

201. At 0413hrs incident log 0069 is updated with information from the second caller (GRO-B) stating they can hear the sound of a female screaming in the area of the tunnel near to Park Gate (URN: NGPF0007947).

“13/06/2023 04:13:01 Further call from witness linked in, can just hear a female screaming. Coming from near the tunnel near to Park gate. Cannot see anyone.”

202. At 0413hrs incident 0065 is updated by CCTV control they are reviewing footage to see if anything captured and are also searching for the suspect. CCTV control refers to the CCTV control room in Nottingham which is managed by Nottingham City Council and works closely with Nottinghamshire Police in responding to incidents in the city area.

“13/06/2023 04:14:54 CCTV - INCIDENT OCCURRED BTWN TWO CAMERA'S UNABLE TO SEE THE SCENE, THEY WILL DO A PLAYBACK TO SEE IF ANYTHING CAPTURED AND WILL SEARCH FOR SUSPECT 3002001”.

203. At 0413hrs WR420 - PC 1639 Strong and PC 4219 Hayes arrive at the Ilkeston Road scene. On arrival they observe both victims are receiving first aid from officers already on scene, so they provide support in gaining access to the garden and then property of 316 Ilkeston Road. They are both involved in the search of that premises. PC 1639 Strong is then directed by PS 3891 Elliott to conduct house- to- house enquiries and check for any CCTV. PC 4219 Hayes is instructed by PS 3891 Elliott to establish a cordon and start scene preservation at a pathway on the right-hand side of 316 Ilkeston Road.

204. At 0413hrs CU413 - PC 371 Uppal and PC 4118 Everett arrive at Ilkeston Road. They establish a cordon in the area to protect the scene. PC 371 Uppal commences scene guarding at the junction of Ilkeston Road and Middleton Street. PC 4118 Everett commenced scene guarding at the end

of Ilkeston Road closing the road close to Faraday Road, St Peters Street and Wollaton Road.

205. At 0413hrs Inspector Peter Shaw arrives at the Ilkeston Road scene to oversee and coordinate activity.
206. At 0414hrs incident 0069 is updated to show officers are dispatched to conduct an area search in Cathedral / Park tunnel following two calls of a woman screaming at a male in the area.

"13/06/2023 04:14:06 CR410 0768383 13/06/2023 04:14:06 Dispatched 0768383"

207. At 0414hrs CR410 - PC 1683 Abid and PC 281 Nunley are informed of incident 0069. They are already in the area so are shown as arriving at the same time and commence a search around Derby Road and the streets surrounding the Cathedral and The Park tunnel.
208. At 04:25 hrs and again at 05:02 hrs PC 1683 Abid and PC 281 Nunley (CR410) phoned the off-duty officer who called in incident 0069 to see if he could offer any further information. At 05:09 hours they added an update to the log stating:

"ENTERED PARK GATE AND CONVANT CAR PARK AND SEARCHED THE CAR PARK – NO TRACE. ENTERED THE TUNNEL IN THE PARK AND SEARCHED STAIRWELLS, THROUGH THE TUNNEL AND BUSHES TOWARDS THE END – NO TRACE. THE ABOVE WAS DONE BY FOOT SEARCH." At 05:12 hrs a further update went on to confirm a search of *"COLLEGE STREET – DRIVE DOWN –NEGATIVE; UPPER COLLEGE STREET – DRIVE DOWN – NEGATIVE; ROPEWALK – DRIVE DOWN – NEGATIVE; DRIVE WAS DONE PREVIOUSLY ON DERBY ROAD – NEGATIVE"*. At 05:23 hrs they added update *"PARK TERRACE – DRIVE DOWN – NO TRACE"*

209. At 05:29 hrs added they add a further update:
- “CARPARKS OF ROPEWALK; NUMBER 11 CARPARK – SEARCH OF LARGE CARPARK – NO TRACE; FISCAL ENGINEERS CAR PARK – DRIVE THROUGH – NO TRACE; COTTAGE TERRACE – DRIVE DOWN – NEGATIVE; THE COACH HOUSE – NEGATIVE”.*
210. During the search they did speak to a female pedestrian who was safe and well and did not report hearing any screaming. Having not found anything suspicious PC 1683 Abid and PC 281 Nunley (CR410) resumed back to conducting an area search for the Ilkeston Road suspect in the streets closer to that incident location.
211. At 0415hrs (TG7) PC 4057 Clarke and PC 1208 Brady-Johnson (RU443) is asked by dispatch if there is any further description of the knife from the person they are speaking to. They state the video is from very far away and whilst you can make out someone stabbing some people but you cannot make out any knife or any description. (URN: NGPF0005112 - Recording reference 20230613_031509000000_677000003_3008_1_1).
212. At 0415hrs incident 0065 is updated that the witness PC 1208 Brady-Johnson is with has a video but does not assist with description.
- “13/06/2023 04:15:23 WITNESS RU443 SPEAKING TO COULD NOT GIVE A DESC - THEY HAVE A VIDEO BUT IT IS FROM TOO FAR AWAY”*
213. At 0415hrs (TG7) SR435 – PC 2477 Knight and PC 3943 Spibey are asked by the control room to confirm if they are now double crewed. Then told, *“nothing for you at present.”* (URN: NGPF0005113 - Recording reference 20230613_031538000000_677000003_3008_1_1).
214. At 0415hrs (TG1199) the FIM shouts up the OFC PC 35 Speeden asking for a sit rep on OS resources. They are told to standby as officers are still

doing D13 (first aid). (URN: NGPF0004738 - Recording reference 20230613_031604000000_677000003_3029_1).

215. At 0415hrs (TG1199) OD43 – PC 2400 Crabtree arrives in the area and asks where the suspect was last seen heading towards. They are updated it was towards the city so assuming Ilkeston Road towards Canning Circus. (URN: NGPF0004736 - Recording references 20230613_031534000000_677000003_3029_1; URN: NGPF0004737 – Recording reference 20230613_031549000000_677000003_3029_1).
216. At 0415hrs dog handler PC 2400 Nicola Crabtree (OD43) commences an extensive area search for the suspect. PC 2400 Crabtree is driving police vehicle SV68 BZT. I have reviewed the telematics for that vehicle which show PC 2400 Crabtree conducted an area search in the areas of Ilkeston Road, Derby Road including the Cathedral area, and then in the area around Hopedale Close and Bramcote Street. (URN: NGPF0008785 – Page 5).
217. At 0416hrs (TG1199) PC 3809 Marshall updates the FIM that the ARV Sgt and OFC are both busy with first aid on the female with another ARV officer assisting with first aid on the male victim. They also update that outside 314-316 Ilkeston Road there is a lot of blood, and a mobile covered in blood still in situ. (URN: NGPF0004739 - Recording reference 20230613_031627000000_677000003_3029_1).
218. At 0417hrs incident 0065 is updated with information from PC 3809 Marshall about the blood at the scene. Information is also added about the taxi driver caller, which we know came in at 0405hrs.

“13/06/2023 04:17:10 O/S 316 314 - SCENE WITH A LOT OF BLOOD ^ OD42 3002001”

“13/06/2023 04:17:28 MY CALLER ON CR0122 IS A TAXI DRIVER WHO HAD DROPPED A FARE OFF NEARBY AND SAW A WHITE

MALE LAID IN THE MIDDLE OF THE ROAD BLEEDING FROM HIS LEGS- DIDNT SEE ANYONE ELSE IN THE AREA- CR LINKED IN 2001809“

219. At 0417hrs (TG7) officers ask the control room to conduct checks on 316 Ilkeston Road. (URN: NGPF0005116 - Recording reference 20230613_031733000000_677000003_3008_1_1).

220. At 0417hrs (TG119) the firearms Sergeant PS 755 Hallam and PC 3912 Graham updates that there are two injured persons. He confirms that the female victim has been found outside of 316 Ilkeston Road and officers are trying to gain entry to confirm no more injured persons are inside. (URN: NGPF0004740 - Recording reference 20230613_031753000000_677000003_3029_1).

221. At 0418hrs incident 0065 is updated with the location the female victim was found, Inspector Shaw's arrival at scene, that the on-call Detective Inspector has been briefed, and that checks are being conducted for number 316 Ilkeston Road:

“13/06/2023 04:17:29 2856 - 1 AMB HERE AT THE MINUTE 3003008”

“13/06/2023 04:18:01 808 - FEMALE WAS FOUND SLUMPED AGAINST 316 ILKESTON ROAD - CAN WE DO CHECKS ON THIS ADDRESS PLEASE 3003008”

“13/06/2023 04:18:48 %% FIM - RPI is at scene. Golden DI has been briefed by Sierra 2 3004783”

“13/06/2023 04:18:58 3912 - WILL CHECK 316 FOR FURTHER VICTIMS 3002001”

222. At 0418hrs the drone officer UA01- PC 3990 McAuley arrives in the area of Ilkeston Road to support with the search for the suspect. PC 3990 McAuley was driving police vehicle FJ69 CPO. I have reviewed the telematics for this vehicle and can see he initially conducted a search in the area of St Peters Street, Hartley Road, Bramcote Street and Croydon

Road. He is then also involved in further searching in the Derby Road area around the Cathedral and The Park estate. (URN NGPF0008785 – Page 6).

223. At 0419hrs (TG119) PS 755 Hallam confirms entry has been forced to 316 Ilkeston Road.

(URN: NGFP0004741 - Recording reference 20230613_031902000000_677000003_3029_1).

224. At 0419hrs incident 0065 is updated with checks conducted for 316 Ilkeston Road and that entry has been forced by officers to confirm if there are any further victims within:

GRO-C

“13/06/2023 04:19:14 ONLY 3 OCCURRENCES LINKED TO THIS ADDRESS ON NICHE LATEST BEING FROM 2018 - 3003008“

“13/06/2023 04:19:28 OF41 - ENTRY FORCED TO 316 3002001”

“13/06/2023 04:19:30 808 - SHE WAS FOUND AT THE BACK OF 316 3003008”

225. At 0419hrs (TG119) PC 3809 Marshall OD42 provides an updated description of the suspect over the radio, which he has obtained from members of public at the scene. He provides the description as a Black male, around 5ft9-10 tall, all in black, black hood up, fat build. He then describes how he put the knife into a man bag before leaving the scene and has gone up Ilkeston Road and believed left into the estate. (URN: NGPF0004742 - Recording reference 20230613_031931000000_677000003_3029_1).

226. At 0420hrs (TG1199) PC 1721 Whysall shouts up to confirm suspect build was described as fat. Build is confirmed by PC 3809 Marshall and

direction of travel given as *“possibly gone Hopedale Close, into that estate”*. (URN: NGPF0004743 -

Recording reference 20230613_032004000000_677000003_3029_1).

227. At 0420hrs (TG7) officers confirm 316 Ilkeston Road has been checked and is empty. Another officer then asks for a name check on details found within the wallet of the male victim. (URN: NGPF0005120 - Recording references 20230613_032007000000_677000003_3008_1_1 and URN: NGPF0005121 - Recording reference 20230613_032040000000_677000003_3008_1_1).

228. At 0420hrs (TG1199) the firearms Sergeant PS 755 Hallam (OFZ4) reports finding a pool of blood with a phone and ID ten metres from the female victim. Victim details are then passed. PS 755 Hallam and then updates that entry has been forced to 316 using a ripsaw but no persons within. (URN: NGPF0004744- Recording reference 20230613_032021000000_677000003_3029_1).

229. At 0421hrs incident 0065 is updated with name check details from the ID found in the male victim’s wallet:

“13/06/2023 04:21:17 2179 - WEBBER/BARNABY:11012004 - ADDRESS IN THORNTON 3003008”

“13/06/2023 04:21:27 BELOW NAME CHECK IS FROM WALLET FOUND ON MALE 3003008 “

“13/06/2023 04:21:31 NEG NICHE 3003008”

230. At 0421hrs CCTV (later recovered by MCU) captures VC appear from Brook Court and cross Alfreton Road on to Thurman Street towards Birkin Avenue. On Birkin Avenue VC initially walks toward the junction of Gregory Boulevard but then does an about-turn towards Holland Street heading towards Radford Road (URN: NGPF0004340).

231. At 0421hrs (TG1199) OF48- PC 3288 Yallop alerts officers on scene that a caller has footage of the offender and is going to make herself known to officers at the scene. PS 755 Hallam updates that both victims are having CPR now outside 314/316 Ilkeston Road. (URN: NGPF0004745 - Recording reference 20230613_032154000000_677000003_3029_1).
232. From approximately 0420hrs SR443 - PC 4150 Chapman and PC 3734 Jamieson also arrive in the area of Ilkeston Road and begin to support the area search for the suspect. They were driving police vehicle FJ23 AEP and I have reviewed the telematics data for that vehicle which shows they searched the areas of Ilkeston Road, Derby Road and Alfreton Road. (URN: NGPF0008785 – Page 7).
233. At 0422hrs Incident 0065 is updated that scene preservation had commenced. The updated description of suspect as given by PC 3809 Marshall on TG1199 at 0420hrs is also added to the log.
- “13/06/2023 04:22:01 371 - SCENE COMMENCED 0419HRS 3003008”*
- “13/06/2023 04:22:56 OD42 - SUSPECT F509-F510, BLACK MALE, FAT, ALL IN BLACK, HOOD UP , KNIFE PLACED INSIDE A MAN BAG ...TURNED LEFT POSS TWDS THE HOPEDALE ROAD AREA 3002001“*
234. At 0423hrs incident 0065 is updated that CPR is still being performed on both victims:
- “13/06/2023 04:23:10 OFZ4 - BOTH VICTS GOING THRO CPR 3002001”*
235. At 0423hrs (TG7) Inspector Shaw updates that a scene is being secured and cordon established. (URN: NGPF0005122 - Recording reference 20230613_032149000000_677000003_3008_1_1).
236. At 0423hrs incident 0065 is updated that a phone has been recovered from near a pool of blood close to the female victim which is believed to be hers. It contains some ID information for the victim:

"13/06/2023 04:24:38 OFZ4 --- 10m AWAY FROM THE FEMALE VICTIM NRA POOL OF BLOOD FOUND A PHONE WITH ID RELATING TO Grace OMALLEY-KUMAR 17/10/2003; [GRO-E] 3002001"

237. At 0424hrs (TG1199) the OFC PC 35 Speeden (OF41) asks to be caught up on developments and whether there has been any further progress on identifying the suspect. The control room confirms not. PC 3288 Yallop alerts PC 35 Speeden that someone at scene has footage of offender and should be making themselves known to officers. PC 35 Speeden states they will try to find them. I note that they were not updated with the description from PC 3809 Marshall (OD42) or the potential direction of travel toward Hopedale Close at this point. (URN: NGPF0004748 - Recording reference: 20230613_032406000000_677000003_3029_1 and URN NGPF0004749 20230613_032430000000_677000003_3029_1).

238. At 0425hrs incident 0065 is updated that the Golden (on call) Detective Inspector (DI) Pamela Dowson has been updated and is travelling to the scene. The update is also added that the scene has been established:

"13/06/2023 04:25:35 %% FIM - Golden DI 1157 Pam Dowson is travelling to the scene 3004783"

"13/06/2023 04:25:50 2856 - SCENE ON FROM ILKESTON ROAD AND ST PETERS STREET AND HOPEDALE CLOSE ONTO ILKESTON ROAD 3003008"

239. At 0425hrs CR410 - PC 1683 Abid and PC 281 Nunley resumed from incident 0069 and commenced a further area search for the suspect from Ilkeston Road. They searched the roads leading off Radford Boulevard and down towards Faraday Road where they stopped at the junction of Faraday Road to provide a scene log to another officer. They then continued conducting an area search for the suspect between the junction at Faraday Road and towards Hartley Road.

240. CR410 - PC 1683 Abid and PC 281 Nunley were driving police vehicle FJ19AFF. I have reviewed the telematics for this vehicle and can see that they conducted an area search within the Radford Area, predominately in relation to incident 0069. (URN: NGPF0008785 – Page 8).

241. At 0425hrs incident 0069 is updated that officers have spoken to the caller and searched all the surrounding streets of Derby Road, Park Entrance and Park Row but have not seen or heard anything of note:

“13/06/2023 04:25:58 CR410 Caller spoken to who could not confirm where the shouting was coming from. Area search conducted around Derby Road, around the Park Entrance near Park Row and nearby areas all the way down to Maid Marion Way. Nothing seen or heard 4000099”

242. At 0425hrs (TG1199) PC 3288 Yallop and PC 4550 Bower (OF48) arrive in the area. The OFC PC 35 Speeden tasks them with an area search for the offender and confirms last known direction of travel is up Ilkeston Road towards the city. PC 3288 Yallop confirms they are commencing an area search and will head towards Canning Circus area. I note this update from the OFC does not include the information from PC 3809 Marshall (OD42) that the possible direction of travel was toward Hopedale Close. (URN: NGPF0004751 - Recording reference 20230613_032623000000_677000003_3029_1).

243. PC 3288 Yallop and PC 4550 (OF48) Bower were using police vehicle MA72 YMW. I have reviewed the telematics data for the vehicle which shows they conducted an area search in the areas of Alfreton Road, Derby Road, Canning Circus area, The Park area and Lenton Boulevard, St Peters Street and Hartley Road. (URN: NGPF0008785 – Page 10).

244. At 0428hrs incident 0065 is updated that a camera has been identified outside of 310 Ilkeston Road:

“13/06/2023 04:28:03 OFZ4 - CAMERA O/S 310 3002001”

245. At 0428hrs (TG7) an officer requests a description of the offender. The description is given as, *“a black male, 5ft9 - 5ft 10, big build, all in black, hood up, carrying a man bag. Last seen heading towards Hopedale.”* (URN: NGPF0005129 - Recording references 20230613_032903000000_677000003_3008_1_1 and URN NGPF0005130 20230613_032917000000_677000003_3008_1_1).
246. At 0429hrs (TG7) PC 1208 Brady- Johnson (RU443) shouts up to say the suspect is not carrying a man bag and has a pair of grey shorts underneath his black trousers. The control room ask the officer to repeat, and they then say he was wearing grey joggers under black trousers and not carrying a man bag. (URN: NGPF0005131 - Recording reference 20230613_032928000000_677000003_3008_1_1).
247. At 0430hrs incident 0065 is updated with the further description of the suspect stating he was not carrying a man-bag and was actually wearing grey joggers. This appears different to the previous update he was dressed all in black and is not entirely consistent with the update from the officer which specified the grey joggers were underneath black trousers.
- “13/06/2023 04:30:19 1208 - SUSPECT BELIEVED TO NOT BE CARRYING A MAN BAG - GOT GREY JOGGERS ON 3003008”*
248. At 0430hrs incident 0065 is updated that Nottingham City Transport have been informed of the road closures due to anticipated disruption:
- “13/06/2023 04:30:28 nct informed of the closure and potential long- term nature of it. 0768383”*
249. At 0430hrs PC 3943 Spibey and PC 2477 Knight (SR435) arrive in the Ilkeston Road area. They were in police vehicle FJ18HFH and I can see from the telematics data they conducted an area search in the streets around Lenton Boulevard, St Peters Street, Hartley Road, Bramcote Street and Salisbury Street. (URN: NGPF0008785 – Page 9).

250. At 0430hrs CCTV (later recovered by MCU) captures VC emerge from an alleyway between Maple Street and the Forest Park & Ride tram stop. He crosses the tramline heading toward the Park & Ride car park (URN: NGFP0004340).
251. At 0432hrs there is a point to point (PTP) radio discussion between Chief Inspector David Mather (FIM) and Inspector Pete Shaw. The FIM updates Inspector Shaw that Detective Inspector Pamela Dowson is travelling to scene, and he is aware the Inspector is already on scene. The FIM asks the Inspector if any more staff are required. The Inspector confirms he currently doesn't need any more officers at the scene and the cordon is in place. He asks if someone can check mapping to confirm no access routes have been missed. The FIM confirms that will be done. (URN: NGPF0007311 - Recording reference 20230613_033240000000_677000004_1027_1).
252. Inspector Shaw then says: *"Aside from that I think we have got some cops looking for the suspect, if not many."* The FIM states the ARVs are out now that they have given first aid and there is one more ARV who is untainted who he will leave free. The FIM states he thinks the suspect will be long gone now so needs to concentrate on the scene and those two people. The Inspector states it is not looking very good at the minute. The FIM states he has already been briefed and has the EMSOU call-out sheet out and is getting ready to brief the on-call Superintendent. The Inspector acknowledges the update and confirms the scene is in place and staffed with officers, officers have been tasked with house- to- house, some witnesses have been identified, and that is as much as they are likely to get. The FIM acknowledges the update and asks the Inspector to call him if he needs anything.
253. At 0433hrs (TG1199) PC 35 Speeden (OF41) the Operational Firearms Commander (OFC), updates that they have spoken to PC 1208 Brady-Johnson who is looking at footage of the suspect and trying to get them

onto the incident. (URN: NGPF0004754 - Recording reference 20230613_033356000000_677000003_3029_1).

254. At 0434hrs incident 0065 is updated that 316 Ilkeston Road has been checked and is all clear:

"13/06/2023 04:34:30 316 ILKESTON RD LEFT INSECURE AT THE REAR , CHECKED ; ALL CLEAR 3002001"

255. At 0434hrs (TG1199) the Force Incident Sergeant (FIS), Sgt 2869 Gavin Berry asks if any OS officers are free to travel to the area of the Cathedral on Derby Road following a call from an off-duty officer woken by the sound of a woman shouting, "get off me". He notes this incident is not far from the Ilkeston Road incident. The FIS is the control room Sergeant who supports the FIM (Chief Inspector) in the control room. Unless otherwise stated all further references to FIS will refer to Sgt Berry.

(URN: NGPF0004755 - Recording reference 20230613_033454000000_677000003_3029_1 and I now exhibit the map showing proximity of Ilkeston Road to Incident 0069 location as URN: NGPF0010079).

256. At 0435hrs (TG1199) the FIS briefly cancels their request stating local officers have already been. He then changes his mind and asks officers to still travel to the area to support with an area search. (URN: NGPF0004756 - Recording references: 20230613_033519000000_677000003_3029_1 and URN: NGPF0004757 - 20230613_033531000000_677000003_3029_1).

257. At 0436hrs (TG1199) PS 755 Hallam (OFZ4) updates that CPR is still being done on female who is now in the ambulance and about to leave to QMC. The male is still being worked on in the street. (URN: NGPF0004760 - Recording reference 20230613_033637000000_677000003_3029_1).

258. At 0436hrs the MCU Sequence of Events records that the female victim is conveyed to QMC (URN: NGFP0004340).
259. At 0437hrs (TG1199) the FIS asks officers to confirm who is heading across to Derby Road to support with the search. OF48 PC 3288 Yallop and PC 4550 Bower and OD41 PC 1721 Whysall shout up that they are all going. PC 35 Speeden states they should be free from the scene shortly and then will also redeploy. (URN: NGPF0004762 - Recording reference 20230613_033753000000_677000003_3029_1).
260. At 0438hrs incident 0065 is updated with a message from the firearms Sergeant PS 755 Hallam that the female victim is being conveyed to QMC, and paramedics are still working on the male at the scene:
- "13/06/2023 04:38:21 OFZ4 - FEMALE VIC ----> QMC (WITH AN OFFICER)...M VIC REMAINS STILL WORKING ON HIM RE - CPR , MAY OPEN HIS CHEST."*
261. At 0438hrs CCTV (later recovered by MCU) captures VC walking along Gregory Boulevard towards Mansfield Road (URN: NGPF0004340).
262. At 0439hrs (TG1199) PS 755 Hallam (OFZ4) updates that he is watching Ring doorbell footage from 314 Ilkeston Road. He goes on to describe that the footage shows a single male attacker, dressed all in black with their hood up. He then says, "doesn't look fat to me." He then describes it as a frenzied attack on the female and states the attacker seemed to be targeting the female more than the male. (URN: NGPF0004763 - Recording reference 20230613_033933000000_677000003_3029_1).
263. At 0440hrs (TG1199) PS 755 Hallam asks if any update on checks of female ID details. He is told all negative apart from driving licence and not shown on any other databases. I interpret this to mean there is no trace of the female on PNC or Niche. He then asks the control room for contact to be made with university as the victims are possibly students. (URN:

NGPF0004765 - Recording reference
20230613_034006000000_677000003_3029_1).

264. At 0440hrs (TG1199) the drone unit arrives in area of Cathedral for the area search. (URN: NGPF0004767 - Recording reference 20230613_034058000000_677000003_3029_1).
265. At 0440hrs MCU Sequence of Events records that female victim arrives at QMC (URN: NGPF0004340).
266. At 0441hrs (TG7) an officer updates that 314 Ilkeston Road has CCTV of the incident and officers are trying to paste images of the offender onto the log. (URN: NGPF0005136 - Recording references 20230613_034134000000_677000003_3008_1_1 and URN: NGPF0005137 20230613_034148000000_677000003_3008_1_1)
267. At 0441hrs incident 0065 is updated with the description from PS 755 Hallam (OFZ4) who had viewed the ring doorbell footage:
- “3002001 13/06/2023 04:41:51 OFZ4 - VIEWED RING DOOR-BELL FOOTAGE FROM 314 --MALE SEEN ALL IN BLACK , DOESNT APPEAR FAT, CARRIED OUT AN ATTACK ON THE FEMALE. 3002001”*
268. I note this is now the fourth description of the suspect and all are slightly different. The first caller said the suspect was wearing a hoody and went towards the city centre. The second caller stated he was all in black and headed towards city centre. The update from PC 3809 Marshall (OD42) described him as all in black but described his build as fat, placing the knife in a man bag before possibly heading towards Hopedale Close. PC 1208 Bradey- Johnson (RU443) then updated to say the male had grey shorts under black trousers, then clarified grey joggers under black trousers, and that he did not have a man bag. PS 755 Hallam then stated the male did not appear to be fat but was all in black.

269. At 0441hrs incident 0069 is updated by the FIS that a more thorough search is required due to the proximity of these calls and incident 0065. Further officers are tasked to support, and the drone is authorised:

"13/06/2023 04:41:06 %%FIS - THIS INCIDENT HAS OCCURRED NEAR TO 0065_13062023. A MORE THOROUGH SEARCH IS REQUIRED TO TRY AND IDENTIFY THE FEMALE AND CONFIRM/NEGATE ANY OFFENCES. 3004159"

"13/06/2023 04:41:35 %%FIS - DRONE AUTH TO ASSIST WITH THE SEARCH 3004159"

270. At 0442hrs there is a point to point (PTP) radio discussion between the FIS and PC 1683 Abid who initially attended the Derby Road job. He informs the officers that he has deployed multiple armed officers, a dog handler and the drone to do a more thorough search due to its proximity to the Ilkeston Road incident. (URN: NGPF0007312
Recording reference 20230613_034206000000_677000004_1017_1).

271. The FIS asks PC 1683 Abid to confirm the area they have already searched. The officer states that they went up Derby Road and turned left towards The Park entrance, then left again towards Maid Marion Way and then did an area search around that general area.

272. The FIS asks PC Abid to confirm if they got out on foot or it was just a mobile search from their vehicle. The officer confirms it was a mobile search. The FIS confirms the officers are not committed on another incident and then directs them to return to the area and liaise with the OS officers to coordinate a search. He states although the incidents are not confirmed as being linked it is too close for comfort, and it may be some additional searching on foot and checking of alleyways is required. The FIS reiterates the additional resources already deployed to assist and the importance of confirming there are no further victims in the area.

273. At 0442hrs incident 0065 is updated that 314 Ilkeston Road has CCTV of the incident and the officer there is in process of pasting images to log:
- "13/06/2023 04:42:08 1208 - CONFIRM 314 ILKESTON ROAD DOES HAVE CCTV COVERAGE OF THE INCIDENT CURRENTLY IN THE PROCESS OF COPYING AND PASTING IMAGES OF THE OFFENDER ONTO THE LOG 3003008".*
274. At 0443hrs incident 0065 is updated with the request from OFZ4 PS 755 Hallam for checks to be conducted with the universities:
- "13/06/2023 04:43:56 OFZ4 - VICTIMS MAYBE STUDENTS, PLS CONTACT THE UNIVERSITIES – 3002001"*
275. At 0447hrs (TG7) the control room update officers on this Talkgroup there is a technical issue with airwave and asks that any regular Talkgroup 6 officers hold off with their updates, unless it relates to a grade 1, until further notice. (URN: NGPF0005140 - Recording reference 20230613_034743000000_677000003_3008_1_1).
276. At 0448hrs the MCU Sequence of Events records that the male victim is lifted into an ambulance and transferred to QMC (URN: NGPF0004340).
277. At 0448hrs PC 1683 Abid and PC 281 Nunley (CR410) are back in the area of incident 0069 to conduct a more thorough area search. They liaise with OS units who were also travelling to the area and conduct a search of the Park tunnel on foot including bushes, the car park of Parkgate, The Ropewalk and a number of surrounding car parks.
278. At 0448hrs (TG1199) PC 3288 Yallop (OF48) asks if Real Time Intelligence Unit (RTIU) could check social media to see if victims are in a relationship. (URN: NGPF0004768- Recording reference 20230613_034816000000_677000003_3029_1).
279. At 0448hrs (TG7) an officer updates the control room that they have just been updated that the female is now 1/1. One oblique one (1/1) is the

police radio code for deceased. (URN: NGPF0005141 - Recording reference 20230613_034901000000_677000003_3008_1_1).

280. At 0448hrs (TG7) PC 1208 Brady-Johnson (RU443) states she could not paste the suspect images to the log so they have been sent to force.control mailbox. (URN: NGPF0005142 - Recording reference 20230613_034935000000_677000003_3008_1_1).

281. At 0449hrs incident 0065 is updated that the RTIU were requested to check social media to see if the victims are in a relationship. The incident is also updated that the female has been confirmed as 1/1:

"13/06/2023 04:49:15 of48 - CAN RTIU DO SEARCHES ON SOCIAL MEDIA ETC TO SEE IF THEY ARE IN A RELATIONSHIP 3001175"

"13/06/2023 04:49:27 3891 - FEMALE IS 1/1 3003008"

282. At 0450hrs incident 0065 is updated to say that an image of the suspect has been attached to the log:

"13/06/2023 04:50:51 IMAGE ATTACHED TO THE LOG 3003008"

283. At 0450hrs there is a point- to- point (PTP) radio discussion between the FIS and WRZ44 - PS 3872 Barnett from the neighbouring TG5 area (Broxtowe / Beeston), after Sergeant Barnett asked if any further officers are needed to assist with the search. The FIS says yes if there are officers free, but he doesn't want anyone else going down to the Ilkeston Road scene in case they are needed later and need to avoid cross-contamination issues. I interpret this comment to relate to the potential risk of cross contamination of forensic evidence. If for example an officer involved in first aid with the victims is later also involved in the arrest of the suspect it introduces the potential for transference of forensic evidence (such as blood) via the officer. This may compromise the evidential integrity of any blood found on the suspects person or clothing. The sergeant, PS Berry, is referencing that he is considering this potential issue and seeks to mitigate this risk through the use of different resources.

(URN: NGPF0007314 - Recording reference 20230613_035046000000_677000004_1017_1).

284. The FIS expresses his concern that this job (0069 – Derby Road), is too close to not do a more thorough search. He describes that the local officers had a drive around in a vehicle and were going to close the job but we now have what appears to be a double murder less than a mile away. Sergeant Barnett explains that he felt the two jobs could be linked and volunteers to attend with six of his officers. The FIS states it doesn't need everyone, and we need to retain some officers for other jobs and other demand which hasn't stopped. The FIS suggests Sergeant Barnett and another unit will probably be sufficient.
285. The FIS asks Sergeant Barnett to be a bit more intrusive with the off-duty officer who has called in and see if we can get any more info on direction of where the female was screaming. He also asks him to coordinate a more thorough search out on foot and checking alleyways. Sergeant Barnett states he will attend with a couple of his units and asks if anyone has personally spoken to the off-duty officer yet. The FIS states he is not sure but gives the call sign of the officers who had originally attended.
286. At 0451hrs (TG1199) PC 35 Speeden (OF41) shouts up to say, *"for the information of all ARVs the suspect image is now on the incident log"*. (URN: NGPF0004769 - Recording reference 20230613_035114000000_677000003_3029_1).
287. At 0452hrs the MCU Sequence of Events shows that the male victim arrives at QMC (URN: NGPF0004340).
288. At 0453hrs incident 0065 has an update from RTIU to confirm the image of the suspect is not clear enough for a facial recognition search:

"13/06/2023 04:53:50 RTI NOTED IMAGES OF THE SUSPECT ON THE LOG - UNFORTUNATELY NOT CLEAR ENOUGH FOR A FACIAL RECOGNITION SEARCH ON PND 3002593"

289. At 0453hrs the incident log for 0069 shows PC 3288 Yallop and PC 4550 Bower (OF48) arrive in the area to assist with the more thorough area search. (URN: NGPF0008785 – Page 10).

290. At 0453hrs incident 0069 is updated to show PC 1683 Abid and PC 281 Nunley (CR410) are commencing an area search and clarified that the drone was attending:

"13/06/2023 04:53:28 1683 - commencing a more detailed search - confirm drone is attending please 0768383"

291. At 0454hrs incident 0069 is updated to show that Sergeant Barnett is attending with two other units to assist with the search. This includes WR434 PC 509 Luxton and PC 4152 Hope as well as WU442 PC 4401 Kenna and PC 4422 Read:

"13/06/2023 04:54:37 WRZ44 - Myself WR434/WU442 will be attending to assist with the search 3002616"

(URN: NGPF0008785 – Page 12 - Map showing area search conducted by (WR434) PC 509 Phillippa Luxton and PC 4152 Gareth Hope.

(URN: NGPF0008785 – Page 11 - Map showing area search conducted by (WU442) PC 4401 Claire Kenna and PC 4422 Charlotte Read .

292. At 0454hrs (TG1199) the drone officer PC 3990 McAuley (UA01) confirms he is already in the area and is doing an area search of all the side streets around the church. OF48 PC 3288 Yallop and PC 4550 Bower confirm they are also in that area and have done a lot of the side roads around the area and The Park but nothing so far. PC 1721 Whysall says likewise. (URN: NGPF0004773 - Recording reference 20230613_035427000000_677000003_3029_1).

293. At 0455hrs (TG1199) the FIS can be heard asking officers to liaise with drone and local officers to coordinate a search based on information from the off-duty officer. (URN: NGPF0004775 - Recording reference 20230613_035538000000_677000003_3029_1).
294. At 0455hrs incident 0069 is updated with the initial search information from the drone officer and ARV officers:
- "13/06/2023 04:55:11 UA01 - DOING SEARCH IN AREA AROUND THE CHURCH 3001175"*
- "13/06/2023 04:55:25 OF48 NOTHING OBVIOUS IMMEDIATE VICINTIY 3001175"*
295. At 0459hrs incident 0065 is updated by the FIM that the Duty Superintendent has been briefed:
- "13/06/2023 04:59:47 %% FIM - PACE Supt Lou Clarke briefed 3004783"*
296. At 0501hrs CCTV (later recovered by MCU) from the exterior of Seely Hirst House, captures VC attend Seely Hirst House on Mapperley Road and attempt to gain entry to the building (URN: NGPF0004340).
297. At 0502hrs (TG1199) the drone officer updates that they have spoken to local officers and the screaming was coming from the tunnel to The Park area. Local officers are on foot doing it now. He updates they are going to have another walk through but once done don't believe any need to fly the drone. (URN: NGPF0004779 - Recording reference 20230613_040220000000_677000003_3029_1).
298. At 0502hrs incident 0069 is updated that the caller has been contacted again but was unable to provide a more specific location and is unsure if it was coming from Park Gate or Derby Road:
- "13/06/2023 05:02:08 CR410 update caller has been contacted again. He has stated that he cannot confirm where the shouting was coming*

from. He stated that all he could hear was a female shouting "FUCK OFF" in a drunken manner and cannot confirm if the shouting was within the vicinity of PARK GATE AND CONVANT or Derby Road as the caller lives in flats and the noise could have been coming from anywhere 4000099."

299. At 0503hrs incident 0069 is updated with the search progress update from the drone officer:

"13/06/2023 05:03:06 UA01 - SCREAMING COMING FROM TUNNEL TO THE PARK - THAT IS BEING SEARCHED ON FOOT. DO NOT BELIEVE THERE WILL BE ANY NEED TO FLY THE DRONE. 3001175"

300. At 0503hrs (TG1199) PS 755 Hallam (OFZ4) updates that the DI needs everyone who has been involved in the Ilkeston Road incident to do a statement of what they have done before they go off duty. He clarifies if PC 1721 Whysall (OD41) has been to the scene. PC 1721 Whysall confirms he has been searching the locality but had not been to the scene. (URN: NGPF0004780 - Recording reference 20230613_040307000000_677000003_3029_1).

301. At 0504hrs incident 0065 is updated to reflect the above update from PS 755 Hallam:

"13/06/2023 05:04:31 OFZ4 - DI IS ASKING ANY STAFF THAT ATTENDED THE SCENE COMPLETE A STATEMENT OF WHAT ACTIONS EVIDENTIAL AND ENQUIRIES CARRIED OUT BEFORE THEY GO OFF DUTY 3001175".

302. At 0505hrs the MCU Sequence of Events states one of the occupants of Seely Hirst House punches a black male who was at his window. The male walks away towards Woodborough Road (URN: NGPF0004340).

303. At 0506hrs CCTV (later recovered by MCU) from the exterior of Seely Hirst House, captures VC engage with the security staff outside Seely Hirst House (URN: NGPF0004340).

304. At 0508hrs CCTV (later recovered by MCU) from the exterior of Seely Hirst House, captures VC attempt to climb through an open ground floor window at Seely Hirst House but is pushed away by resident. VC makes his way onto Mapperley Road and walks towards Woodborough Road (URN: NGPF0004340).
305. At 0508hrs (TG1199) PC 3288 Yallop (OF48) updates progress on the search for incident 0069. He states that he has liaised with local officers and has been through all of the tunnel and all of the roads around the area. The caller can't be more specific about where the screaming was coming from. (URN: NGPF0004782 - Recording reference 20230613_040827000000_677000003_3029_1).
306. At 0509hrs incident 0069 is updated to confirm the tunnel and all surrounding area has been checked. Officers update they have searched car parks, the tunnel, stairwells and bushes in the area by foot:
- “13/06/2023 05:09:05 OF48 TUNNEL AND ALL SURROUNDING HAS BEEEN CHECKED. THE CALLER CANNOT BE MORE SPECIFIC ABOUT WHERE THE SCREAMING WAS COMING FROM 3001175”*
- “13/06/2023 05:09:57 CR410 Entered Park Gate and Convant car park area and searched the car park - No trace Entered the tunnel in The Park and searched stairwells, through the tunnel and bushes towards the end - No trace The above was done by foot search 4000099”*
307. At 0510hrs CCTV (later recovered by MCU) captures VC come into view on Mapperley Road / Woodborough Road junction before returning back towards Seely Hirst House (URN: NGPF0004340).
308. At 0511hrs CCTV (later recovered by MCU), from the exterior of Seely Hirst House, captures VC return to Seely Hirst House and strike a ground floor window with an object four times before leaving along Mapperley Road towards Woodborough Road (URN: NGPF0004340).

309. At 0511hrs CCTV (later recovered by MCU) captures Ian Coates driving along Magdala Road towards Woodborough Road in a white van (URN: NGPF0004340).
310. At 0512hrs incident 0069 is updated to show updates from officers that searches have now been completed in the areas of College Street, Ropewalk and Derby Road have all been searched and are negative:
“13/06/2023 05:12:35 CR410 College Street - Drive down - Negative Upper College Street - Drive down - Negative Ropewalk - Drive down - Negative Drive was done previously on Derby Road - Negative 4000099”
311. At 0513hrs CCTV (later recovered by MCU) captures VC walking on Woodborough Road towards Magdala Road (URN: NGPF0004340).
312. By reference to the MCU Sequence of Events, at 0514hrs the attack on Ian Coates takes place on Magdala Road (URN: NGPF0004340).
313. At 0514hrs incident 0065 is updated that the on-call media have been informed of the Ilkeston Road incident:
“13/06/2023 05:14:41 %% fis - on-call media updated 3004224”
314. At 0514hrs incident 0069 is updated that WR434 - PC 4152 Hope and PC 509 Luxton are now also in The Park estate supporting the search:
“13/06/2023 05:14:49 WR434 - State 6 park estate entering from Derby Road. 4000408”
315. At 0515hrs CCTV (later recovered by MCU) captures VC driving Ian Coates' van from Magdala Road towards City Centre (URN: NGPF0004340).
316. With support from an analyst a short slide presentation has been prepared which shows the movements of VC from the time of the Magdala Road attack until the time of his arrest. This includes the period of the city centre

attacks with the van. These slides are presented as exhibit referred to as URN: NGPF0010081.

317. At 0515hrs there is a point to point (PTP) radio discussion between the FIS and the Response Police Inspector (RPI) Inspector Pete Shaw. The FIS explains to the Inspector he is just touching base with him to confirm he has everything he needs. The Inspector states he is sorted, and Operational Support (OS) officers have been released from the scene. He states city staff are covering all the scene aspects which are straight forward before people start coming out. The Inspector then refers to some big student residence within the scene which could cause some more problems when people start coming out. The Inspector summarises by saying he doesn't need any support from the control room. (URN: NGPF0007317 Recording reference 20230613_041512000000_677000004_1017_1).
318. The FIS acknowledges the update from the Inspector and then updates him that not far away there has been another incident, which may have been lost in the mele of the Ilkeston Road job. The FIS explains that on Derby Road, just after the other incident, a call had been received from an off-duty officer who had been woken by the sound of a female shouting. The FIS explains that local officers had attended but he had sent them back with some additional OS units to do a more thorough search. Nothing was found so the FIS speculates that it may have just been a drunken female on her way home but given the proximity of it he wanted to be more thorough.
319. The Inspector agrees with the FIS assessment and asks if a note has been added to the log so the potential link can be picked up. The FIS updates that he has added his rationale onto the Derby Road job and will make sure he puts a note on the Ilkeston Road job as well. The FIS explains that he brought across another Sergeant and other units to assist with the search, and he has also had the drone up as well. FIS states the Sergeant

is happy having spoken to the local cops so should the Inspector require any more resources there are three available and the Sergeant.

320. The Inspector acknowledges this and asks if those officers can be available for any further incidents which may come in over the next hour or so. The Inspector then expresses some frustration that one of the officers who had come to assist from a neighbouring area had blue-lighted through the murder scene which he was not happy about. The FIS agrees and explains media have been notified and the DI is coordinated with CSI. The Inspector states he is standing with the DI and thanks the FIS for checking in. He asks the FIS to prepare a TRIM email with everyone on it. The Inspector asks the FIS for a postcode and the recording ends.

321. TRiM refers to Trauma Risk Management which is a peer-led post incident process. TRiM practitioners are trained to carry out assessments between 3 to 28 days after an individual has been exposed to a potentially traumatic episode or event to identify those that may be suffering adverse psychological effects. This is a welfare consideration for officers after deploying to a traumatic incident.

322. At 0518hrs incident 0069 is updated that the areas of Cavendish Crescent, Cavendish Road East, Cavendish Crescent South and Cavendish Crescent North have all been searched but no trace. No trace means the officers have not found any trace of what they were searching for. In this case a female in distress and the suspect.

"13/06/2023 05:18:05 WR434 - Cavendish Crescent, Cavendish Road East, Cavendish Crescent south Cavendish Crescent North No trace 4000408".

323. At 0520hrs the MCU Sequence of Events states the male victim from Ilkeston Road is 1/1 (URN: NGPF0004340). The use of one oblique one (1/1) is a police radio code for deceased to allow officers to communicate this information discreetly where required.

324. At 0521hrs (TG7) officers update that the male victim has been confirmed as 1/1. (URN: NGPF0005161 - Recording reference 20230613_042129000000_677000003_3008_1_1).
325. At 0522hrs MCU Sequence of Events states that Wayne Birkett steps off a bus outside House of Fraser on Mansfield Road and walks towards Milton Street (URN: NGPF0004340).
326. At 0522hrs CCTV (later recovered by MCU) captures VC turn left onto Mansfield Road from Huntingdon Street towards Milton Street (URN: NGPF0004340).
327. At 0523hrs CCTV (later recovered by MCU) captures VC drive the van into Wayne Birkett (URN: NGPF0004340).
328. At 0523hrs incident 0069 is updated to show that officers have now also searched the area of Park Terrace:
- “13/06/2023 05:23:55 CR410 Park Terrace - Drive Down - No trace 4000099.”*
329. At 0523hrs a 999 call is received from GRO-B after seeing a white van hit a pedestrian. I can see that contact record CR00150_13062023 was created at the point this call was received but this is one of the calls where the audio was not recorded. I now refer to this as URN: NGPF0007949.
330. I can see from the contact record that the 999 call was received at 0523hrs on 13 June 2023. The caller’s contact number and name are listed within the contact record as is the incident location, which is documented as MILTON STREET, NOTTINGHAM, NOTTINGHAM CITY, NG1.
331. The text within the contact record summary is shown below.

“Caller reporting a white van has just deliberately run over a male, Black male, drove off towards parliament.”

332. At 0525hrs incident 0077_13062023 is created following the call from **GRO-B** reporting that a white van had deliberately ran over a male. Driver described as a black male who drove off towards Parliament Street. I now refer to this as URN: NGPF0005224.
333. At 0526hrs we received a 999 call from **GRO-B** reporting a hit and run incident outside McDonalds on Milton Street. I now refer to this call as URN: NGPF0002226. I can see contact record CR0152_13062023 was created at the time of this call, which I now refer to as URN: NGPF0007952.
334. I have listened to the recording of this call which lasts 2 minutes and 57 seconds. The call starts with the caller saying he wants to report a hit and run at McDonalds outside the Victoria Centre. The call handler confirms the location and asks if it is a person or a car that's been hit. The caller states that it was a van that hit a person, and he is in a pretty bad way. The caller explains someone else is on the phone to ambulance, but he is in a pretty bad way. The call handler asks the caller to stay on the phone. The call handler then says he thinks someone else is calling the incident in as well and again asks the caller to stay on the line. The call handler then asks for the caller's name which he gives as **GRO-B**. He is asked for his contact number which he provides.
335. The call handler asks the caller if he managed to get a registration number for the van. The caller confirms he didn't but said he doesn't know if the van drove into him on purpose, but he did kind of swerve onto the wrong side of the road and went straight on towards Parliament Street. The caller states he works at a retail store very close by where officers can contact him if they need anything.

336. The call handler asks what kind of van it was. The caller states it was a white van with a black roof rack, but he didn't get the registration of it. The call handler asks if it was a tall van or a long van. The caller states it was a tall van like a normal transit van. The caller is asked if it was a Ford or Mercedes. The caller states he thinks it might have been a Ford, but he isn't 100% positive. He said it looked like a Ford kind of shape. The caller is asked to confirm if it was white and he confirms it was white with a black roof rack. The caller then states the van shot down towards Parliament Street and was driving quickly. The call handler reassures the caller that officers are on their way and the call ends.

337. As incident 0077 had already been created at the point of this call the information from this caller was added to the existing incident log at 0529hrs. I note there is a typographical error of the caller's surname:

*"13/06/2023 05:29:43 CALL FROM - **GRO-B** - **GRO-B** - CALLER SAID THAT THE VAN DID IT ON PURPOSE - CAME WRONG SIDE OF ROAD TO DO HIT THE PERSON - CANNOT PROVIDE A VRM - WHITE VAN WITH ROOF RACK - POSS FORD TRANSIT 3003846".*

338. At 0526hrs (TG7) the control room shout for any officers available for a Grade 1 on Milton Street. The control room receive no response to this suggesting all of the officers are already committed.

(URN: NGPF0005163 Recording reference 20230613_042608000000_677000003_3008_1_1).

339. At 0526hrs (TG7) the control room shout for a second time if any officers are available for Grade 1 on Milton Street. But again, get no response. (URN: NGPF0005164 -

Recording reference 20230613_042615000000_677000003_3008_1_1).

340. At 0526hrs (TG1199) the FIS intervenes and immediately deploys OF48 PC 3288 Yallop and PC 4550 Bower to Milton Street following the report

that a white van has deliberately run over a male. The description is given as a Black male who drove off towards Parliament Street and the FIS states that details are still coming in. (URN: NGPF0004783 - Recording reference 20230613_04260000000_677000003_3029_1).

341. At 0526hrs (TG1199) officers ask for a direction of travel for the van. The direction is given as towards Parliament Street. The description provided is a white van with no signage and a tube on top of the roof rack. A Black male is described as driving. PC 3390 McAuley offers to search the area, PC 1721 Whysall and another call sign then also shout up as responding. (URN: NGPF0004785 - Recording reference 20230613_04263900000_677000003_3029_1).

342. At 0526hrs incident 0077 is updated that Firearms officers have been dispatched to the incident, a further description of the suspect is added, the male victim is described as conscious and breathing but bleeding heavily from the head. All local units are showing as already committed and RTIU begin checks for any sightings:

"13/06/2023 05:26:17 Firearms_Dispatched 3004783"

"13/06/2023 05:26:21 Black male driving a white van, no signs on the van, tube on top of roof rack 4000003"

"13/06/2023 05:26:26 Mazle is c and b 4000003 "

"13/06/2023 05:26:40 male is bleeding from his head severely 4000003"

*"13/06/2023 05:26:52 CENTRAL UNITS COMMITTED 3002051**

"13/06/2023 05:26:55 RTIU CHECKING SIGHTINGS 3001128"

343. At 0527hrs (TG1199) the location of the incident is given as across the road from McDonalds on Milton Street. (URN: NGPF0004786- Recording reference 20230613_04271800000_677000003_3029_1).

344. At 0527hrs (TG1199) the FIS instructs OF48 PC 3288 Yallop and PC 4550 Bower that the priority is the male who has been injured, and they are

trying to get some more resources (URN: NGPF0004787 - Recording reference 20230613_042725000000_677000003_3029_1).

345. At 0527hrs (TG1199) the FIS asks Sergeant Barnett if they have any other units available to travel to the city centre. WR434 PC 509 Luxton and PC 4152 Hope, WU442 PC 4401 Kenna and PC 4422 Read then volunteer and begin travelling to the city centre. (URN: NGPF0004788 - Recording reference 20230613_042735000000_677000003_3029_1).

346. At 0527hrs incident 0077 is updated to show further officers are dispatched including the Sergeant, drone, dogs and Taser officers. EMAS are called and CCTV control are also informed of the incident:

"13/06/2023 05:27:03 UA01 3001175 13/06/2023 05:27:03 Dispatched 3001175"

"13/06/2023 05:27:03 Response(TASER)_Dispatched 3001175"

"13/06/2023 05:27:12 OD41 3001175"

"13/06/2023 05:27:12 Dog Unit_Dispatched 3001175"

"13/06/2023 05:27:16 ringing emas 3005123"

"13/06/2023 05:27:46 WRZ44 3001175"

"13/06/2023 05:27:47 Response Sergeant_Dispatched 3001175"

"13/06/2023 05:27:50 CCTV INFORMED 3002051"

347. At 0528hrs (TG1199) SR442 PC 3821 Reynolds shouts up that they are behind the van (FD64 LUJ) on Parliament Street towards the tram tracks. The officer then shouts that the van is running people over and states two people are down. The direction is described as down Parliament Street towards Maid Marion Way. The FIS immediately comes on the air and asks for the firearms units to travel to that area. PC 3821 Reynolds then confirms two people have been run over and he needs EMAS straight away. The FIS directs the officer to prioritise the victims and instructs him not to pursue. Sergeant Barnett then states one is to go to Milton Street,

and he will head to Parliament Street. The FIM can then be heard asking which ARVs are free. OF48 PC 3288 Yallop and PC 4550 Bower state they are on the A60 in Sherwood, OF41 PC 1978 Goddard and PC 35 Speeden (OFC) shout up to say they are travelling. The FIM then states he is granting armed authority and notes the time as 0530hrs. The OFC confirms. (URN: NGPF0004792 - Recording reference 20230613_042849000000_677000003_3029_1).

348. At 0529hrs dashcam footage (later recovered by MCU), from South Sherwood Street facing Upper Parliament Street, shows the white van on the wrong side of the road towards Market Street (URN: NGPF0004340).

349. At 0529hrs dashcam footage (later recovered by MCU), shows the white van exiting the city centre towards Alfreton Road and hitting pedestrians Sharon Miller and Marcin Gawronski who were crossing the road. (URN: NGPF0004340).

350. At 0529hrs incident 0077 is updated to show an update from EMAS that they have a single paramedic attending on a CAT1 with a 3 minute ETA. A CAT1 refers to the EMAS incident grading and is their highest priority for emergency incidents.

"13/06/2023 05:29:09 emas ref cat 1 response single paramedic at this stage 3 minute eta 3005123"

351. At 0529hrs incident 0069 is updated to show officers had also searched the areas Ropewalk Number 11 car park, neighbouring large car park, Fiscal Engineers car park, Cottage Terrace and The Coach House all with no trace. No trace means the officers have not found what they were searching for.

"13/06/2023 05:29:25 CR410 Carparks of Ropewalk Number 11 carpark - Search of large carpark - No trace Fiscal Engineers Car Park - Drive

through - No trace Cottage Terrace - Drive down - Negative The Coach House - Negative 4000099”.

352. At 0529hrs incident 0077 has the update added from WU442 PC 4401 Kenna and PC 4422 Read with the VRM of the van and direction of travel on Parliament Street. RTIU confirm vehicle added to hotlist for Automatic Number Plate Recognition (ANPR) notifications. Details of the further 999 call from GRO-B are also added to the log.

“13/06/2023 05:29:27 WR442 - FD64LUJ 3001175”

“13/06/2023 05:29:35 PARLIAMENT STREET TOWARDS TRACK TRACKS 3001175 “

“13/06/2023 05:29:42 RTFD64LUJ GOING ON HOTLIST 3001128”

“13/06/2023 05:29:43 CALL FROM - GRO-B - GRO-B CALLER SAID THAT THE VAN DID IT ON PURPOSE - CAME WRONG SIDE OF ROAD TO DO HIT THE PERSON - CANNOT PROVIDE A VRM - WHITE VAN WITH ROOF RACK - POSS FORD TRANSIT 3003846”

“13/06/2023 05:29:43 RUNNING PEOPLE OVER - 2 PEOPLE DOPWN 3001175”.

353. At 0530hrs (TG1199) OF41 PC 35 Speeden (OFC) asks for the registration again which is passed. Sgt Barnett updates on the two casualties he is with, both conscious, breathing and talking, one with a head injury. The Sergeant begins to coordinate the road closures required. Oscar 1 (FIM) then asks all ARVs to go onto TG1205.

354. PC 3288 Yallop (OF48) shouts up that he thinks TG7 are behind the vehicle, and he is trying to get in on the radio. TG7 refers to the local airwave Talkgroup for that area. The officer is saying he believes, most likely because he can hear it on a secondary radio, that local officers, not on the firearms Talkgroup, are behind the suspect vehicle. (URN: NGPF0004793 - Recording reference

20230613_043044000000_677000003_3029_1 and URN:
NGPF0004885 - 20230613_043120000000_677000003_3022_1).

355. At 0530hrs (CCTV later recovered by MCU) shows VC drive out of city centre towards Radford (URN: NGPF0004340).

356. At 0530hrs incident 0077 is updated with vehicle information for the van which shows Ian Coates as the registered keeper:

*"13/06/2023 05:30:24 13/06/23 05:30 31LINGJI VI46/0004 VE101M11
319239 SIS LINK UNAVAILABLE FD64LUJ MR IAN COATES

NO REPORTS PRESENT *** . PAGE IN... HELP ... ABANDON
TRANSACTION? N.. 3001128"*

357. At 0530hrs (TG7) officers are asking for more units to support on Parliament Street. (URN: NGPF0005167 - Recording reference 20230613_043015000000_677000003_3008_1_1).

358. At 0530hrs incident 0077 is updated with national interop details showing Op Plato has been activated. National interop refers to national interoperability talkgroups which are designed to allow incoming national resources, from beyond the Nottinghamshire area, to integrate with our radio communications.

*"13/06/2023 05:30:38 NOTTS NATIONAL INTEROP 1
SAFELVSERVICE"*

359. Operation PLATO is the agreed national identifier for the multi-agency response to an ongoing marauding terrorist attack. The OP PLATO declaration is designed to both inform and prepare the emergency

services and other stakeholders for the response to an extraordinary event.

360. A marauding attack is defined as involving an attacker(s) actively and deliberately seeking out new victims. The “marauding” element may involve attackers moving between or within structures or other populated areas searching for victims.

361. At 0530hrs incident 0077 is updated with the update from PC 3821 Reynolds (SR442) at 0528hrs and the request for more units:

“13/06/2023 05:30:42 SR442 - UPPER PARLIAMENT MOWED DOWN 2 PEOPLE DRIVING ON THE PAVEMENT TOWARD MEMBER OF THE PUBLIC 3003008”

“13/06/2023 05:30:49 SR442 - I NEED MORE UNITS 3003008”

362. At 0531hrs (TG1205) the FIM declares Op Plato and provides attack methodology as a van running pedestrians over. He provides the vehicle description as a white van bearing the registration FD64 LUJ. He provides the location of it now as Forest Road. OF41 - PC 1721 Whysall shouts up to say he is just coming onto Forest Road. (URN NGPF0004889 - Recording reference 20230613_043153000000_677000003_3022_1 and URN: NGPF0004893 Recording reference 20230613_043228000000_677000003_3022_1).

363. At 0531hrs incident 0077 is updated with Sgt Barnett’s updates that they have two casualties where they are (Parliament Street). Both are conscious, talking and breathing but one has a head injury:

“13/06/2023 05:31:10 WRZ44 - 2 CASUALTIES WHERE I AM - BOTH C&B AND TALKIGN 1 WITH HEAD INJURY 3001175”

364. At 0531hrs incident 0077 is updated with CR410’s (PC 1683 Abid and PC 281 Nunley) updates that they have the vehicle in sight on Alfreton Road

heading outbound. At the same time other officers are requesting road closures in the area of the injured victims. PC 1683 Abid and PC 281 Nunley describe the driver of the van as a male with dark skin approx. 25yrs old:

"cr410 - VEH IN SIGHT ON ALFRETO ROAD OUTBOUND 3002051"

"13/06/2023 05:31:31 NEED ROADS CLOSING FROM MARKET STREET DOWM TO ROUNDABOUT 3001175"

"13/06/2023 05:31:31 NEED ROADS CLOSING FROM MARKET STREET DOWM TO ROUNDABOUT 3001175"

"13/06/2023 05:31:32 3308 SAFELVSERVICE 13/06/2023 05:31:39 CR410 - MALE OCCUPANT - DARK SKIN, 25YRS OLD 3002051"

365. At 0532hrs (TG1199) Inspector Shaw clarifies the number of casualties in the city centre. Dispatch state they believe there are three. Sergeant Barnett on the scene confirms he is with two and WR434 PC 4152 Hope and PC 509 Luxton are trying to find another victim on Milton Street. SR435 - PC 3943 Spibey and PC 2477 Knight are travelling to location. (URN: NGPF0004797 - Recording reference 20230613_043247000000_677000003_3029_1).
366. At 0532hrs (TG1199) OD42 PC 3809 Marshall states they are returning to the city from Headquarters (their base station). OF48 PC 3288 Yallop shouts up to state TG7 officers are behind the van and he is going to drop in behind it any minute. Dispatch update that Op Plato has been called on Talkgroup 1205. (URN NGPF0008189 - Recording reference 20230613_043200000000_677000003_3029_1).
367. At 0532hrs (TG1205) the FIM updates that the location of the van is now believed to be Bentinck Road, he repeats this update over the radio. PC 3288 Yallop (OF48) shouts up to confirm they are just coming onto Bentinck Road now. (URN: NGPF0004902 - Recording reference 20230613_043308000000_677000003_3022_1).

368. At 0532hrs multiple updates are added to the log of incident 0077 showing the control room are preparing the radio talk groups and informing other blue light agencies following the Op Plato declaration:

"13/06/2023 05:32:04 NOTTS NATIONAL INTEROP 1 SAFELVSERVICE"

"13/06/2023 05:32:06 NOTTS NATIONAL FIREARMS 1 SAFELVSERVICE"

"13/06/2023 05:32:11 FIS - EMAS AND FIRE informed over Tri Service Channel 3010029"

369. At 0532hrs incident 0077 continues to be updated with the location and direction of travel of the suspect vehicle provided by CR410 PC 1683 Abid and PC 281 Nunley. OD41 PC 1721 Whysall confirms he is in the area:

"13/06/2023 05:32:14 CR410 - PAST THE JUNCTION OF FOREST ROAD 3002051"

"13/06/2023 05:32:38 CR410 - CRACKED WINDSCREEN. BEINTINCK ROAD 3002051"

"13/06/2023 05:32:44 OD41 - FOREST ROAD 3005126"

"13/06/2023 05:32:51 1683 - MALE ON TO BENTINCK ROAD 3002051"

370. At 0532hrs WU415 PC 1106 Toor and PC 508 Hughes are also dispatched to Milton Street. Upon arrival they are involved in assisting the injured victims and gathering information from witnesses at the scene.

371. At 0533hrs (TG7) dispatch request the officer following the van moves onto TG1199. (URN: NGPF0005170 - Recording reference 20230613_043301000000_677000003_3008_1_1).

372. At 0533hrs (TG7) dispatch requests all units from the neighbouring St Anns police station head towards Forest Recreation Ground and monitor TG1199 for further instructions. (URN: NGPF0005172 -

Recording reference 20230613_043555000000_677000003_3008_1_1).

373. At 0533hrs incident 0077 is updated that WRZ44 Sergeant Barnett confirms he has two victims at his location and PC 4152 Hope and PC 509 Luxton are looking for other victims on Milton Street. CR410 PC 1683 Abid and PC 281 Nunley continue to update on the van's location and direction:

"13/06/2023 05:33:21 WRZ44 - 2 CONFIRMED WHERE I AM - WR434 IS LOOKING FOR OTHER ON MILTON 3001175"

"13/06/2023 05:33:22 1683 - TOWARDS FOREST REC 300205"

"13/06/2023 05:33:28 OF48 - BENTICK ROAD 3005126"

"13/06/2023 05:33:41 OF41 WE ARE BEHIND OF48 3005126"

"13/06/2023 05:33:47 OFZ4 - BENTINK ROAD 3005126"

"13/06/2023 05:33:58 CR410 - VAN IS STILL MOBILE - STRAIGHT IN FRONT OF ME 3001175"

374. At 0533hrs (TG1205) OF41 PC 1978 Goddard and PC 35 Speeden shout up to say they are still some distance away on Mansfield Road. OFZ4 PC 3912 Graham and PS 755 Hallam then says likewise. An officer asks for update on location. OD41 PC 1721 Whysall shouts up to say the white van has been abandoned. OF48 PC 3288 Yallop and PC 4550 Bower shouts up to say they are with the vehicle. (URN: NGPF0008045)
Recording reference 20230613_043331000000_677000003_3022_1)

375. At 0533hrs (TG1205) dispatch shouts OF48 PC 3288 Yallop and PC 4550 Bower to confirm exact location. Shouting comes back *"He's got a knife mate" ... "knife in his right hand."* (URN: NGPF0004903 - Recording reference 20230613_043403000000_677000003_3022_1).

376. At 0534hrs (TG1205) OF48 PC 3288 Yallop then says the male has been detained. The FIM responds to confirm male detained. PC 3288 Yallop confirms, states Taser has been deployed and says he thinks this will be

the offender. The FIM asks for confirmation nobody has been hurt. (URN: NGPF0004906)

Recording reference 20230613_043445000000_677000003_3022_1).

377. At 0534hrs (TG1205) officers with the suspect confirm no further officers are needed and the other firearms officers can assist on Milton Street. (URN: NGPF0004906 - Recording reference 20230613_043445000000_677000003_3022_1 and URN NGPF0004907 Recording ref 20230613_043526000000_677000003_3022_1).
378. At 0534hrs (TG1199) SR434 PC 1136 Montgomery and PC 4420 Revill state the male they are with is losing consciousness on Milton Street and they need EMAS. (URN: NGPF0004800 - Recording reference 20230613_043434000000_677000003_3029_1).
379. At 0534hrs (TG1199) another officer states the victim they are with has significant bruising on face and cannot talk. Sgt Barnett confirms level of injuries and that EMAS are travelling. Dispatch confirms ambulance and HART are travelling. Sgt Barnett asks for Upper Parliament Street to be closed. (URN: NGPF0004801 - Recording reference 20230613_043457000000_677000003_3029_1)
380. HART are a specialist team within EMAS called the Hazardous Area Response Team, the members of which have additional training and equipment to respond into hazardous areas, such as in the immediate aftermath of an Op Plato declaration.
381. At 0534hrs incident 0077 is updated that the van comes to a stop on Bentinck Road as PC 1721 Whysall arrives. The male has a knife in his hand as officers approach him. At the same time PC 4152 Hope updates they are with another casualty on Milton Street and the male is losing consciousness:

"13/06/2023 05:34:06 OD41 - ABAN WITH VEHICLE 3005126"

"13/06/2023 05:34:11 WR434 - CONFIRMED OTHER CASUALTY ON MILTON STREET 3001175"

"13/06/2023 05:34:21 OF48 - HE HAS A KNIFE IN HIS RIGHT HAND 3005126"

"13/06/2023 05:34:45 WR434 MALE IS LOSING CONSCIOUSNESS 3001175"

382. At 0535hrs we received a 999 call from Steven Cummings who had found a male he described as lying in the gutter with blood everywhere, and he thinks he is dead. I can see contact record CR0158_13062023 was created at the time of this call but this is one of the calls where the audio was not recorded. I now refer to this as URN: NGPF0007953.

383. I can see from the contact record that the 999 call was received at 0535hrs on 13 June 2023. The caller's contact number is listed within the contact record as is the incident location, which is documented as MAGDALA ROAD, NOTTINGHAM, NOTTINGHAM CITY, NG5.

384. The text within the contact record summary is shown below:

"CALLER REPORTING A MALE LAYING IN THE GUTTER WITH BLOOD EVERYWHERE AND HE THINKS HE IS DEAD."

385. It is clear from the contact log summary that at 0537hrs the call handler has created incident 0079_13062023 as a result of this call and the details contained within that incident log are shown below from 0537hrs onwards. I now refer to this as URN: NGPF0007954. The incident description field is the same as the line from the contact record as below:

"CALLER REPORTING A MALE LAYING IN THE GUTTER WITH BLOOD EVERYWHERE AND HE THINKS HE IS DEAD."

386. At 0535hrs incident 0077 is updated to show OF48 - PC 3288 Yallop updates that the male has been detained and is believed to be male linked to stabbing. Taser has been deployed. Location of arrest is provided. At the same time PC 4152 Hope updates the injured person they are with has significant bleeding on the face. The FIS updates EMAS are getting HART to attend and WRZ44 PS 3872 Barnett states he needs Upper Parliament Street closing to protect the scene:

"13/06/2023 05:35:05 OF48 - MALE IS DETAINED BELIEVE THIS S THE MALE FROM STABBING TASER HAS BEEN DEPLOYED 3005126"

"13/06/2023 05:35:15 OF48 - BENTINK ROAD JUNCTION OF MAPLE STREET 3005126"

"13/06/2023 05:35:16 WR434 - SIGNIFICANTY BLEEDING -ON FACE CAN'T OPEN EYES AND IS NOT TALKIIGN 3001175"

"13/06/2023 05:35:18 FIS - EMAS getting HART TEAM to attend 3010029"

"13/06/2023 05:35:55 WRZ44 - NEED UPPER PARLIAMENT STREET CLOSING FROM CENTRAL 3001175"

"13/06/2023 05:35:56 OF48 - CLEARING EVERYONE OUT THAT HAS BEEN TO THE JOB - EVERYONE TO MILTON STREET RTC SIDE 300512"

387. At 0536hrs incident 0077 has METHANE added to the log and officers are sent to support the scene around van. Firearms Sergeant OFZ4 - PS 755 Hallam and PC 3912 Graham divert to the Milton Street scene to support first aid. Officers from the wider force area are now travelling towards the city as part of the Op Plato mobilisation:

*"13/06/2023 05:36:30 METHANE -----
----- MAJOR INCIDENT DECLARED? (Include date and time of declaration): OP PLATO Declared EXACT LOCATION? (Exact location/geographic area incident)? Milton Street, Nottingham*

City Centre TYPE OF INCIDENT? (e.g. Flooding/Fire/Utility/failure/Hazmat/Disease outbreak etc)? Van driven in to pedestrians HAZARDS? (Present or Suspected)? Van has now left the scene ACCESS? (Routes that are safe to use, any inaccessible routes and RVP'S)? Lower and Upper Parliament Street NUMBER OF CASUALTIES? (Numbers/Type and Severity)? at least 5 units EMERGENCY SERVICES? (Present and those required)? EMAs and Fire Requested 3010029”

“13/06/2023 05:36:48 MOVING ALL ST ANNS UNITS ON TO 1199 AND TO MAPLE STREET/FOREST REC AREA 3002051”

“13/06/2023 05:36:51 OFZ4 - MILTON ST FOR FIRST AID 3005126 “

“13/06/2023 05:36:52 AR443 - ALL OF ASHFIELD TRAVLLING OVER 3001175”

388. The METHANE model is an established reporting framework which provides a common structure for responders and their control rooms to share incident information. It is part of the Joint Emergency Services Interoperability Programme (JESIP) approach to interoperability. The pneumonic stands for:

- MAJOR INCIDENT DECLARED?
- EXACT LOCATION
- TYPE OF INCIDENT
- HAZARDS
- ACCESS
- NUMBER OF CASUALTIES
- EMERGENCY SERVICES (present and required)

389. At 0536hrs (TG1199) AR443 – PC 1853 Thomas and PC 530 Norris update that all officers from the Mansfield response area are travelling and asks for tasking. They are directed to Milton Street. (URN: NGPF0004803 -

Recording reference 20230613_043615000000_677000003_3029_1).

390. At 0536hrs (TG1205) a van is requested to assist with transport for the suspect and other officers are directed to Milton Street for first aid. (URN: NGPF0004908 Recording reference 20230613_043601000000_677000003_3022_1).
391. At 0536hrs (TG1199) AR450 PC 1851 Harper updates that all available officers from the Hucknall area are travelling toward the city and asks for tasking. They are directed to Milton Street. (URN: NGPF0004804 - Recording reference 20230613_043651000000_677000003_3029_1).
392. At 0536 incident 0077 is updated as WR436 PC 3839 Widdowson and PC 2226 Heathcote travel towards Maple Street with a van to transport the suspect. The log is also updated that other officers have been directed to Forest Recreation Ground area and to TG1199:
- "13/06/2023 05:37:35 WR436 - TO MAPLES STREET WITH VAN 3005126"*
- "13/06/2023 05:37:48 SRZ43 informed and SR434 - TPS BRAVANT, sr435 - PC856 RUSHBY, SR439 – PC1136 MONTGOMERY directed to move towards the Forest Recreation Ground area and monitor TG1199. SR435 – PC856 RUSHBY is already State 6 in that area 0768383."*
393. At 0537hrs (TG1205) the FIM can be heard to make reference to details of another incident coming in. (URN: NGPF0004914- Recording reference 20230613_043738000000_677000003_3022_1).
394. At 0537hrs incident 0079_13062023 is created on Magdala Road that the caller has found a male laying in the road with blood everywhere and he thinks he is dead. The log is updated the male looks like he has been there a while and is marked as noted by TG7.
- "13/06/2023 05:37:45 LOOKS LIKE MALE HAS BEEN THERE A WHILE 3006021"*
- "13/06/2023 05:37:55 NOTED TG7 3002051"*

395. At 0537hrs incident 0077 is updated that the rendezvous point (RVP) for EMAS is Lower Parliament Street junction with Milton Street:
- “13/06/2023 05:38:35 RVP for EMAS will be Lower Parliament Street junction Milton Street 3010029”*
396. At 0538hrs (TG7) dispatch calls for any officers to attend Magdala Road. An officer then provides details of detained male VC. (URN NGPF0008336-
Recording reference 20230613_043846000000_677000003_3008_1_1;
URN: NGPF0005178 Recording reference
20230613_043930000000_677000003_3008_1_1; and URN
NGPF0005179 Recording reference
20230613_043957000000_677000003_3008_1_1).
397. At 0538hrs (TG1199) Inspector Shaw states that he believes some units resumed from the murder scene to the city centre job. He directs that he needs to keep those officers clear of the city scenes if we think it could be linked. (URN: NGPF0004806 - Recording reference 20230613_043825000000_677000003_3029_1).
398. At 0538hrs incident 0079 is updated that there is a lot of blood coming from the victim’s chest and it doesn’t look like he is breathing. Top desk were informed. The male appears in his 50’s:
- “13/06/2023 05:38:01 THERE IS A LOT OF BLOOD COMING FROM HIS CHEST 3006021“*
- “13/06/2023 05:38:05 DOESNT LOOK LIKE MALE IS BREATHIN 3006021”*
- “13/06/2023 05:38:11 TOP DESK MADE AWARE 3002051”*
- “13/06/2023 05:38:51 MALE LOOKS APPROX IN HIS 50’S 3006021”*
399. At 0538hrs (TG1199) Inspector Shaw was updated about another serious incident at 79 Magdala Road, St Anns which the control room suggest is likely to be linked to the other serious incidents. Inspector Shaw asks for

a clothing description of the suspect detained from the van so the suggested link can be confirmed. (URN: NGPF0004807 - Recording reference 20230613_043914000000_677000003_3029_1).

400. At 0539hrs (TG1205) OFZ4 - PS 755 Hallam states he just checked in at Milton Street and they are ok, so he offers to travel to Magdala Road. The FIM states he wants EMAS to deal with Magdala Road and needs the ARVs to remain free as he cannot yet discount the possibility of a further threat. (URN: NGPF0004924- Recording reference 20230613_043916000000_677000003_3022_1).

401. At 0539hrs incident 0079 is updated that the male is lying on his side. EMAS are called. Police officers are dispatched and PC 1978 Goddard and PC 35 Speeden update that they are out of medical capability, meaning they have used up their enhanced first kit at the incident they have already attended on Ilkeston Road:

"13/06/2023 05:39:22 MALE IS LAYING ON HIS SIDE 3006021"

"13/06/2023 05:39:26 ringing emas 3005123"

"13/06/2023 05:39:47 SR434 0768383 13/06/2023 05:39:47 Dispatched 0768383"

"13/06/2023 05:39:55 OF41 - FOR INFO WE ARE OUT OF MED CAPAIBILITY 3005126."

402. At 0539hrs SR434 - PC 4430 Revill, PC 1136 Montgomery, PC 856 Rushby and PC 4447 Foley arrive at Magdala Road as the first officers on scene. They immediately assess the victim, update the control room, request an ambulance and commence CPR.

403. At 0539hrs the police control room call ambulance control to report that officers are with a male that they believe to be dead on Magdala Road. EMAS are updated that officers are asking for an urgent ambulance and have commenced CPR on the injured male.

404. At 0539hrs (TG1205) CR410 PC 1683 Abid and PC 281 Nunley update that the male detained was the only occupant of the van. (URN: NGPF0004930 - Recording reference 20230613_043955000000_677000003_3022_1).
405. At 0540hrs (TG7) there is an update from officers on scene at Magdala Road that the victim has four puncture wounds to his chest and appears to be 1/1. Officers are attempting CPR. (URN: NGPF0005182 - Recording reference 20230613_044059000000_677000003_3008_1_1).
406. At 0540hrs (TG1199) CR410 PC 1683 Abid and PC 281 Nunley again confirm there were no other occupants of the van and single occupant is the male who has been detained. (URN: NGPF0004930 - Recording reference 20230613_043955000000_677000003_3022_1).
407. At 0540hrs (TG1205) OF41 PC 35 Speeden (OFC) asks the Tactical Firearms Commander (TFC) Chief Inspector Mather to clarify whether any further briefing is required on any further tactics. The TFC confirms the ARVs remain at armed authority until he has confirmed there are no other threats. All tactics are in play and if anything else comes in he will let them know. The TFC asks to confirm the location of all armed resources. OF41 PC 1978 Goddard and PC 35 Speeden confirm they can resume from Maple Street so are directed by the TFC to the Old Market Square (OMS). OFZ4 PS 755 Hallam confirms they are already at OMS. Chief Inspector Mather performs the role of Force Incident Manager (FIM) and is also a Tactical Firearms Commander (TFC). The FIM role also uses the callsign Oscar 1. As such Chief Inspector Mather is referred to over the radio at various points as FIM, TFC and Oscar 1. All relate to Chief Inspector Mather. (URN: NGPF0004931 - Recording reference 20230613_044037000000_677000003_3022_1).
408. At 0540hrs incident 0079 is updated that the location is outside the tennis club. PC 1683 Abid and PC 281 Nunley again confirm that the detained male (VC) was the only occupant of the van stopped on Bentinck Road.

*"13/06/2023 05:40:03 OUTSIDE TENNIS CLUB ON MAGDALA ROAD
3006021"*

*"13/06/2023 05:40:22 CR410 - SINGLE MALE OCCUPANT GOT OUT

"13/06/2023 05:40:47 At scene 0768383"

409. At 0540hrs incident 0077 is updated that Derbyshire ARVs are approaching the Nottinghamshire border to support.

*"13/06/2023 05:40:07 FIS - Derbyshire Sending their ARVS to A610
Langley Mill on standby 3010029"*

410. At 0541 incident 0077 is updated with details given for a name check on the detained male and OF48 PC 3288 Yallop confirms the time of arrest:

*"13/06/2023 05:41:11 2477 - NAME CHECK FROM MALE FROM VAN
- VAL NENDES (NFD) 3002051"*

"13/06/2023 05:41:48 OF48 - MALE IS 1X35 AT 5:35 3001175"

411. At 0541hrs (TG1199) officers update that the suspect was arrested for murder at 0535hrs. (URN: NGPF0004809 - Recording reference 20230613_044127000000_677000003_3029_1).

412. At 0541hrs incident 0079 is updated that the caller has been released as officers are now on scene. An ambulance is requested asap and officers update that the victim has several stab wounds. Firearms officers at Maple Street update that they are no longer required are redeployed to OMS.

*"13/06/2023 05:41:01 CALLER RELEASED AS OFFICERS ON SCENE
3006021"*

"13/06/2023 05:41:34 SR434 - 3 OR 4 PUNTURE WOUNDS TO THE CHEST.BELIEVE 1/1 3002051"

"13/06/2023 05:41:41 4430 - commencing cpr 0768383 13/06/2023 05:41:44 OF41 - HEAD TO MARKET SQUARE 3005126"

"13/06/2023 05:41:50 OFZ4 - WE ARE STATIC MARKET SQUARE 3005126"

413. At 0541hrs (TG1199) Inspector Simon Spooner (NRI4) directs that the officers with the detained male need to contact DI Dowson for a forensic strategy before conveying the suspect to custody. Inspector Spooner is the Northern Response Policing Inspector (RPI), responsible for the Northern half of the county, who has now arrived to assist the FIM and Inspector Shaw in coordinating police resources. (URN: NGPF0004810 - Recording reference 20230613_044152000000_677000003_3029_1).
414. At 0541hrs (TG7) an officer with the DI at Ilkeston Road passed on a direction from the DI that a large scene is to be established at the Magdala Road incident. (URN: NGPF0005202 - Recording reference 20230613_045051000000_677000003_3008_1_1).
415. At 0542hrs (TG1205) the FIM asks if OF48 PC 3288 Yallop and PC 4550 Bower can resume and asks for a clothing description of the suspect and whether officers saw CCTV from Ilkeston Road and believe it to be the same male. PC 3288 Yallop states they are confident it is the same male and updates that two knives have been found. (URN: NGPF0004935 Recording reference 20230613_044204000000_677000003_3022_1).
416. At 0542hrs incident 0077 is updated to reflect the direction that contact with the DI is required to discuss forensics before the suspect is taken to custody:

"13/06/2023 05:42:39 NRI4 - BEFORE MALE TAKEN TO CUSTODY - CONTACT DI DOWSON FOR FORENSIC OPPORTUNITES 3001175"

417. At 0542hrs incident 0079 is updated that officers have not yet managed to identify the injured male at Magdala Road:

"13/06/2023 05:42:39 SR434 - NO ID FOR THE MALE 3002051"

418. At 0542hrs incident 0079 is updated with the direction from the DI that a large scene is required and an update from the Firearms Sergeant PS 755 Hallam that he has spoken to the critical care team and they are attending Magdala Road now:

"13/06/2023 05:43:41 808 -FROM THE GOLDEN DI - REQUIRE A LARGE SCENE 3002051"

"13/06/2023 05:43:46 OFZ4 - SPOKEN TO CRITICAL CARE TEAM THEY ARE HEADING MAGDELA NOW (INC 0079) 3005126"

419. At 0543hrs incident 0077 is updated with a description of the detained male who officers believe is the same male (as Ilkeston Road stabbings):

"13/06/2023 05:43:53 OF48 - BLACK MALE, DARK SHORT HAIR, DARK BLACK BEARED, WEARING BLACK SWEATER TOP, BLACK PLAIN BOTTOMS AND BLACK PLAIN SHOES - BELIEVE IT IS ONE OF THE SMAE. JUMPER IS RIDING UP CAN SEE GREY UNDERNEATH 3005126"

420. At 0543hrs (TG1205) OFZ4 PS 755 Hallam states that he has spoken to the critical care team, and they are attending Magdala now. (URN: NGPF0004936 - Recording reference 20230613_044327000000_677000003_3022_1).

421. At 0543hrs (TG1199) SR443 PC 4150 Chapman arrives on Magdala Road and updates that officers are doing CPR. The officers updated that they have not yet managed to identify the injured male at Magdala Road. (URN:

NGPF0004813 - Recording reference
20230613_044327000000_677000003_3029_1).

422. At 0544hrs (TG1205) the FIM directs one ARV back to Milton Street as there is information coming from EMAS about a potential stabbing at that location. OF41 - PC 1978 Goddard and PC 35 Speeden shout up that they will do that. (URN: NGPF0004939 - Recording reference 20230613_044437000000_677000003_3022_1).

423. At 0544hrs incident 0077 is updated that EMAS have arrived on scene (state 6) so WRZ44 – PC 3872 Barnett will relocate to Milton Street. OF41 - PC 1978 Goddard and PC 35 Speeden also make their way toward Milton Street:

“13/06/2023 05:44:25 WRZ44 - EMAS STATE 6 - I WILL HEAD OVER TO MILTON STRREET 3001175”

“13/06/2023 05:44:55 OF41 - WILL GO TO MILTON STREET 3005126”

424. At 0544hrs (TG7) officers update that CPR is ongoing and victim ID details given as Robert Ian Coates. (URN: NGPF0005189 - Recording reference 20230613_044316000000_677000003_3008_1_1; and NGPF0005190 Recording reference 20230613_044348000000_677000003_3008_1_1).

425. At 0545hrs the local response Sergeant SRZ43 - PS 2983 Bravant arrives at Magdala Road. He assesses the scene, discusses what has happened with the officers already in attendance and then begins to establish a cordon to protect evidence as the existing officers continue CPR. He later also speaks to caller GRO-B from GRO-B

426. At 0545hrs incident 0079 is updated from CCTV control that there is no CCTV at that end of Magdala Road. Update also added that EMAS have been called but no ETA provided:

“13/06/2023 05:45:25 FROM CCTV - NO CCTV AT THIS END OF MAGDALA ROAD/MAPPERLEY SIDE 3003008”

"13/06/2023 05:45:49 emas ref 16918617 no eta as of yet 3005123"

427. At 0545hrs incident 0077 is updated that WR434 PC 4152 Hope and PC 509 Luxton need tape to secure the scene on Milton Street. OF41 - PC 1978 Goddard and PC 35 Speeden arrive on Milton Street:

"13/06/2023 05:45:31 WR434 - ANYONE WITH POLICE TAPE TO MILTON STREET 3001175"

"13/06/2023 05:48:36 OF41 - ST6 MILTON STREET WILL UPDATE SHORTLY 3005126"

428. At 0546hrs (TG1199) Inspector Spooner arrives at Milton Street and asks for the location of casualties and scenes. (URN: NGPF0004818 - Recording reference 20230613_044641000000_677000003_3029_1).

429. At 0548hrs (TG1205) OF41 - PC 1978 Goddard and PC 35 Speeden arrive on Milton Street. PC 3809 Marshall arrives in the Old Market Square. (URN: NGPF0004944 Recording reference 20230613_044825000000_677000003_3022_1).

430. At 0548hrs incident 0077 is updated that the dog unit OD42 PC 3809 Marshall is in Market Square with firearms Sergeant PS 755 Hallam and PC 3912 Graham. Inspector Spooner arrives at Milton Street and seeks clarity on casualty information:

"13/06/2023 05:48:43 OD42 - WTH OFZ4 MARKET SQUARE 3005126"

"13/06/2023 05:48:50 WRZ44 - I AM WITH INSPECTOR MILTON STREET - CAN WE CONFIRM THERE ARE CASUALTIES FROM THE VAN 3001175"

431. At 0549hrs (TG1199) WRZ44 PS 3872 Barnett confirms with the control room that they are only aware of three victims. Inspector Spooner updates that a Sergeant is to be allocated to the Milton Street scene. Inspector Spooner directs that Sergeants are also to be identified to manage scenes at Market Street and the location of the van. (URN: NGPF0004822 - Recording reference 20230613_044948000000_677000003_3029_1).

432. At 0549hrs (TG1205) OF41 PC 1978 Goddard and PC 35 Speeden confirm the injured persons at Milton Street are from the van and there hasn't been a stabbing at that location. (URN: NGPF0004945- Recording reference 20230613_044924000000_677000003_3022_1).
433. At 0549hrs (TG1199) Inspector Spooner asks for a Sergeant and some officers to be directed to relieve OS officers with a van and establish a scene. (URN: NGPF0004822 - Recording reference 20230613_044948000000_677000003_3029_1).
434. At 0549hrs incident 0077 is updated that officers have closed several streets and are directing traffic away from the scene. It is also confirmed that the injured persons on Milton Street are linked to the van:
- "13/06/2023 05:49:28 RR440 - I AM DIRECTIN TRAFFIC NORTH SHERWOOD TOWARDS VIC CENTRE 3001175"*
- "13/06/2023 05:49:40 SR442 - I AM TOP OF MARKET STREET 3001175"*
- "13/06/2023 05:49:42 OF41 - INJURED PARTY AT MILTON STREET IS LINKED TO THE VAN 3005126"*
435. At 0550hrs (TG7) Inspector Shaw confirms a scene has been set up where the van has been stopped. (URN: NGPF0005202 - Recording reference 20230613_045051000000_677000003_3008_1_1).
436. At 0550hrs (TG1205) OF48 PC 3288 Yallop and PC 4550 Bower confirm they have arrived in city centre area. (URN: NGPF0004946- Recording reference 20230613_045039000000_677000003_3022_1).
437. At 0550hrs incident 0079 is updated with the request from the Golden DI to clarify if the van involved in Op Plato has been in the vicinity of Magdala Road:

"13/06/2023 05:50:28 %%RR440 - FROM THE GOLDEN DI. HAS THE WHITE VAN INVOLVED WITH OP PLATO HAS BEEN IN THE VICINITY OF MAGDALA ROAD 3002051"

438. At 0550hrs incident 0077 is updated with details of one of the injured persons on Milton Street:

"13/06/2023 05:50:59 WU415 - NAME OF CASUALTY ON MILTON - BIRKETT/WAYNE NO DOB GRO-B"

439. At 0551hrs (TG1199) officers at Magdala Road update the control room that an air ambulance crew have arrived. (URN: NGPF0004826 - Recording reference 20230613_045156000000_677000003_3029_1).

440. At 0551hrs SR443 - PC 4150 Chapman and PC 3734 Jamieson also arrive at Magdala Road. Upon their arrival PC 4150 Chapman is involved in CPR to the victim. PC 3734 Jamieson established a police cordon on Magdala Road to protect evidence at the scene.

441. At 0552hrs incident 0079 is updated that air ambulance had arrived at Magdala Road:

"13/06/2023 05:52:07 SR443 - AIR AMB STATE 6 3001175"

442. At 0553hrs incident 0077 is updated that the suspect vehicle on incident 0077 is insured to Ian Coates and the vehicle may have been hijacked by the suspect for that incident. Updates are also added that the fire and rescue service are travelling to the Milton Street Rendezvous Point (RVP):

"13/06/2023 05:53:19 RTIU I NOTE THE SUSPECT VEHICLE ON INCIDENT 077 IS INSURED TO IAN COATES. QUITE POSSIBLE VEHICLE HAS BEEN HI-JACKED OR SIMILAR BY OUR SUSPECT ON INCIDENT 077 3001128"

"13/06/2023 05:53:27 %% FIS - FIRE mta STAFF ARE travelling to the rvp at Milton street and will liase with RPI at scene 3004224"

443. At 0553hrs (TG1205) OF41 PC 1978 Goddard and PC 35 Speeden update that they have spoken to the HART team on Milton Street who have mentioned another stabbing at some tennis courts near the Castle. OFZ4 PS 755 Hallam suggests this could be The Park estate. They also update the control room that OF48 PC 3288 Yallop and PC 4550 Bower are now in OMS but have a flat tyre. (URN: NGPF0004947 - Recording references 20230613_045303000000_677000003_3022_1; and URN: NGPF0004949 Recording reference 20230613_045346000000_677000003_3022_1).
444. At 0555hrs incident 0079 is updated that officers are required to block off Forest Road:
"13/06/2023 05:54:28 CR410 - REQUIRE A UNIT TO BLOCK OFF FOREST ROAD 3002051"
445. At 0555hrs (TG7) arrangements made for full forensic recovery of the van VC was driving. (URN: NGPF0005208 - Recording reference 20230613_045500000000_677000003_3008_1_1).
446. At 0555hrs (TG1205) OF41 PC 35 Speeden asks for confirmation of casualty numbers so we can make sure we are not missing any. (URN: NGPF0008045- Recording reference 20230613_045506000000_677000003_3022_1).
447. At 0555hrs incident 0079 is updated full forensic lift required for the van:
"13/06/2023 05:55:44 CR410 - FULL FORENSIC LIFT FOR THE VAN 3002051"
448. At 0555hrs (TG7) the victim on Magdala Road is declared 1/1. (URN: NGPF0005209 - Recording reference 20230613_045556000000_677000003_3008_1_1).
449. At 0556hrs incident 0079 is updated to state male victim confirmed as 1/1 as of 0554hrs:

*"13/06/2023 05:56:35 SR434 - MALE IS CONFIRMED 1/1 @ 0554HRS
3002051"*

450. At 0556hrs incident 0079 is updated that more officers are required to assist with house-to-house enquiries:

*"13/06/2023 05:57:05 RR440 - NEED MORE OFFICERS FOR H2H
ENQS NOW 3002051"*

451. At 0557hrs (TG1199) Inspector Shaw requests an update on number and condition of casualties from Milton Street. Update is given as one on Milton Street and two others. (URN: NGPF0004834- Recording references 20230613_045726000000_677000003_3029_1; URN: NGPF0004835 - 20230613_045740000000_677000003_3029_1).

452. At 0555hrs (TG1205) OF41 PC 35 Speeden asks for confirmation if we have a job running at the tennis club in The Park. The control room confirms only three jobs, Milton Street, Magdala Road and initial job (Ilkeston Road). PC 35 Speeden states HART have been informed of a stabbing at tennis courts in The Park and a death at that location as well. Another officer states there are tennis courts at Magdala Road so could be same. PC 35 Speeden confirms it is Magdala Road, and it was confusion by HART colleagues. (URN: NGPF0004951- Recording reference 20230613_045506000000_677000003_3022_1).

453. At 0558hrs incident 0077 is updated with victim injury details from WR434 PC 4152 Hope.

*"13/06/2023 05:58:11 WR434 - UPDATE BROKEN CLAVICAL STILL
UNABLE TO SPEAK TO US BUT IS CONSCIOUS 3001175"*

454. At 0559hrs (TG1199) Inspector Shaw asks for an update on the victims at Market Street. The update is given as *"two victims, one with laceration to back of head but breathing and talking, other on spinal board with back and neck pain but breathing and talking. Unknown if life threatening or life altering."* (URN: NGPF0004837 - Recording reference 20230613_045912000000_677000003_3029_1).

455. At 0559hrs (TG1205) OFZ4 PS 755 Hallam asks if someone can collect another vehicle for OF48 PC 3288 Yallop and PC 4550 Bower from headquarters to replace their one with a flat tyre. The FIM authorises an officer to do this. (URN: NGPF0004957 - Recording reference 20230613_045919000000_677000003_3022_1).
456. At 0559hrs incident 0077 is updated with injury details from the van attacks.
- "13/06/2023 05:59:06 WR434 - POSSIBLE BRAIN INJURY 3001175"*
- "13/06/2023 06:00:15 SR442 - 2X IPS - 1 WITH BAD LACERATION TO BACK OF HEAD, FAINT AND LOSS OF COLUR, BREEATING AND TALKING FEMALE ON A SPINAL BOARD - AGAUIN C&b 3001175"*
457. At 0600hrs (TG1205) OF41 PC 35 Speeden asks if we have a VRM for the van and if so whether we have considered doing a welfare check on the registered keeper of the van. (URN: NGPF0004958 - Recording reference 20230613_050013000000_677000003_3022_1).
458. At 0601hrs (TG1205) there is a radio discussion between the TFC and OFC to confirm PC 3288 Yallop and PC 4550 Bower are down because of a flat tyre but PS 755 Hallam and PC 3912 Graham and PC 1978 Goddard and PC 35 Speeden are still mobile in the city centre. The OFC PC 35 Speeden confirms that is correct, but they (OF41) have no medical kit left in their vehicle and he is unsure what PS 755 Hallam and PC 3912 Graham have in their car. The TFC confirms he is happy for them to remain at armed authority whilst he speaks to neighbouring forces. The FIM then explains he is not intending to get all of the neighbouring force ARVs into the city as per the Op Plato plan, but he is going to ask them to push an ARV into the County each as a contingency should he need them as we only have two ARVs available at the moment. PS 755 Hallam shouts up to say there are three morning shift officers in the gym before their shift who have just been spoken to, and they are going to kit up early and make

themselves available. When the FIM mentions asking neighbouring forces to push an ARV into the County, I interpret this as him directing that they are not required to travel directly to the city area but he does want them to be within the Nottinghamshire force boundary to provide additional resilience in the event that any further threats are identified. (URN: NGPF0004961 - Recording reference 20230613_050120000000_677000003_3022_1).

459. At 0601hrs incident 0077 is updated with request for welfare check on registered keeper of van from OF41 PC 35 Speeden:

"13/06/2023 06:01:29 OF41 - CONFIRMED VRM IS FD64LUJ - CAN WE GET A WELFARE CHECK AT THIS ADDRESS FOR REG KEEPER 3005126"

460. At 0602hrs (TG1199) officers are directed to the Maple Street scene at the request of the FIM. Sergeant states sufficient resources at Milton Street. The control room ask for other units to assist with the scene on Magdala Road. Several officers volunteer and are directed. (URN: NGPF0004843 - Recording reference 20230613_050238000000_677000003_3029_1).

461. At 0603hrs (TG1205) the OFC OF41 PC 35 Speeden contacts the TFC stating his only concern at the moment is in relation to the van that the offender was stopped in that is registered to an address with a different named person on the insurance. The FIM interrupts to explain there is a deceased person at Magdala Road and that person is the keeper of the van. The FIM explains that the working assumption is that the subject has robbed him of his van, killing him, and then driven to Milton Street and on to where he has been detained. PC 35 Speeden acknowledges the update and asks whether the keeper address is close to Magdala Road and whether we know if the van has been taken on the street or the subject may have been into an address. The FIM explains he doesn't know but they are currently plotting a route from Magdala Road to Milton Street to where the suspect has been detained so we can check for casualties along that route. The OFC reiterates his concern is in case the van has

been stolen from an address. The FIM explains he will task RTIU. (URN: NGPF0004963 - Recording reference 20230613_050302000000_677000003_3022_1).

462. At 0604hrs incident 0079 is updated with details of officers committed with van scene:

"13/06/2023 06:04:56 CR410, SR435 WITH THE VAN SCENE 3002051"

463. At 0605hrs (TG1199) Inspector Spooner asks for a Sergeant to be directed to manage Magdala Road scene. SRZ43 TPS 2983 Bravant volunteers as he is already in attendance. (URN: NGPF0004845 - Recording reference 20230613_050446000000_677000003_3029_1).

464. At 0605hrs incident 0079 is updated with details of officers committed on Magdala Road scene:

"13/06/2023 06:05:58 SR439, SR443, SR434, SRZ43 WITH THE 1/1 BODY SCENE 3002051"

465. At 0605hrs (TG1199) the FIS reminds all officers of the importance of radio discipline due to number of officers on the channel. (URN: NGPF0004847 - Recording reference 20230613_050556000000_677000003_3029_1).

466. At 0605hrs (TG1199) the control room update that it has now been confirmed no scene is required on van stop location and just full forensic lift of the vehicle (URN: NGPF0004855 - Recording reference 20230613_051046000000_677000003_3029_1).

467. At 0606hrs (TG1205) OF41 PC 35 Speeden (OFC) asks if checks have been done on the suspects home address in case and if any checks need to be carried out there. The control room confirm checks are being done by RTIU. The FIM updates that the van is registered to Bulwell and officers have been tasked to conduct checks although believe highly unlikely

subject made his way there. (URN: NGPF0004964 - Recording reference 20230613_050604000000_677000003_3022_1).

468. At 0606hrs we received a 999 call from a local resident [GRO-B] saying he has seen a black male stabbing a male in the stomach. I can see contact record CR0165_13062023 was created at the time of this call but this is one of the calls where the audio was not recorded. I now refer to this as URN: NGPF0007955.
469. I can see from the contact record that the 999 call was received at 0606hrs on 13 June 2023. The caller's contact number, name and address are listed as is the incident location, which is documented as MAGDALA ROAD, NOTTINGHAM, NOTTINGHAM CITY, NG5 2BY.
470. The text within the contact record summary is shown below:
- "caller saying he has seen a black male stabbing a male in the stomach - went off in a van drove very -updated the inc"*
471. It is clear from the contact log summary that the call handler has updated incident 0079_13062023 with the information from this call and I can see the update below is showing on the incident log at 0617hrs:
- "13/06/2023 06:17:46 %% call from [GRO-B] was fetching his wife from work and witness a black male stabbing a white male ng15 - they are living [GRO-B] he is very frightened as the male saw him and his wifes faces - he is living in a room with his wife and 5 children - [GRO-B] caller is romanian speaks broken english 3003446."*
472. At 0610hrs incident 0079 is updated from RU443 PC 1208 Brady-Johnson that the victim of the stabbing on Magdala Road is the owner of the van used in the other incident:

"13/06/2023 06:10:44 1208 - VICTIM OF THE STABBING ON MAGDALA ROAD IS THE OWNER OF THE VAN USED IN THIS INC 3002051"

473. At 0610hrs the MCU Sequence of Events indicates VC arrives at the police custody suite (URN: NGPF0004340).

474. At 0610hrs incident 0079 is updated from the FIM that the DCI wants a full forensic lift of the van rather than a scene. SRZ43 TPS 2983 Bravant updates that a witness has informed him the suspect tried to gain entry to another local property at about 0415hrs this morning:

"13/06/2023 06:11:04 FIM - DCI wants full forensic lift on van, not a scene 3004783"

"13/06/2023 06:11:37 srz43 - been informed by mop that suspect tried to gain entry to 66 seeley hurst rd at about 0415hrs this morning 0768383"

475. At 0611hrs (TG1205) all officers from the Newark response area are requested to travel to Noel Street to assist with road closures. (URN: NGPF0004859 - Recording references 20230613_051423000000_677000003_3029_1 and URN: NGPF0004858 Recording reference 20230613_051356000000_677000003_3029_1).

476. At 0613hrs (TG1205) two day shift ARV officers shout up having booked on early and ask the OFC for direction. The OFC updates them that an armed authority is in place; Op Plato has been declared and asks them to make their way down into the city and remain in close proximity to the city on arterial routes. Confirmation is also provided that a replacement vehicle for OF48 - PC 3288 Yallop and PC 4550 Bower is already on route. (URN: NGPF0004973 - Recording reference 20230613_051305000000_677000003_3022_1).

477. At 0613hrs incident 0079 is updated with info from SRZ43 - PS 2983 Bravant that the male didn't get entry to the premises (Seely House):

"13/06/2023 06:13:04 2983 - MALE DIDN'T GET ENTRY TO THE PREMISES 3002051"

478. At 0614hrs incident 0079 is updated that DI Smithson of EMSOU is heading to Magdala Road and DI Gibson is going to Ilkeston Road:

"13/06/2023 06:14:05 Call from DI Smithson EMSOU 515 [GRO-B] requesting details she is heading to Magdala road scene, clare Gibson is heading to Ilkeston Road scene 3005123"

479. At 0616hrs we received a 999 call from [GRO-B] who reports a stabbing near [GRO-B]. I now refer to the audio recording of this call as URN: NGPF0002232. I can see contact record CR0172_13062023 was created at the time of this call, which I now refer to as URN: NGPF0007957.

480. I have listened to the recording of this call which lasts 11 minutes and 16 seconds. The call takes some time to answer, during which the high call demand recorded message is being repeated, and the caller can be heard speaking to a person he is with clarifying events. When the call is answered the caller states he is calling from [GRO-B] [GRO-B]. He states he is calling on behalf of Ivan because he thinks someone has been stabbed. The caller explains the Police are all around the scene but an officer, collar badge 3234, has told him to call it in anyway because they have him on CCTV trying to get into this property.

481. The caller is asked to confirm the address, which he provides as [GRO-B] [GRO-B]. The caller states that around the incident Ivan has confronted him, and he has gone round the corner. The caller explains that Ivan said he heard shouting after that, around 0515hrs. He then also explains that Ivan can't leave the building but now he is hearing someone has been murdered.

482. The caller is asked to confirm who Ivan is. The caller confirms he is the security officer at the building. The caller explains he is calling on behalf

of Ivan. The call handler confirms if he has the male on CCTV. The caller confirms he does and has looked at him. He states he has already described him to the officer but will do it again. The caller then goes on to describe the male as having a beanie hat on or balaclava kind of hat, he had a beard, he was black, he was about 6ft and he was in black. He also had a black rucksack and there was something red like a cloth. The caller then gives his name as [GRO-B]. The caller states he hopes the person is ok and the call handler states a major incident is happening at the moment.

483. The call handler asks if the caller has the whole incident on CCTV. The caller clarifies that he doesn't have the murder on CCTV, but he has tried to get into their property just before it happened. The caller states at 0511hrs – 0515hrs Ivan has asked the male to leave but he was asking what the property was. Ivan told him it was a hostel, but the male carried on trying to get into an open ground floor window, but Trevor shut it.
484. The caller explains that Ivan then asked him to leave, and the guy left. Ivan can't leave the building because he protects 50 men at the property, but then he hears a lot of shouting from around the corner. Ivan is Hungarian and came into the caller's room and woke him up as he sometimes helps with security.
485. The call handler asks the caller to confirm the description again. The caller confirms he was a black male with a beard and a beanie hat. He states Ivan said he was about 6ft tall and he had a black rucksack which has something red sticking out the back, possibly a quilt cover. The caller then states he was dressed all in black.
486. The call handler then summarises what has happened, and the caller confirmed that Ivan spoke to the male face to face and he asked him what the building was. Ivan told him it was a hostel but said he needed to go. The male made multiple attempts to get into the window before leaving and seemed calm at the time he was speaking to Ivan.

487. The call handler asks what happened after that and which way the male went. The caller can be heard discussing with Ivan and then states that about four minutes after the male left Ivan heard some big shouting, which the caller assumes was the male in question being attacked. The caller couldn't see around the corner because it is on the neighbouring street which the police have already cordoned off. The caller is asked if the screaming was from a male or female. The caller discusses with Ivan and then said it was very loud but could have been one. He then clarifies it sounded like one attacker and one guy screaming. The call handler asks the caller to remain on the line whilst he speaks to his supervisor.
488. The call handler comes back on the line and takes the caller's name and contact number which are provided. The caller is then asked to provide Ivan's full name and contact details which are provided. The call handler confirms that Ivan spoke to the male face to face but wasn't injured and he didn't make any threats. The caller checks with Ivan and confirmed no threats were made. The caller is asked if Ivan saw any weapons. The caller confirms with Ivan no weapons were seen, and the male was calm throughout his interaction with Ivan. The call handler explains he will have to go as other calls were coming in but someone will be in touch. Call ends.
489. At 0617hrs incident 0079 is updated with details of call from **GRO-B** **GRO-B** that they witnessed a stabbing:
- "13/06/2023 06:17:46 %% call from **GRO-B** was fetching his wife from work and witness a black male stabbing a white male ng15 - they are living **GRO-B** he is very frightened as the male saw him and his wifes faces - he is living in a room with his wife and 5 children - **GRO-B** caller is romanian speaks broken english 3003446"*
490. At 0624hrs incident 0079 is updated that officers have been given information from a member of the public that the suspect had been trying

to get into other properties. The log is also updated with details from the call from **GRO-B** and the suspect's interaction with the security guard Ivan:

"13/06/2023 06:24:14 2983 - INFORMATION HAS COME FROM THE MOP THAT THE SUSPECT HAS BEEN SEEN TRYING TO GET IN. OFFICERS ON SCENE MAKING H2H ENQS 3002051"

*"13/06/2023 06:24:31 %% FURTHER CALL **GRO-B** **GRO-B** - IVAN **GRO-B** **GRO-B** - MALE IVAN IN SECURITY WAS IN BUILDING AT A/A AND SEEN THE STABBING , CCTV OF MALE TRYING TO GET INTO PROPERTY AT 0511HRS TO 0515HRS MALE WAS ASKING IVAN TO LET HIM IN AND ASKING WHAT THE BUILDING WAS , MALE WAS DESCRIBED AS A BLACK MALE WITH A BEARD AND BEANIE HAT ON , AROUND F600 , RUCKSACK WITH RED CLOTH ON IT , DRESSED ALL IN BLACK - AFTER 4 MINS OF MALE LEAVING LOTS OF LOUD SCREAMS WERE HEARD 4000006"*

"13/06/2023 06:24:57 IVAN SPOKE TO THE MALE FACE TO FACE AND WASNT INJURED OR ANY THREATS MADE 4000006"

491. At 0625hrs incident 0079 is updated with a query as to whether the suspect might live at Seeley Hurst House that he was trying to enter. There is an update from RTIU that he was trying to access the premises rather than him residing there:

"13/06/2023 06:25:15 SRZ43 DEALING WITH SEELEY HURST HOUSE ENQS - DOES THE SUSPECT LIVE THERE ETC 3002051"

"13/06/2023 06:25:16 RTIU NOTED SEELY HIRST HOUSE WAS MALE TRYING TO ACCESS RATHER THAN RESIDE 3001128"

492. At 0631hrs incident 0079 is updated from SR435 PC3943 Spibey and PC 2477 Knight that within the van a rucksack and two knives have been found:

"13/06/2023 06:31:18 %%SR435 - ITEMS IN THE VAN. A FEW 12INCH DAGGER IN FOOTWELL, BLACK RUSKSACK CONTAINING A 12 INCH KITCHEN KNIFE WITH A CREAM HANDLE AND A BRONZE BLADE. POTENTIALLY SOME STAINAGE ON THE KNIFE IN THE RUCKSACK 3002051"

493. I have been asked to provide a timeline of the sequence of events on 13 June prior to the arrest of VC. The sequence of events described above outlines when the police were called, by who, and what was said. This timeline also includes the key messages, reports and briefings that were relayed to officers. I have deliberately included a short period after VC was arrested as significant developments were still taking place in the city centre and at the Magdala Road scene in this period. I felt these were important to include in the chronology for completeness.

Summary and observations of the police response to incident 0065

494. In relation to incident 0065 on Ilkeston Road, based on the material I have reviewed, I make the following observations. The primary 999 calls received by the control room at 0403hrs and 0404hrs were answered very promptly. They were quickly identified by the call handlers as being an emergency incident. Incidents 0065 and 0066 were promptly created as emergency incidents. Incident 0066 was appropriately closed with detail being added to incident 0065 as the master incident.
495. The call handler correctly identified this was an emergency and appropriately created a Grade 1 incident. Recognising that dispatch and supervisory colleagues would be coordinating an emergency response, key information was quickly obtained from the caller and added to the log. This enabled the almost immediate deployment of officers to the correct location.
496. As the caller was still on the line, and whilst information was still being added to the log, the dispatchers quickly recognised the incident as an

emergency and immediately requested any available officers attend the incident location to a report of a stabbing.

497. I note that at 0404hrs, the same time the incident is created, specialist officers from Operational Support are already being deployed on TG1199. This included firearms officers, with enhanced lifesaving capability, dog handlers and the drone. The FIM can also be heard to almost immediately authorise Taser as a contingency. I believe this was appropriate given the nature of the report appeared to involve a short-bladed weapon. The FIM adds detail of this promptly to the incident log.
498. At 0405hrs, and within one minute of the incident being created, multiple local officers have also been informed of the incident and are travelling to the location as an emergency response. (URN: NGPF0008336 - Recording reference 20230613_030533000000_677000003_3008_1_1).
499. At 0405hrs a call is made from the police control room to the East Midlands Ambulance Service (EMAS) control room to inform them we are responding to a stabbing incident and request ambulance assistance (URN: NGPF0001772).
500. As officers are travelling to the area additional information is being given to officers on both TG7 and TG1199 with details of what has been reported, a description of the suspect, and the last known direction of travel for the suspect. I have already noted some slight inconsistencies in the information that was relayed to officers.
501. By 0407hrs we had received two further 999 calls. As details of those were being taken at least one local unit, SR442 - PC 3821 Reynolds was directed to dedicated search activity for the suspect and was approaching the incident location from the city centre, where the suspect had been described as heading towards.

502. At 0407hrs one of the control room Sergeants adds some initial directions for attending officers to incident log 0065 as below. This is appropriate guidance for officers attending an incident of this nature and lists some important fast track actions:

13/06/2023 04:07:36 %%FIS - This is a report of a stabbing.

- Officers to attend and activate BWV
- Obtain an account from the victim
- Secure accounts from witnesses
- Early CCTV enquiries to be conducted
- Search to be conducted for any weapon
- Locate and secure a scene if necessary
- Early obs for potential offenders considering cross contamination.

503. At 0407hrs (TG7) officers are updated with further information from the second caller who believed someone may have been robbed. Male and female victim. One on floor and one walking off. Offender described as possibly wearing a hoody and walking towards city centre. (URN: NGPF0005089-

Recording reference 20230613_030706000000_677000003_3008_1_1)

504. At 0407hrs (TG1199) the FIM reminds all ARV officers to use their Body Worn Video (BWV). An officer shouts up to ask if there is any known direction of travel for the suspect and is told not yet. (URN: NGPF0004722 - Recording reference 20230613_030743000000_677000003_3029_1).

505. At 0408hrs RU443 - PC 4057 Clarke and PC 1208 Brady-Johnson arrive as the first officers on scene. This is within five minutes of the first 999 call at 0403hrs and within four minutes of the incident being created at 0404hrs. I would describe this as an exceptionally fast emergency response and well within the 15-minute target time for emergency incidents in urban areas.

506. Upon arrival, the first officers on scene immediately rush to provide first aid to the male victim which is exactly what they should prioritise. At the same time officers are updated by the control room of a female victim also being reported. The officers working on the injured male report back that he has serious injuries, and they need urgent support from EMAS.
507. As this is going on the OFC asks if armed authority is being considered to search for the offender. The FIM states the priority is victims for the moment. The FIM references reports of a second victim, a female on other side of the road.
508. Based on the information and intelligence available to the FIM at that time I agree with their decision to prioritise lifesaving of the victims. The details of the suspect were not known, the description was not exceptional for that locality, black male dressed all in black, and there was nothing at that time to indicate an immediate threat to other members of the public or police.
509. At that time potential hypotheses for the attack could have included a robbery, as suggested by one of the callers, an attack by a person known to the victims, or an attack linked to a precursor incident such as an argument in the street or a late-night venue, as is not uncommon in the nighttime economy. There was no information known or available to the FIM at that time which would have strongly indicated to me the random nature of the attack or the marauding intent of the suspect.
510. Had the FIM taken the decision to grant an armed authority and prioritised the armed officers towards an immediate search for the suspect, it would have prevented them from immediately attending to the victims and providing significantly enhanced lifesaving capability far above the level of response officers. In my view it was the correct decision by the FIM to direct the ARV officers to attempt to save the lives of the victims and direct other officers to conduct an area search for the suspect. I believe this decision is line with the National Decision Model (NDM), College of

Policing Approved Professional Practice (APP) Armed Policing, the Code of Ethics, ECHR obligations, and our core duty to protect life.

511. The NDM is a framework for decision making developed by the College of Policing to support police decision makers adopt a structured approach. Using the model encourages officers and staff to act in accordance with the Code of Ethics and use their discretion where appropriate. It also reduces risk aversion and weighs the balance of resourcing against demand, threat and risk.
512. The NDM has six key elements:
- Code of Ethics
 - Gather information and intelligence.
 - Assess threat and risk and develop a working strategy.
 - Consider powers and policy.
 - Identify options and contingencies.
 - Take action and review what happened.
513. In stating that I believe this decision of the FIM is in line with the NDM, I am simply saying that, in my professional view, based on the information and intelligence available to the FIM at the time, I agree with their decision.
514. The Code of Ethics dated July 2014, which I now refer to as URN: NGPF0007959, was developed by the College of Policing to support police decision makers in making ethical decisions. It was refreshed in 2024 with the updated Ethical Policing Principles of Courage, Respect and Empathy, and Public Service. At the time of this incident the previous iteration of the Code of Ethics was still in place. This was underpinned by the principles of:
- accountability
 - honesty
 - integrity
 - leadership

- objectivity
- openness
- selflessness
- fairness
- respect

515. In stating that I believe this decision of the FIM is in line with the Code of Ethics, I am simply stating that, in my professional view, based on the information and intelligence available to the FIM at the time, their decision was compatible with these principles.

516. In referencing ECHR, I am referring to the positive duty on policing to protect human life, which is rooted in Article 2 of the European Convention on Human Rights (ECHR). I now refer to this as URN: NGPF0007938. This obligation requires police to take preventive, operational measures to protect a life when they know or ought to know there is a real and immediate risk to an identified person. This duty involves providing first aid, minimising the use of force, and ensuring police responses are appropriate and necessary to achieve a legitimate objective.

517. In referencing our core duty to protect life I am referring to the core operational duties of the police which include:

- protecting life and property
- preserving order
- preventing the commission of offences
- bringing offenders to justice

518. At 0409hrs (TG7) officers update that GRO-D and he has multiple stab wounds, including three to his chest. Officers ask for a CAT1 response from EMAS. This in my view is the first point at which information is available which indicates the exceptional nature of this incident. Whilst stabbing incidents are unfortunately not uncommon, particularly in the city area, it is less common for attacks with this level of

injury to occur. (URN: NGPF0005094 - Recording reference 20230613_030905000000_677000003_3008_1_1).

519. By 0409hrs, within six minutes of the first call, the local Sergeant is on scene with several other officers. For a supervisor to be on scene this quickly after a report of a serious incident is also in my view an exceptionally quick response. The presence of a Sergeant on scene provides greater scope for direction and coordination of police resources to enhance their effectiveness.
520. From the material I have reviewed, I can see that the Sergeant is actively involved in first aid as well as providing direction to other officers and updates back to the control room. The Sergeant also recognises the additional lifesaving capability of the ARV officers and immediately asks for their support on arrival. This is further evidence that training and equipment beyond that of response officers was required and supports the decision making of the FIM to direct ARV officers straight to the scene.
521. At 0410hrs, seven minutes after the first 999 call, the first ARV (OFZ4 - PS 755 Hallam and PC 3912 Graham) arrives on scene which happens to also be the armed policing Sergeant. Whilst this is also a quick response for specialist resources, I would have expected that to be the case given the relative proximity of the scene to the city centre, and the armed patrol strategy which seeks to provide constant armed response capability in that immediate locality. The attendance of a second Sergeant provides yet more supervisory resilience to assist with the direction and coordination of police resources.
522. As the firearms Sergeant (OFZ4 – PS 755 Hallam and PC 3912 Graham) arrives at scene it quickly becomes apparent the female victim has been found, and the ARV officers separate to provide support to their colleagues. PC Graham is engaged in providing first aid on the male victim. PS Hallam provides first aid to the female victim and is engaged in CPR until the ambulance arrives. This is what I would expect them to do

and allows them to maximise the immediate benefit of their enhanced training and equipment to both victims at the same time. Both ARV officers immediately engage in efforts to save the lives of the victims and provide support and direction to response colleagues.

523. By 0410hrs the RPI has been informed of the incident and by 0411hrs more officers are arriving at Ilkeston Road and continuing to support significant first aid activity to the seriously injured victims. I can see from the BWV footage a significant number of officers are engaged with first aid for both victims. As I would expect, the officers work as a team to address visible injuries, commence CPR, remove clothing, check for other injuries, keep the control room updated, and continue to request support from ambulance.
524. At 0411hrs (TG1199) the OFC (OF41 - PC 35 Speeden), shouts up to say that he understands the priority is the victims, but he is concerned about the offender with unknown whereabouts, and it is unknown if there are going to be any future potential victims or if the offender might return to the scene. The dispatcher updates that Oscar1 (FIM) was listening to him. PC 35 Speeden then updates they are arriving at scene and ambulance had also arrived. OFZ4 PS 755 Hallam immediately shouts up to say they have a female not breathing and CPR has been started. PS 755 Hallam can then be heard to shout other officers to bring the chest seals. (URN: NGPF0004732 - Recording reference 20230613_031129000000_677000003_3029_1)
525. This is the second time the OFC has suggested armed officers should be used to search for the suspect. Whilst it is not inappropriate for the OFC to raise this for consideration by the TFC, for reasons I have already explained I agree with the decision of the TFC to prioritise lifesaving. It is not in debate that search activity should simultaneously be happening to locate the suspect. It should and it is. In terms of whether it needed to be done by armed officers at that time, I agree with the decision of the TFC. Based on the information available, it was most appropriate for the ARV

officers to provide enhanced lifesaving support whilst other officers, including dog handlers and taser equipped officers, conducted a search for the suspect.

526. At 0411hrs the OFC (PC 35 Speeden) arrives at the scene, and I have seen on the BWV footage they are immediately shouted for support by PS 755 Hallam who asks them to rush chest seals to the female victim. As PS 755 Hallam continues to work with the paramedic and other officers to continue CPR and stop the bleeding, PC 1978 Goddard is preparing chest seals whilst PC 35 Speeden is preparing the defibrillator and oxygen tank. The immediate requirement for PC 1978 Goddard and PC 35 Speeden to support lifesaving efforts, despite the large number of officers already in attendance, underlines the value their additional training and equipment was able to offer in efforts to save the victims.
527. At 0411hrs the incident log is updated to say the female has three stab wounds to the abdomen and is not moving or breathing. This in my view constitutes another significant update which highlights the exceptional nature of the incident. Whilst stabbing incidents in the city area are not uncommon, female victims of stabbing incidents are relatively rare. Double stabbings, with life threatening injuries of such a severe nature, in a public place, are exceptionally rare. Whilst there still could be multiple motives for the attack, I would expect the TFC to reconsider the threat and risk associated with the incident based on these significant updates about the level of injury to the victims.
528. One of the things I would expect from such a review is consideration as to the potentially greater risk the subject may pose to unknown future victims, members of the public in their vicinity and police officers. If such a review took place, I have not seen evidence of it being communicated to officers in the airwave transmissions and incident logs I have reviewed.

529. At 0412hrs an updated description of the suspect is provided by officers on scene and the control room confirm this has been heard by SR442 - PC 3821 Reynolds who is actively involved in a search for the offender.
530. At 0413hrs the dog handlers OD42 - PC 3809 Marshall and OD41 - PC 1721 Whysall arrive in the area. PC 1721 Whysall confirms the suspect headed up Ilkeston Road and states he will commence an area search. The control room provide the description as a black male, all in black, wearing a black hoody and carrying a black bag. The prompt deployment of the dog handlers has enabled them to be on scene within 10 minutes of the first 999 call. I would say this is an exceptionally quick response for specialist officers to get on scene well within the target time for an emergency incident. The vehicle telematics data for PC 1721 Whysall shows their search covered an extensive area.
531. Dog handlers are, by virtue of their experience and training, very proficient in searching for suspects and have the enhanced capability of scent detection provided by the dog. The dog also provides a higher level of officer protection, and the dog's speed and power can be used to chase, detain and subdue violent subjects. All dog handlers in Nottinghamshire are also taser officers. Police dogs are exceptionally capable in dealing with subjects on foot as was the case for the suspect described in this incident. It appears OD41 - PC 1721 Whysall immediately commenced a search for the suspect and OD42 - PC 3809 Marshall has gone to the scene to gather further detail about the suspect's description and last known whereabouts.
532. By 0413hrs the Inspector has arrived on scene. To have an Inspector on the ground at the scene of an emergency incident within 11 minutes of the first 999 call being received is an exceptionally quick response. The seniority of the Inspector provides operational oversight of all the activities of the officers responding to the incident and brings the ability to rapidly mobilise more officers if they deem it necessary.

533. At the same time more officers are arriving at the scene. As there are now sufficient officers engaged in rendering first aid to the victims, other priority actions begin to take place. Officers begin to speak to witnesses, consider CCTV which may help with information about the offender, and secure cordons to protect crucial evidence. Whilst this is going on it is identified that, due to where the victim was found, 316 Ilkeston Road needs to be searched to check for further victims. Entry is quickly gained, and the search is completed.
534. By 0415hrs more officers are arriving on scene and are directed by the Sergeant to commence witness enquiries, house to house, CCTV checks and establish cordons to protect evidence at the scene. By this time, a third dog handler OD43 PC 2400 Crabtree is arriving in the area to support the area search for the suspect.
535. By 0423hrs a further update to the description, and potential direction of travel for the suspect, has been passed to the searching officers. Property belonging to the victims has been found and enquiries are being made as to their identity.
536. By 0425hrs the third firearms car (OF48) arrives in the area and is tasked with supporting the area search for the suspect. An initial search of the area around the Cathedral has also been completed in relation to incident 0069. The log is also updated to show the Detective Inspector has been briefed on the incident and is travelling to the scene. The vehicle telematics data for OF48 - PC 3288 Yallop and PC 4550 Bower shows their search also covered an extensive area.
537. At 0432hrs there is a radio call between the FIM and Inspector at the scene to discuss the incident. It is clear both expect the victims may not survive and it will be a homicide. The Inspector confirms he has sufficient resources for all actions required at the scene and doesn't require any further resources. There is reference to the search for the suspect being ongoing although it doesn't appear the Inspector is clear which officers

exactly are engaged in this activity. The FIM confirms there is search activity ongoing but suggests the suspect is likely to be long gone by this point. This indicates the FIM had low confidence in finding the suspect now we are 29 minutes post the initial 999 call.

538. At 0434hrs the control room Sergeant is redirecting some of the resources engaged in the area search to assist with a more thorough search in the Derby Road area, noting the proximate nature of these calls that fit within the potential direction of travel (towards the city) given for the suspect. Several officers, including firearms, dogs, drone and local units are tasked to the area and directed to coordinate a more thorough search to include both vehicle and foot searching of the local area. Officers are appropriately updated by the control room Sergeant that the incident is potentially linked and the search is required due to the location being close to the Ilkeston Road incident.
539. Having looked at the timing and location of the calls to Ilkeston Road and Derby Road, it would have been challenging for an individual to cover this distance on foot, between the time the calls were made. I estimate this to be a distance of slightly less than one mile, which would take in the region of 20 minutes to walk. However, if the suspect had gone directly from the scene toward the city, as the first two callers reported, this is the area he would pass through on the most direct route. In my view it was sensible to consider these incidents could be linked given the calls related to a woman screaming and the possibility the suspect may have covered the distance more quickly by some other means.
540. Over the next 50 minutes activity continues at the Ilkeston Road scene whilst substantial search activity is taking place around the two calls of a woman screaming in distress in the Derby Road area.
541. At 0515hrs there is an airwave discussion between the control room Sgt (FIS) and the Inspector at the scene. During this discussion, the Inspector confirms again he doesn't need any additional support or resources from

the control room, and everything is in hand at the scene. The FIS updates the Inspector he has directed officers to conduct a more extensive search in the Derby Road area following the two 999 calls. Whilst the Inspector agreed with the approach taken it is clear the Inspector was not aware of these incidents or their potential connection to the Ilkeston Road incident. This discussion may indicate that the Inspector's focus had been consumed by the significant amount of activity at the Ilkeston Road scene, reducing their ability to maintain oversight of activities elsewhere.

Summary and observations of steps taken to find VC

542. I have been asked to consider all the steps taken by the police to find, pursue and arrest Valdo Calocane on 13 June 2023. As I have already outlined the number of officers, and breadth of specialisms, involved in search activity across incident 0065 and 0069 was significant.

543. The descriptions of the suspect, and their last known direction of travel were passed over the air by the control room initially and then again by officers at Ilkeston Road as new information came to light. Whilst this should have been heard by all officers on the channel this could potentially have been missed if an officer was on point- to- point, distracted, or indeed between the officers operating on TG7 and TG1199 in the same area. Point- to- point refers to a direct communication between two users which is not audible over the radio talkgroup. This is done by an officer, or the control room, entering the collar number or radio number of the other party and pressing the call button. Whilst this can be beneficial to pass direct or discreet messages to a specific officer the participants cannot hear the ongoing radio traffic on the airwave talkgroup unless they have another radio, such as a vehicle set, close to them.

544. Whilst it is easy to identify areas for improvement with hindsight, it would have been beneficial for the control room to be clear about the most recent description, the most recent direction of travel, and ensure all officers

engaged with the search received each update. This might have prevented the couple of occasions I have noted when the information passed to officers was not the most up to date description or direction of travel.

545. Similarly, it would have been beneficial if when any new information came to light, particularly if it is different to the earlier information, the control room ensured all officers engaged in the search received the update and considered tasking a specific resource to follow up the new information provided. An example of this would be the information from OD42 - PC 3809 Marshall that the suspect may have gone toward Hopedale Close, which was the first indication the suspect may have gone in a direction other than toward the city centre. As it happened several officers did search that area thoroughly but by the time that information was known the suspect was already a considerable distance away on Birkin Avenue.
546. With support from an analyst a short slide presentation has been prepared which shows the movements of VC from the time of the Ilkeston Road attack until the time when the Hopedale Close information is shared by PC Marshall. This shows that by the time this information was shared VC was a considerable distance away on Birkin Avenue. The slides also show that the area of the calls close to the Cathedral were directly in the area VC would have passed through had he proceeded directly towards the city centre as the first two callers described. (URN: NGPF0010081).
547. In terms of the coordination of officers engaged in the search it would be preferable for this to be coordinated by the control room dispatcher or a supervisor, so they could consider some of the factors I have mentioned. This would support officers to approach the search in a logical and structured manner to cover the maximum area in the most expedient and efficient way. Importantly, this would ensure officers are not unwittingly searching areas which have already been searched by their colleagues. The approach taken for searching incident 0069 demonstrated this well.

548. The other observation I would make is in respect of officer and public safety. As the search for the suspect was still going on it had become clear that the nature and extent of the injuries was extreme and had resulted in a double homicide. This type of incident is exceptionally rare and the motive and whereabouts of the attacker were not known. Considering this information the potential risk to the public, and officers who may interact with the subject, is increased.
549. Whilst this does not necessarily mean that the criteria for the deployment of armed officers would be met, it does necessitate some consideration as to the coordination of efforts to locate the suspect. This could include additional measures which may be needed to maximise the safety of officers conducting the search. This might include measures such as, a reminder officers must be in possession of their full PPE, a Stay Safe briefing, a do not approach / sightings only direction, the coordination of armed, taser and dog officers.

Steps taken by police to treat injured victims at incident 0065

550. I have been asked to consider all the steps taken by the police to treat the victims at the scene. With specific regard to our response to incident 0065, the material I have reviewed indicates the following officers were engaged in providing first aid to the victims.

- PC 3921 Alexander De'Ath (RR434)
- PC 207 Oliver Jackson (RR434)
- PS 3891 Ria Elliott (RRZ44)
- PC 870 Curtis Widdowson (RR431)
- PC 2157 Chloe Knowles (RR431)
- PS 755 Richard Hallam (OFZ4)
- PC 3912 Demi Graham (OFZ4)
- PC 808 Ilirjan Skenderaj (RR440)

- PC 2179 Dan Bird (RR440)
- PC 35 Jon Speeden (OF41)
- PC 1978 Jonathan Goddard (OF41)

551. As the first officers arrived at Ilkeston Road at 0408hrs they were initially only aware of the male victim. The first officers have immediately commenced first aid on the victim and worked together to provide support as quickly as possible. They immediately identified the serious nature of the injuries and relayed this to the control room. They reiterated the urgent need for an ambulance and asked for it to be prioritised as a CAT1 response.

552. The officers could see the male was bleeding heavily and begun to treat the stab wounds they could see GRO-D
GRO-D Officers found multiple wounds to his chest and legs and could see he was losing a lot of blood. Recognising the risk to life they worked together to try to stop the bleeding. Using equipment from their first aid kit they applied dressings and pressure to the puncture wounds on the victim's chest and applied a tourniquet to the victim's leg.

553. As this was going on the officers could hear that a second victim had been found. The response officers continued to monitor the victim's breathing and when necessary commenced chest compressions. They were joined by the ARV officer OFZ4 - PC Graham who quickly assessed the victim and could see the steps officers had already taken to stop the bleeding and check for further injuries. PC Graham provided some direction to officers about what to do next as she applied chest seals to the wounds on the victim's chest.

554. The male victim was initially breathing but unconscious. As the officers continued to monitor his breathing, they noticed that he stopped breathing and immediately commenced CPR. Officers continued to communicate

and support each other to do the best they could to treat the severe injuries. CPR continued until they were instructed by paramedics to stop.

555. A short time later officers were joined by an ambulance team and continued lifesaving efforts by applying pressure to wounds, continuing CPR and assisting with other activity at the direction of the paramedics. PC Graham assisted the paramedics by inserting an I-Gel to maintain the victim's airway and connected a defibrillator.
556. A Heli-med team then attended and took over control of the treatment of the victim. Officers remained in a supporting role following instructions from the medics and assisting in any way they could. The advanced medical team conducted surgery on the male on the street, **GRO-D** **GRO-D** as they used officers to hold IV drips, operate breathing apparatus and maintain pressure on other injuries.
557. Officers were then involved in lifting the male victim onto a stretcher and assisting the medical team in getting him into an ambulance. An officer then accompanied the victim to the QMC.
558. Within two minutes of the first officers arriving, and seven minutes of the initial 999 call, the female victim is found at 0410hrs. She is slumped against the doorway of 316 Ilkeston Road which is partly shielded from the road by a low wall which obscures her from view.
559. As officers find her, the first firearms team (OFZ4 - PS 755 Hallam and PC 3912 Graham) are arriving on scene and, as I have already described, PC 3912 Graham assisted the male victim and PS 755 Hallam tended to the female. I have seen from the body worn video that PS 755 Hallam and other officers run over to the female and attempt to rouse her. They support her from a slumped position onto her back and immediately identify multiple stab wounds to the front of her body.

560. PS Hallam and the other officers immediately begin first aid as they provide updates to the control room on the level of injuries and the urgent need for another ambulance. As the victim doesn't appear to be breathing CPR is commenced by PS 755 Hallam as other officers are still cutting away clothing to look for further injuries, whilst pressure and dressings are being applied to the multiple stab wounds which are visible.
561. As the officers begin to treat the female victim the first ambulance arrives with two paramedics. The paramedics also split themselves between the two victims and one paramedic quickly provides support to PS 755 Hallam and the other officers. As the second ARV arrives on scene (OF41 - PC 1978 Goddard and PC 35 Speeden) PS 755 Hallam shouts them for support and asking for chest seals. PC 35 Speeden and PC 1978 Goddard grab their first kit from their car and run to assist.
562. As PS 755 Hallam continues to work with the paramedic and other officers to continue CPR and stop the bleeding, PC 1978 Goddard is preparing chest seals whilst PC 35 Speeden is preparing the defibrillator and oxygen tank. Officers continue to provide first aid support under the direction of the paramedic. After a short time more EMAS staff arrive, and officers remain present actively supporting as instructed. Numerous officers are involved in lifting the female victim from the narrow entrance way onto the street and then into the ambulance. An officer then travels with the victim in the ambulance to QMC.
563. Based on the material I have reviewed it is clear to me that the officers and supervisors have appropriately prioritised efforts to save the lives of the victims. As officers have arrived on scene, they have immediately engaged in first aid efforts with the victims. The presence of the ARV officers has enhanced the level of medical assistance provided by police prior to the arrival of ambulance. It has also enabled the ARV officers to provide enhanced support to paramedics by performing tasks beyond the training of response officers. PC 3912 Graham inserting an I-Gel to maintain the male victim's airway is an example of this. This in turn

enabled the first pair of paramedics to simultaneously support both victims as they were supported by officers with an enhanced level of training.

Summary and observations of the police response to incident 0069

564. In relation to incident 0069 on Derby Road I have reviewed the incident log and I have also listened to the Airwave audio recordings for that area. The two 999 calls for this incident are received at 0408hrs and 0410hrs URN: NGPF0002222 and URN: NGPF0002224. The incident log for 0069 is created at 0409hrs, within one minute of the first 999 call.
565. At 0414hrs CR410 - PC 1683 Abid and PC 281 Ran Nunley are informed of incident 0069. They are already in the area so are shown as arriving at the same time and commence a search around Derby Road and the streets surrounding the Cathedral and The Park tunnel. This response time is within six minutes of the first 999 call and within five minutes of the incident being created. This is a quick response and well within our target time of 15 minutes in an urban area.
566. CR410 PC 1683 Abid and PC 281 Nunley phoned the caller back to see if he could offer any further information. They then conducted a search of Derby Road, around the Park Entrance near Park Row, and nearby areas all the way down to Maid Marion Way. During the search they did also speak to a female pedestrian who confirmed she was safe and well and did not report hearing any screaming in the area.
567. At 0425hrs, having not found anything suspicious, CR410 - PC 1683 Abid and PC 281 Nunley update the control room and resumed back to conducting an area search for the suspect from Ilkeston Road in the streets surrounding Radford Boulevard, Faraday Road and Hartley Road.
568. At 0434hrs the control room Sergeant recognises the potential connection and quickly coordinates multiple officers, including firearms officers, dog

handlers and the drone officer to support local units in doing a more thorough search. The FIS provides appropriate information to all the officers about the potential connection due to the location and circumstances of both incidents. The FIS also contacts the Sergeant from the neighbouring area and asks them to attend and coordinate the search effort to ensure a thorough job is done. Over the next 50 minutes or so an extensive search of the area takes place as officers look for the suspect and any potential further victims.

569. It was a good decision by the FIS to consider that these incidents could be linked, and a more thorough search was required to check there were no other victims or the suspect in this area. This was a well-coordinated and extensive search that used a mix of generalist and specialist resources, under the guidance of an appointed supervisor.

Summary of the police response to incident 0077

570. In relation to incident 0077 on Milton Street I have reviewed the incident log and I have also listened to the Airwave audio recordings for that area. The two 999 calls for this incident are received at 0523hrs and 0526hrs. The incident log for 0077 is created at 0525hrs, within two minutes of the first 999 call. It is appropriately graded as an emergency response.
571. At 0526hrs (TG7) the control room twice shout for any officers available for a Grade 1 incident on Milton Street with no response. This indicates all officers were already engaged with incidents. The FIS is clearly monitoring and immediately deploys OF48 PC 3288 Yallop and PC 4550 Bower to Milton Street as details are still coming in.
572. At 0526hrs (TG1199) officers ask for the direction of travel for the van. The direction of travel is given as towards Parliament Street, and a description of the van is provided. Immediately a number of officers, including an ARV, dog handler, drone officer and response officers travel towards the area

as the incident is updated with further information about the driver's description and condition of the injured victim.

573. At 0527hrs (TG1199) the location of the incident is given as across the road from McDonalds on Milton Street. The FIS appropriately instructs OF48 - PC 3288 Yallop and PC 4550 Bower that the priority is the male who has been injured, and they are trying to get some more resources.
574. As OF48 PC 3288 Yallop and PC 4550 Bower were not involved in first aid at the Ilkeston Road incident they still have a fully stocked enhanced first aid bag. At the same time the FIS asks Sergeant Barnett, who had been brought in from a neighbouring area (for incident 0069), if they have any units available to travel to city centre. WR434 - PC 4152 Hope and PC 509 Luxton and WU442 - PC 4401 Kenna and PC 4422 Read both volunteered. As this is happening EMAS are called, and CCTV control are also informed of incident.
575. At 0528hrs (TG1199) SR442 - PC 3821 Reynolds shouts up that they are behind that van (FD64 LUJ) on Parliament Street towards the tram tracks. The officer then shouts that the van is running people over and states two people are down. The direction is described as down Parliament Street towards Maid Marion Way. The FIS immediately comes on the air and asks for the firearms units to travel to that area. PC 3821 Reynolds then confirms two people have been ran over and he needs EMAS straight away. The FIS directs the officer to prioritise the victims and instructs him not to pursue. PS 3872 Barnett then directs that one unit is to go to Milton Street, and he will head to Parliament Street. The FIM can then be heard asking which ARVs are free. All ARV's respond. The FIM then states he is granting armed authority and notes the time as 0530hrs. The OFC confirms.
576. As this is going on the incident continues to be updated with a 3-minute ETA from EMAS of a single paramedic attending on a CAT1. RTIU confirm the vehicle has been added to the hotlist for ANPR notifications. Details of

a further 999 call stating the van had deliberately gone onto wrong side of the road to hit person are also added to the incident log.

577. At 0530hrs (TG1199) the OFC asks for reg again which is passed. PS 3872 Barnett updates on the two casualties he is with, both breathing and talking, one with a head injury. The Sergeant begins to coordinate the road closures required. Oscar 1 (FIM) then asks all ARVs to go onto TG1205. This is a dedicated channel for firearms operations and would allow the FIM (TFC) to brief and command the ARV officers without tying up the precious airtime needed by officers treating the injured victims and coordinating road closures to prevent further injuries and protect evidence.
578. OF48 PC 3288 Yallop then shouts up that he thinks TG7 officers are behind the vehicle, and he is trying to get in on the radio. As this is going on the log is updated with keeper information for the van and officers at Parliament Street are asking for more units to support them.
579. At 0531hrs (TG1205), within three minutes of PC 3821 Reynolds seeing the van run into the two victims on Parliament Street, the FIM declares Op Plato and gave the attack methodology as a van running pedestrians over. He provided the vehicle description and its last known location as officers updated him that they are already in the immediate area and are rapidly converging on that location.
580. At the same time, the incident log is still being updated with comms from other talk groups as CR410 PC 1683 Abid and PC 281 Nunley update that they have the vehicle in sight on Alfreton Road heading outbound. As the officer was giving the direction of travel for the suspect vehicle other officers are requesting road closures around the injured victims. PC 1683 Abid described the driver of the van as a male with dark skin approximately 25 years old.

581. At 0532hrs PC 3288 Yallop shouts up to inform the TG1199 dispatcher that TG7 officers are behind the van and he is going to drop in behind it any minute. Dispatch update Op Plato has been called on talkgroup 1201.
582. Inspector Shaw clarifies the number of casualties in the city centre and dispatch update they believe there are three. Sergeant Barnett confirms he is with two victims on Parliament Street and PC 509 Luxton and PC 4152 Hope are trying to find another victim on Milton Street.
583. At the same time on TG1205 the FIM updates the location of the van is now believed to be Bentinck Road, repeats Bentinck Road. OF48 PC 3288 Yallop shouts up to confirm they are just coming onto Bentinck Road now. On TG7 the Dispatcher requests the officer following the van moves onto TG1199.
584. On (TG7) the dispatcher requests all units from the neighbouring St Anns police station head towards Forest Recreation Ground and monitor TG1199 for further instructions. Officers can be heard to converge on the area of the van as CR410 PC 1683 Abid and PC 281 Nunley continue to update on its location and direction. (URN: NGPF0005170 - Recording reference 20230613_043301000000_677000003_3008_1_1)
585. At 0533hrs (TG1205) dog handler PC 1721 Whysall shouts up to say the white van has been abandoned. OF48 PC 3288 Yallop shouts up to say they are with the vehicle. Dispatch immediately shout OF48 to confirm their exact location but shouting comes back *"He's got a knife mate" ... "knife in his right hand"*.
586. At 0534hrs (TG1205) OF48 PC 3288 Yallop shouts up to say the male has been detained. The FIM responds to confirm male detained. PC 3288 Yallop confirms, states Taser has been deployed and says he thinks this will be the offender. The FIM asks for confirmation nobody has been hurt. They quickly confirm no further ARVs are required for the suspect and the

other firearms officers can assist on Milton Street. (URN: NGPF0004906-Recording reference 20230613_043445000000_677000003_3022_1).

Observations on the police response to incident 0077

587. My observations in respect of this incident are that from the time of the incident being created (0525hrs) to the time of the first sighting of the suspect vehicle (0528hrs) is only three minutes. This is a very quick response to this emergency incident.
588. When the suspect runs over two victims in front of an officer the control room Sergeant (FIS) immediately provides directions that first aid and lifesaving of those victims was the priority for that officer, and they were to stop and not follow the suspect vehicle. This was the right decision.
589. At the same time this is happening (0538hrs), the FIM is clearly listening to the incident and can immediately be heard on the air to ask for how many ARV officers are available for immediate deployment. This demonstrates the FIM was monitoring the incident and quickly assumed command when the threat to the public escalated.
590. The next two minutes are frenetic with updates about the direction of the suspect vehicle, the condition of the victims, road closures required at the scene and the FIM trying to coordinate tactical resources toward apprehending the suspect. At 0530hrs the FIM recognises that the volume of radio traffic is not conducive with an armed deployment and appropriately directs all ARV officers onto TG1205.
591. At 0531hrs, within six minutes of the incident being created, and three minutes of the van colliding with the two victims on Parliament Street, the FIM declares Op Plato and confirms criteria for arming is met and all tactics are in play. At the same time, the FIM is doing this I can see that information was coming in from a different talk group from an officer who was directly behind the suspect vehicle. The FIM immediately passes the

location of Bentinck Road to the team and officers respond that they are travelling towards that location and give their current location.

592. Given the live time updates were being passed by an officer on another talkgroup it is my expectation that officers would have been rapidly trying to listen to the other talkgroup via their vehicle sets or secondary radios to get the suspect location updates in real time. During this brief window of only two minutes the FIM allows the officers to communicate with each other as they converge on the suspect's location. OD41 PC 1721 Whysall and OF48 PC 3288 Yallop and PC 4550 Bower arrive at almost the same time and promptly subdue and detain the suspect.
593. Having declared Op Plato, and granted an armed authority, the FIM should then have provided an NDM briefing which included attack methodology, information and intelligence, threat assessment, working strategy, powers and policy and a tactical plan for dealing with the subject, including appropriate contingencies.
594. There are circumstances in which a condensed briefing can be provided due to a collapsing timeframe but in this case the FIM was only able to provide the attack methodology and that all tactics were available.
595. Having considered the time lapse of two minutes between the FIM declaring Op Plato and the suspect being detained it could be argued there was sufficient time for a more complete tactical briefing to be provided to the officers.
596. However, in the circumstances which the FIM was faced with I can see why he prioritised allowing the airwave to be free for updates on the suspects location to allow officers to coordinate their convergence towards the suspects location. Whilst two minutes was sufficient time to deliver a brief threat assessment, working strategy and primary tactic I believe it would have been difficult for the FIM to assess whether officers were seconds or minutes from coming face to face with the subject. The officers

were already trying to listen to two radios whilst plotting their route to intercept the suspect. In such circumstances the ARV officers, who are highly trained, need some capacity to discuss with each other their intentions, roles, priorities and contingencies upon arriving at the scene to confront a potentially lethal threat and prevent the escape of a dangerous criminal.

Steps taken by police to treat injured victims at incident 0077

597. In respect of the steps taken by the police to treat the victims at the scene of this incident I note that officers were quickly on the scene. A supervisor was also quickly on the scene and contact with EMAS was also made promptly.
598. SR442 PC 3821 Reynolds was attending Milton Street following a report of a non-stop Road Traffic Collision (RTC) and was travelling behind the white van when it hit two pedestrians on Upper Parliament Street. As directed by the FIS he prioritised first aid for the victims over following the suspect. He initially went to the injured female but could see a member of the public was already assisting her, so he went over to the male who was bleeding from his head. He applied a head dressing to the head to prevent blood loss, checked for other injuries, kept the control room updated and supported the victims until EMAS arrived.
599. WR434 PC 4152 Hope and PC 509 Luxton initially responded to Upper Parliament Street but as Sgt 3872 Barnett was already at that location, he directed them to Milton Street to try to find the other victim. As they got to Milton Street, they were flagged down by a group of people near a bus stop and found Wayne Birkett lying half on the road and half on the pavement. They rushed over to the victim and tried to reassure him. They recognised the potentially serious nature of blood coming from the victim's ear and updated the control room of the urgent need for an ambulance.

The officers were quickly joined by a medic and PC Hope supported them **GRO-D** and PC Luxton secured the scene. PC Hope then ultimately travelled with the victim in the ambulance. PC 508 Hughes also attended Milton Street and supported the paramedic in assessing and providing initial treatment to the victim before he went into the ambulance.

600. WRZ44 PS 3872 Barnett attended Parliament Street and tended to the female victim, Sharon Miller, on the floor. She was suffering from leg pain but he did not see any distinctive injuries. He was the first supervisor on scene. He knelt on the floor so the female could lean against him. When further officers and EMAS arrived he then attended the Milton Street scene to support the officers there.
601. The casualties from this incident, although seriously injured, were conscious and breathing. I can see the officers made an early request for EMAS, kept the control room updated on their injuries and used their first aid training to check for further injuries, comfort and reassure the victims until ambulance staff arrived.

Summary of the police response to incident 0079

602. In relation to incident 0079 on Magada Road I have reviewed the incident log, which I now refer to as URN: NGPF0007954, and I have also listened to the Airwave audio recordings for that area. The first 999 call for this incident is received at 0535hrs and the incident log was created two minutes later at 0537hrs.
603. At 0538hrs the control room supervisors are informed of the incident. At the same time Inspector Shaw is also informed of the incident and alerted to the potential link to the other incidents. The Inspector asks for a clothing description of the suspect detained from the van so the link can be

confirmed as quickly as possible. The call handler continues to update the log with details from the caller about the scene and the victim's injuries.

604. At 0539hrs (TG1205) OFZ4 PS 755 Hallam states he just checked in at Milton Street and they are ok, so he offers to travel to Magdala Road. The FIM states wants he EMAS to deal with that incident and needs the ARV's to remain free as he cannot yet discount the possibility of a further threat.
605. At 0539hrs (TG7) the first officers arrive at Magdala Road. This is only four minutes after the 999 call and two minutes after the incident is created. This is an exceptionally fast response and well within the 15-minute target time. Upon arrival they immediately request an ambulance and quickly updated that the victim has four puncture wounds to his chest and appears to be deceased, but they are attempting CPR. At the same time the control room are calling EMAS to request an urgent ambulance.
606. By 0541hrs the DI, who is still at the scene on Ilkeston Road, has been alerted to the incident and is providing some remote directions that a large scene is to be established at the Magdala Road incident. I note that this is within four minutes of the incident being created and shows prompt action to alert the DI so quickly and for them to be contributing to the police response.
607. At 0543hrs (TG1205) the firearms Sergeant PS 755 Hallam (OFZ4) states that he has spoken to the critical care team, and they are attending Magdala Road now. (URN: NGPF0004936- Recording reference 20230613_044327000000_677000003_3022_1).
608. At 0543hrs (TG1199) SR443 - PC 4150 Chapman arrives on Magdala Road and updates that officers are doing CPR. The officers updated that they have not yet managed to identify the injured male at Magdala Road. (URN: NGPF0004813 - Recording reference 20230613_044327000000_677000003_3029_1).

609. At 0544hrs (TG7) officers update that CPR is ongoing and victim ID details are given as Robert Ian Coates. (URN: NGPF0005189 - Recording reference 20230613_044316000000_677000003_3008_1_1; and URN: NGPF0005190 - Recording reference 20230613_044348000000_677000003_3008_1_1).
610. At 0545hrs the local response Sergeant SRZ43 PS 2983 Bravant arrives at Magdala Road. This is within seven minutes of the incident being created and I think represents a very quick response to get a supervisor to the scene so quickly. At the same time the updates on the log indicate EMAS have now been called and CCTV are also aware of the incident but have no cameras in the immediate area. EMAS were unable to provide an ETA.
611. At 0550hrs (TG1199) an officer updates that the air ambulance crew have arrived at Magdala Road and at the same time further officers are arriving and begin to secure the crime scene and speak to witnesses.
612. At 0606hrs we received a 999 call from a local resident **GRO-B** saying he has seen a black male stabbing a male in the stomach. It would not have been clear this was the same victim and introduces the possibility of another seriously injured victim in the locality adding to the confusion.
613. At 0610hrs incident log 0079 is updated with information from PC 1208 that the victim of the stabbing on Magdala Road is owner of the van used in the other incident.
614. SRZ43 PS 2983 Bravant updates that a member of the public (MOP) has informed him the suspect tried to gain entry to another local property at about 0415hrs this morning. This introduces another new dimension to the incident and the possibility of further victims in properties the suspect may have entered.

615. At 0614hrs incident 0079 is updated that two EMSOU MCU Senior Investigating Officers (SIO) are travelling to the incidents. One is heading to Magdala Road, and the other is going to Ilkeston Road.
616. At 0616hrs we received a 999 call from [GRO-B] who reports a stabbing near [GRO-B]. He goes on to explain the security guard at the premises had an interaction with the subject who also made multiple attempts to get into the building. He also confirms they have some CCTV of the incident.

Observations on the police response to incident 0079

617. In respect of the police response to this incident the initial deployment of officers is exceptionally quick. Multiple officers are promptly on scene despite very significant pressures on resources in the immediate area. The officers appropriately prioritise first aid, update the control room and request ambulance support. A supervisor is quickly on scene; the Inspector and Detective Inspector are promptly alerted to the incident and the potential connection to the other incidents. As further officers arrive the victim details confirm the connection to the van and several other key witnesses are identified as the crime scene is established and protected.

Steps taken by police to treat injured victim at incident 0079

618. In respect of the steps taken by the police to treat the victim at the scene of this incident I note that officers immediately rushed to the victim who had serious injuries and appeared to be deceased. They updated the control room with further detail of the injuries, requested an urgent ambulance and then conducted CPR until instructed to stop by medics. Their actions were in line with my expectations and their training.

Applicable Policies and Procedures

619. I have been asked to provide an explanation of the procedures that took place in effecting Valdo Calocane's arrest and any relevant underlying policies. In the course of reviewing this incident I have noted the below referenced procedures and policies were engaged.

a. Nottinghamshire Police Use of Force Policy

This policy describes its aim as: *"to provide a framework for accurately recording all Police use of force with a view to provide legitimacy to all communities within Nottinghamshire. To ensure that the recording is ethical, in line with current legislation. To provide procedures for scrutiny of the recorded data for performance development and organisational learning."*

This policy is relevant because force was used during the arrest of VC. I have no concerns about the force used in the arrest and in my view, it was entirely appropriate and proportionate to the level of threat he presented. I now refer to this as URN: NGPF0007960.

b. Body-Worn Video (BWV) Policy

This policy describes its aim as: *"to explain the approach to the use of BWV to all staff and members of the wider police family involved in the criminal justice system within Nottinghamshire, and to help inform the wider community of the strategic aims of the use of body worn video."* This policy is bespoke to Nottinghamshire Police and members of the wider policing family including strategic partners. I now refer to this as URN: NGPF0007961. It has been developed to allow common working practices and assists in compliance with the 12 guiding principles as detailed within the Surveillance Camera Code of Practice 2021 and the five body-worn video principles laid down by the National Police Chiefs Council (NPCC). I refer to the principles as URN: NGPF0008783. I now refer to the Surveillance Camera Code of Practice 2021 as URN: NGPF0010083. This policy is relevant because officers were using BWV during their response to this incident.

c. Incident Grading & Resolution Policy

This policy describes its aim as: *“to define the processes implemented by Nottinghamshire Police to risk assess calls for service under the existing incident grading and resolution policy.”* It aims to detail clear strategic and tactical guidance and provide clarity of individual and departmental purpose to ensure all calls to service and outstanding incidents are dealt with as efficiently and as effectively as possible and in line with the Force Vision, priorities and PROUD values. This policy is relevant because it governs the management of 999 calls, creation of incidents and response to emergencies. (URN (NGPF0007972))

d. Operational Support Firearms Policy

This policy describes its aim as: *“together with its associated standard operating procedures provides guidance documentation in relation to the current operational armed policing profile of Nottinghamshire Police.”* This document provides an overview of structure and governance in relation to armed policing service delivery within Nottinghamshire. This policy is relevant because armed officers were deployed, under an armed authority, to locate and arrest VC. I now refer to this as URN: NGPF0007962.

e. Notts Armed Response Vehicle Standard Operating Procedure (SOP)(URN)

This policy describes its aim as: *“to provide guidance to Police Officers within Nottinghamshire with regards to Armed Response Vehicle operating procedures. All ARV officers will be Authorised Firearms Officers (AFOs), trained to the ARV role profile in accordance with the National Police Firearms Training Curriculum (NPFTC) and the Nottinghamshire Armed Policing Strategic Threat and Risk Assessment (AP STRA).”* This policy is relevant because ARV officers were deployed to deliver first aid to the victims and to locate and arrest VC. I now refer to the policy as URN: NGPF0007963.

f. Notts Armed Policing Standing Authority

This policy describes its aim as: *“to provide a procedure for the effective management of and compliance with a Standing Firearms Authority in Nottinghamshire. To provide a working framework in order to ensure a safe system of work around the carriage of firearms by Authorised Firearms Officers (AFO) when deployed at Firearms Standing Authority.”*

This policy is relevant because ARV officers were deployed to deliver first aid to the victims and to locate and arrest VC. I now refer to this as URN: NGPF0007964.

g. Taser Standard Operating Procedure

This policy describes a Taser User as a ‘Specially Trained Officer’ (STO). I now refer to this as URN: NGPF0007965. This SOP relates to all STOs in Nottinghamshire Police and is not restricted to those officers in the Operational Support Department roles. Authorised Professional Practice (APP) remains the essential reference point for STOs for guidance/direction. The latest version of APP should be checked by officers referring to this SOP. This policy is relevant because Taser officers were deployed in relation to this incident and VC was tasered in the course of being arrest. I now refer to the APP as URN: NGPF0010086.

h. Body Worn Video for AFOs

This policy describes its aim as: *“to form the Operational Guidance for the use of Body Worn Video (BWV) by Nottinghamshire Police Authorised Firearms Officers (AFO’S) and is to be read in conjunction with the East Midlands Body Worn Video Procedure v1.8. Particular attention is drawn to the specific instructions for armed officers in respect of when to start recording and the Post Incident Process.”* This policy is relevant because Authorised Firearms Officers (AFO’s) were deployed to this incident and used their BWV. I refer to the East Midlands Body Worn Video Procedure V 1.8 as URN: NGPF0008784.

i. Armed Policing Command Protocols

This procedure has been developed in line with APP Armed policing (URN: NGPF0010086), and the National Police Firearms Training Curriculum. The

SOP contains specific guidance from APP with practical application notes to assist in command practice. The purpose is to ensure incidents that require the Firearms Risk Assessments, planning and deployment of armed officers are conducted in line with national standards with trained and accredited commanders complying with guidance and legislation. This policy is relevant because armed officers were deployed, under an armed authority, to locate and arrest VC. I now refer to this as URN: NGPF0007966.

j. Armed Response Vehicle Patrol Strategy

This policy describes its aim as: *“to develop a patrol strategy for Nottinghamshire ARVs in order to ensure that wherever possible, they are located in the most appropriate areas according to the threat and risk profile as documented within the Armed Policing Strategic Threat and Risk Assessment (AP STRA). To document handover arrangements which will provide clarity to ARV and Demand Management officers and staff in terms of minimising the length of time that armed resources are not located in areas of potential threat due to the need to handover to oncoming colleagues. To ensure that there is a degree of flexibility in arrangements and patrol protocols in order to ensure that the needs of the public are adequately met by Operational Support resources.”* This policy is relevant because armed officers were deployed, under an armed authority, to locate and arrest VC.

k. Force Control Room Op Plato Procedure

This policy describes its aim as: *“the overarching strategic aim of an Operation PLATO response will be the preservation of life and neutralising the ongoing threat. To achieve the overarching strategic aim, it is expected that the policing response will be to identify, locate and confront subjects to neutralise the threat. Both unarmed and armed officers may play a part in achieving this aim and the scope and extent of their roles will depend upon the nature of the attack and the threat posed.”* This policy is relevant because Op Plato was declared by the FIM. I now refer to this as URN: NGPF0007969

- I. It is important that Nottinghamshire Police recognise that the declaration of Operation PLATO initiates a wide range of plans and contingencies by the emergency services. It is not just for the mobilisation of additional armed resources.

- m. Armed Policing Strategic Threat and Risk Assessment
Forces are required to produce an annual strategic threat and risk assessment (STRA). The STRA is reviewed quarterly, but as a living document it is monitored, reviewed and updated on a regular basis to ensure that it remains current. The quarterly Strategic update document records relevant changes in crime, demands, capability and capacity and progress on risks.

- n. Force STRAs may be used to create aggregated regional and national STRAs. The purpose of the Armed Policing STRA is to establish the operational requirements for the police use of firearms and less lethal options within the applicable force or region. The STRA will enable decisions to be made with regard to the appropriate:
 - firearms deployment profile across the Force
 - firearms capability
 - firearms policy and training
 - future demands and threats.

Adequacy of the Police Response

620. I have also been asked to provide any reflections by Nottinghamshire Police on the adequacy of the police response to the attacks of 13 June 2023. Having now reviewed a significant amount of material in relation to the police response to these incidents I make the following observations.

621. The 999 calls for the first incident were answered quickly; officers were almost immediately mobilised towards the scene and officers arrived on scene exceptionally quickly. The effectiveness of the initial response was further enhanced by the breadth of specialists and guidance of supervisors who were also quickly on scene. The speed with which firearms officers, dog handlers, drone operators and supervisors were on scene was also exceptionally quick. The coordination of the scene to prioritise lifesaving, check for further victims, and expedite other fast track actions was also very good. The first aid provided by officers, initially independently, and then in support of paramedics and the heli-med team was exceptional in the face of such traumatic injuries.
622. As with all police incidents, no response will ever be perfect and there will always be, particularly with the benefit of hindsight, an opportunity to identify areas which could, and perhaps should, have been done differently.
623. In respect of the first incident the information passed to attending officers about the most up to date description and direction of the suspect was in the main good. However, I have found a couple of occasions when the information provided to officers was not the most up to date or detailed available at the time. I do not believe this had any material effect on the extent or quality of the search activity but as I have noted these instances within this statement, I mention them here.
624. In relation to search activity for the suspect, it is clear that despite the very significant resourcing requirements at the scene, extensive and prompt searching activity did take place. Accounts from officers, supported by their vehicle telematics, shows substantial search activity in the areas where the suspect was last sighted and believed to have headed towards.
625. However, with regard to incident 0065 there is limited evidence of direct supervision or coordination of those search efforts. Whilst many of the officers searching, particularly the dog handlers, are very experienced and

proficient in searching for suspects, I feel this should perhaps have been overseen by a coordinating supervisor. This would potentially have allowed officers to cover the maximum area in the most efficient and expedient way, whilst ensuring officers always had the most up to date information about the suspect's description and direction of travel. Incident 0069, which did encompass some of the efforts to locate the suspect and other potential victims, exemplifies the value a supervisor can bring to coordinating and resourcing a thorough search.

626. In respect of the decision of the FIM to deploy the two nearest firearms teams to the scene and the other to search for the suspect, I agree with this decision for the reasons I have already stated. However, as I have also mentioned earlier in this statement, I consider there should have been some further consideration of the threat the subject posed to the wider public, and the officers searching for him, as more information came from the scene about the severity of the injuries and the exceptional nature of the incident.
627. The response to incident 0069 was appropriately revisited once the Control Room Sergeant identified that its proximity to the Ilkeston Road scene, and the nature of the reports, meant it could potentially be linked. The mobilisation of additional officers, including specialist dog handlers, firearms officers, the drone operator and a supervisor from another area, all ensured this was a thorough and extensive search.
628. The point to point (PTP) discussions between the FIM and the Response Inspector, and then later the FIS and the Response Inspector, both indicated that the focus of the Inspector had, not unreasonably, been consumed by the large, complex and dynamic scene at Ilkeston Road. Whilst this undoubtedly added to the effectiveness of resources at this scene it meant the Inspector was not entirely sure which officers were engaged in searching for the suspect and was not aware of incident 0069 until they were later informed.

629. Whilst the contact between the Control Room supervisors and the Inspector on the ground ensured they had everything they needed at the scene, the gap in the capacity of the Inspector to consider incidents and activities beyond the scene perhaps could have been spotted earlier. Had either the Inspector themselves, or the control room supervisors, identified this, the importance of ensuring other supervisory tasks were not being missed could have been highlighted.
630. In relation to incident 0077 it is clear the control room initially faced some challenges in identifying available resources because all officers in the area were already engaged with activity on other incidents. It was positive to see the immediate intervention of the control room Sergeant to deploy one of the firearms teams and redirect Sergeant Barnett, and his officers from the search for incident 0069.
631. The prompt attendance of officers led to one officer happening upon the suspect and witnessing two victims sadly being driven at by the suspect. Again, the immediate intervention of the control room supervisor to direct that officer to stop and prioritise care of the victims over pursuing the suspect vehicle was appropriate and impressive.
632. The firearms authority and declaration of Op Plato followed very shortly after this update as the FIM recognised the intentional nature of the suspect driving at the victims. This coincided with some significant communication challenges as officers were responding to a chaotic scene with multiple casualties and required additional resources to support with first aid and road closures.
633. The FIM appropriately directed specialist resources to a dedicated talkgroup, but this was quickly complicated by another officer happening upon the suspect vehicle and providing updates on a different talkgroup. Some of the firearms officers were clearly monitoring multiple talkgroups simultaneously which made the flow of clear information particularly challenging.

634. As real time information was coming through about the suspects whereabouts, and specialist officers (PC 1721 Whysall and PC 3288 Yallop and PC 4550 Bower) updated they were very close to that location, the FIM had little opportunity to deliver an NDM briefing and tactical plan. In the time available this would have been incredibly challenging, and a full briefing would likely have been impossible. However, it would have been desirable for the FIM to briefly articulate some aspects of their briefing, such as a threat assessment, working strategy and primary tactic, before officers came face to face with the suspect. I do however understand the FIM's view on the importance of keeping the airwaves clear for the benefit of officers rapidly converging on the suspects location.
635. The dynamic nature of this rapidly developing and highly risky situation also disrupted the immediate flow of Op Plato related information. As attention was appropriately focused toward supporting the immediate apprehension of the suspect, some officers had not been informed of the Op Plato declaration, including the Response Inspector. This is of course not as things should be and it took some time for things to recover once the suspect had been successfully detained.
636. The response to the firearms authority, and Op Plato declaration, also identified that some of the resources engaged in the suspect search, had by this time returned to base or were on their way back to base. Whilst this may not have been inappropriate it would have been desirable for there to be a clear decision as to when the searching for the suspect was concluded, and it was appropriate for officers to return to base. Whilst this may have happened informally between the officers engaged in the search this is not entirely clear from the material I have reviewed.
637. I can see from the vehicle telematics that PC 3821 Reynolds and PC 1721 Whysall were engaged in extensive searching for approximately 40 minutes, the drone officer for almost an hour as were PC 3288 Yallop and PC 4550 Bower. Sgt Barnett and team were still engaged in a search in

The Park area at the time the city centre incident was called in. It is clear to me that extensive search activity did take place long after the last known sighting of the suspect and despite the challenges presented by the very dense housing in that area. My observation is simply that the oversight of a supervisor would have been beneficial.

638. In summary, the response to the city centre incidents was very quick, officers provided appropriate care and support to victims and then coordinated the prompt arrest of the suspect. The Op Plato declaration was appropriate to the circumstances and the rapid mobilisation of further resources was proportionate to the threat picture at the time of the declaration. As new information came to light, including the suspects arrest, there was appropriate tapering down of mutual aid resources as the FIM reassured themselves there was no ongoing threat.
639. In relation to incident 0079 officers were again on scene very quickly, as was a supervisor. This meant that officers were able to provide detailed updates on the victim's critical condition and begin lifesaving efforts. As sufficient resources arrived, they were able to quickly secure a cordon, identify further evidence and speak to witnesses at the scene. It is positive to see that despite the victim sadly appearing to be deceased upon officers' arrival that they continued with lifesaving efforts until directed to stop by a medic.
640. Considering the sequence in which these incidents were called in, and when pertinent information became known, it is clear to me that the connection between these incidents, which may now seem obvious, would not have been at all clear at the time. Given the confusing and rapidly changing information that was coming in, combined with the exceptionally rare, marauding, and counter intuitive nature of the suspect's behaviour, I think the policing response overall was of a high standard in the face of exceptionally difficult circumstances.

Statement of Truth

I believe the content of this statement to be true. I understand that proceedings may be brought against anyone who makes, or causes to be made, a false statement in a document verified by a statement of truth without an honest belief of its truth.

Dated 02/01/2026
